Dialysis & Nephrology DIGEST

RPA Insights

As Medicare physician reimbursement continues in 2025 to suffer from damaging shortfalls due to budget neutrality and lack of an inflation adjuster, steps are being taken in Congress to address the issue. On January 31, [the bipartisan Medicare Patient Access and Practice Stabilization Act \(H.R. 879\)](#) was introduced in the House of Representatives by Representatives Greg Murphy, MD (R-NC), Jimmy Panetta (D-CA), Mariannette Miller-Meeks, MD (R-IA), and Kim Schrier, MD (D-WA), and as of early March had 103 cosponsors, with more signing on every week. H.R. 879 adds an additional 6.62% to the Medicare conversion factor (CF) between April 1, 2025, and December 31, 2025. The 6.62% increase eliminates the entire current existing reduction, reflecting ongoing inflationary pressures and accounting for the lower CF in the first quarter of 2025. Additionally, the Co-Chair of the GOP Doctor's Caucus, Dr. Murphy, has announced via social media that President Trump had pledged to address Medicare physician payment as part of a longer-term government funding bill presumably to be enacted in the coming weeks.

The Renal Physicians Association (RPA), many specialty societies and other groups in the organized medicine community [urged Congress](#) to finally address Medicare physician payment in the short- and long-term by enacting H.R. 879. Addressing physician pay cuts is one of RPA's 2025 legislative priorities and as such, RPA has developed an action alert on the [RPA Legislative Action Center](#) that all concerned parties can send to their Representatives to urge them to pass the bill. Elevating the voice of nephrology practice is one way RPA advocates for and supports the kidney community. We strongly urge you to spend the 30 seconds it takes to submit the action alert and get engaged in the campaign to fix Medicare physician payment.

NKF: Mass layoffs at HHS will negatively affect kidney patients' lives

NKF is expressing concern that the job cuts, which it labeled as “haphazard and indiscriminate.” could negatively impact public health, especially for those affected by kidney disease. It emphasizes the critical need for HHS programs that support kidney health and prevent disease and warned the terminations at HRSA’s Division of Transplantation, the Centers for Medicare and Medicaid Services as well as the NIH, the CDC and the FDA would result in diminished resources for kidney care and impede policy efforts. The NKF also called for a restoration of funding and staff to ensure the continuation of essential services.

JANUARY 31, 2025

Bipartisan House bill seeks reversal of Medicare payment cut

Lawmakers **introduced** the bill to reverse the 2.83% payment cut affecting physicians under the Medicare Physician Fee Schedule. The bill, supported by the American Medical Association (AMA), proposes a 2% increase in reimbursements, addressing ongoing financial challenges for healthcare providers. The payment cuts, which took effect in Jan., were criticized for threatening the sustainability of physician practices, particularly given increasing practice expenses. Congressman Greg Murphy, who reintroduced the bill, says preventing the cuts is critical for the future of private practice medicine. The AMA strongly backed the legislation, which if passed, would go into effect on Apr. 1.

JANUARY 29, 2025

Bill passes MS House to remove hurdle to outpatient dialysis, other services

The Mississippi House of Representatives **passed** a bill to ease the opening of certain healthcare services, including outpatient hospital dialysis, by removing the requirement for a certificate of need. The bill aims to make healthcare more affordable and accessible in rural areas by doubling capital expenditure limits for hospitals and streamlining the application process. The Mississippi Department of Health would be required to publish a State Health Plan annually using the most recent data. The legislation is now before the state Senate, where it’s at the committee stage.

Innovative Renal Care data breach may spark class action lawsuit

Attorneys are investigating a potential class action lawsuit related to a data breach at [Innovative Renal Care](#) (IRC). Individuals who received notifications are encouraged to participate in the investigation to understand their rights and potential involvement in the lawsuit. The breach occurred when an unauthorized actor accessed IRC's computer systems between Feb. and Mar. of last year. Data compromised include names, addresses, dates of birth, Social Security numbers, driver's license or state ID numbers, financial account information, taxpayer ID numbers, insurance, billing and claims data, as well as medical information. IRC claims it implemented measures to secure its systems and notified individuals on behalf of dialysis centers and providers.

NM dialysis clinic eligible for tax deduction under state law says appeals court

The appeals court [ruled](#) that Home Dialysis of New Mexico is eligible for a healthcare practitioner deduction under state law. The court found the company provides in-home dialysis services and isn't solely a licensed outpatient facility, which was a requirement for exclusion from the deduction according to the state's tax agency. The judge stated the tax agency's original interpretation of the statute was incorrect.

Fresenius Sells Fresenius Medical Care Stake For \$1.15 Billion

Fresenius SE announced it raised around 1.1 billion euros (\$1.15 billion) by selling 10.6 million shares of Fresenius Medical Care and issuing 600 million euros in senior unsecured bonds. This move aims to strengthen the company's balance sheet and reduce leverage. Despite the sale, Fresenius will remain the largest shareholder in Fresenius Medical Care with at least a 25% stake plus one share.

