

MILLENNIUM NUCLEUS FOR THE INTEGRATED DEVELOPMENT OF TERRITORIES, **CEDIT**

Impact Area: Territorial development

Speciality: Economic development of the territories; Economic geography;
monitoring and evaluation of public policies; social and territorial disparities

The Millennium Nucleus for the Comprehensive Development of Territories (CEDIT) bridges the gap between policy formulation and the latest social science tools. For this, the Millennium Nucleus will create public-private associations that integrate regional science into the design of territorial development policies; sociological and cultural studies; spatial econometrics; estimation of small areas; impact evaluation of public policies, and other relatively new analytical tools.

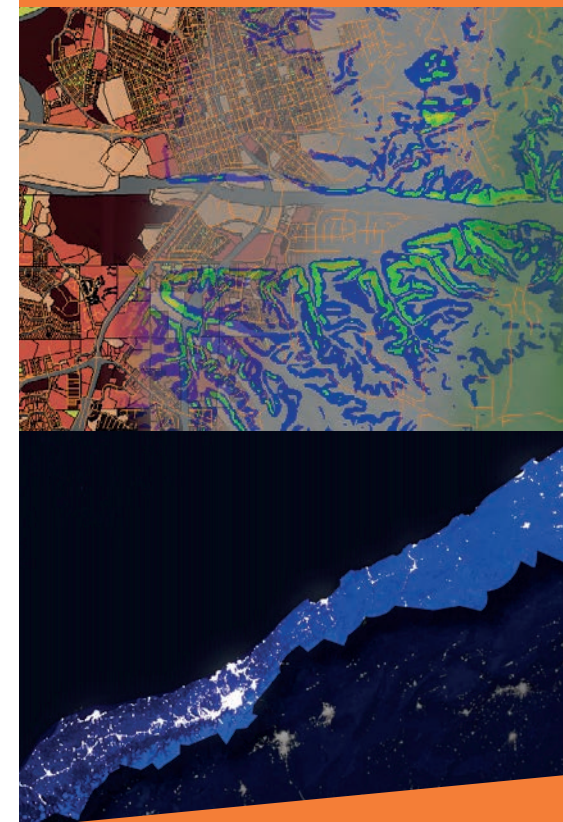

The expected result of the Nucleus will be an improvement in the capacity to design, monitor and evaluate policies that promote more equitable development of the territories.

Research Lines:

- Territorial Measurement.
- Entrepreneurship and Innovation and its relationship with geographical and territorial characteristics.
- Social and gender disparities, economic characteristics of the household, and the role of the Original Nations and local communities in the different strategies of territorial development and inclusive prosperity.
- Migration and Human Capital.
- Design, monitoring, and evaluation of public policies.
- Towards an integral development of the territories.