Fresenius Shares Jump After Higher Profit, Dividend Payout

Fresenius SE declared a dividend for 2024 and forecasted growth in earnings and sales for the year. Shares surged 6.8% to 39.05 euros, their highest in three years. Fourth-quarter net profit was 390 million euros, with revenue up 7% to 5.53 billion euros. The company increased its Kabi EBIT margin guidance for 2025 and expects group organic revenue growth of 4%-6% and EBIT growth of 3%-7%. Fresenius also exceeded its cost-savings target and focuses on lowering debt. The dividend declared for last year is 1.00 euro per share.

FEBRUARY 13, 2025

DaVita: Net income for FY2024 up 35% over previous year to \$936M

DaVita reports consolidated revenue of \$3.2 billion for Q4 and \$12.8 billion for FY2024. Operating income was \$565 million and adjusted operating income was \$491 million for Q4 while FY2024 operating income was \$2.1 billion and adjusted operating income was \$1.9 billion. The number of dialysis treatments performed in the last quarter of the year, 7.2 million or 91,786 per day, which represented a 1.4% decrease from Q3. Seasonal impacts such as flu vaccines affected revenue change in Q4 while the FY2024 change was primarily driven by the increase in average reimbursement rates from normal annual rate increases including from Medicare, as well as revenue cycle improvements and an increase in hospital inpatient dialysis rates.

DaVita says year one of KCC program shows importance of value-based care

DaVita claims it achieved significant clinical outcomes in its first year of value-based care arrangements, partnering with nearly 1,300 nephrologists across the U.S. to enhance the lives of Medicare patients with kidney disease. The efforts are part of the Comprehensive Kidney Care Contracting (CKCC) option within the government's Kidney Care Choices (KCC) model. Among the achievements cited by DaVita include:

- Embedding care team members in 68% of nephrology practices, providing care to shared patients directly at the site of care;
- Overseeing approximately 31,000 patients across dialysis centers of multiple providers, remotely and in nephrologist offices;
- Enabling 2.4x more DaVita patients to have a planned start on home treatment through patient education, care management and transition support;
- Screening 67% of patients for depression remission, supporting holistic care of both physical and mental health; and
- Increasing patient activation by 13%, indicating higher patient engagement across patient populations.

SOURCE: DaVita

FEBRUARY 25, 2025

Fresenius Medical Care reports FY2024 earnings growth at high end of expectations

The German company says 2024 was the second of a three-year restructuring plan. Some of the highlights of this strategy last year included:

- In 2024, the transformation program delivered \$230 million in savings, contributing to accumulated savings of \$590 million since the program began;
- Last year, Fresenius Medical Care (FMC)'s plan to exit non-core and dilutive assets included the exit of clinic operations in multiple markets, including Latin America, Sub-Saharan Africa and Türkiye. In all, 230 facilities were divested, affecting 8,200 employees and around 33,800 dialysis patients; and
- FMC increased free cash flow by 10%, mainly due to proceeds from divestitures, to reduce its net financial debt by 9% to \$10.2 billion.

This year, FMC predicts YoY revenue growth between zero and a low-single digit percentage, while operating income should increase YoY by a high-teens to high-twenties percent rate compared to 2024.

FEBRUARY 13, 2025

Humana's Kidney Care partnership with Monogram Health expands to 5th state

Humana and [Monogram Health](#) expanded their kidney care program to include in-home treatment for eligible Humana Medicare Advantage members in AL, LA, MS, TN and now, GA. The arrangement focuses on value-based care, enabling earlier interventions and addressing the needs of traditionally underserved populations. The program aims to improve health outcomes for members with CKD and ESKD by treating not only the disease but also its underlying causes such as hypertension, diabetes and metabolic disorders.

Ten years of Humana data show value-based care results in fewer ED, hospital visits, reduced costs

Humana **finds** MA patients receiving care under value-based arrangements saw fewer ED visits and inpatient hospitalizations and received more preventive care screenings. The data also show:

- Value-based care (VBC) members saw their primary care clinicians 10% more than non-value-based care patients in 2023;
- VBC MA patients report a 90% satisfaction rate with their healthcare provider;
- VBC MA patients had one-third fewer inpatient admissions in 2023 versus those enrolled in original Medicare;
- Humana MA members treated by value-based clinicians experienced 12% fewer ED visits and 7% fewer admissions than those not in a value-based arrangement;
- Humana MA members receive more preventive screenings than those under non-value-based practices, including an annual wellness exam, colorectal screening, diabetes eye exam and mammograms. Members were also more likely to receive diabetes care eye exam screenings and to meet blood sugar control measures; and
- Black patients visited their senior-focused primary care clinicians 39% more and low-income beneficiaries had 21% more visits versus original Medicare. Senior-focused primary care patients also had 17% more primary care visits, 6% fewer hospitalizations and 11% fewer ED visits.

Value-based arrangements allow for investments in benefits members value most at an affordable price. In 2023, Humana MA value-based arrangements saved 26% in medical costs compared to original Medicare.

U.S. Renal Care program supports team members aspiring to become nephrology nurses

U.S. Renal Care says the Nightingale Program offers financial assistance by prepaying tuition costs for in-network schools, aiming to alleviate the financial burden of nursing education. The program is designed to meet the needs of caregivers providing dialysis services, ensuring they have the necessary resources to advance their careers. By investing in the professional development of its staff, U.S. Renal Care seeks to enhance the quality of care provided to patients with kidney disease. The initiative underscores the company's commitment to fostering a skilled and workforce dedicated to improving patient outcomes.

FEBRUARY 20, 2025

Baxter appoints interim chair/CEO; kidney care business stands alone

Baxter International reported its financial results for Q4 and FY2024, highlighting the completion of the sale of its Kidney Care business, Vantive, to Carlyle on Jan. 31. The business was a significant part of Baxter's operations and its sale marks a shift in the company's strategy to streamline and enhance healthcare delivery. Baxter's continuing operations, excluding Vantive, reported worldwide sales of approximately \$2.75 billion for Q4, a 1% increase on a reported basis and 2% on a constant currency basis. The company also appointed lead independent director, Brent Shafer, a former CEO of Cerner with previous medtech leadership experience at Philips and Hillrom, as chair and interim CEO. He replaces Jose Almeida, who's retiring. In another personnel move, Anita Zielinski was appointed SVP, CAO and Controller at Baxter.

JANUARY 28, 2025

Researchers in VA develop technique to spare kidney patients from multiple vein surgeries

Researchers at the University of Virginia are experimenting with a noninvasive method to prevent vein blockages, which could benefit kidney failure patients dependent on dialysis. Dubbed Pericelle, the innovation aims to reduce the need for repeated surgeries to create new shunts, which often become blocked and require relocation. If successful, Pericelle could improve treatment outcomes and reduce costs for dialysis patients.

Analysis suggests outsourcing dialysis provides clinical, financial advantages to hospitals

The Sg2 analysis **highlights** potential benefits of outsourcing inpatient dialysis services for hospitals, including shorter lengths of stay, lower infection rates and reduced direct costs. The study analyzed outcomes and costs for 349,361 patients across 546 hospitals, revealing that outsourcing is particularly beneficial in higher acuity facilities. It generally results in: Lower average direct hospitalization costs than at academic medical centers (\$37,893 vs. \$41,853); Shorter ICU stays than at high acuity facilities (8.64 days vs. 9.76 days); and Fewer days in high-acuity facilities when diagnosed with AKI (19.82 vs. 21.85).

FEBRUARY 14, 2025

Study finds autosomal dominant PKD patients from underrepresented minority groups have unequal access to transplantation

A study **led** by the University of Chicago indicates Black and Hispanic patients with autosomal dominant polycystic kidney disease (PKD) face disparities in kidney transplantation outcomes compared to white patients. Researchers determined underrepresented groups spend more years on dialysis, experience delayed graft function and receive fewer living and preemptive transplants. The study highlights that marginalized groups encounter barriers at various stages, from transplant referral to post-transplant care, that affect access to transplantation benefits. The data suggest unequal access for Black and Hispanic patients holds even when they're aware of their risk for kidney failure.

FEBRUARY 4, 2025

Survey suggests nephrologists rate happiness, balance as below average for medical specialties

Medscape suggests that overall, 76% of physicians believe happiness and balance are possible within the medical profession. Ninety-four percent of those in allergy and immunology agree with that statement, while at the other end, only 63% of emergency medicine practitioners believe happiness and balance are attainable within their specialty. Sixty-nine percent of nephrologists replied "yes" to the question. Medscape adds that overall, 47% of specialists report burnout and 24% depression.

Nominee for FTC seat says agency will focus on noncompete agreements this year

Their party in the majority, Republicans will hold three of the five seats on the FTC. The third GOP nominee, Mark Meador, told a Senate committee the agency will look into noncompetes, saying competition enforcement actions are “overused and abused,” adding companies with overly restrictive agreements will be targeted. The previous administration tried to implement a total ban on noncompetes but that rule was struck down and it appears an appeal by Biden’s FTC is dead in the water. The current agency chairman, Andrew Ferguson, stated the FTC will strike a task force to investigate noncompete agreements as well as no-hire and no-poach contracts.

FEBRUARY 28, 2025

Medtronic discontinues Ellipsys vascular access system for AVF

Medtronic inherited the Ellipsys Vascular Access System when it acquired Avenu Medical in 2020. In a memo to clients, the president of Peripheral Vascular Health by Medtronic, Dave Moeller, states the system for arteriovenous fistula is being discontinued. No specific timeline was provided for the wind down but Moeller says sales representatives will contact clients about last-minute purchases and completing orders as well as offering alternatives for fistula creation. Medtronic claims the end of Ellipsys doesn’t mean it’s vacating the AV marketing, pointing out the In.Pact AV drug-coated balloon and Fortrex HP PTA balloon catheter will continue to be marketed commercially.
