VANPOOLS

WHAT IS A VANPOOL?

A vanpool is a mode of public transportation comprised of a group of riders who agree to share their ride to work in a vehicle large enough to accommodate a minimum of seven people. Vanpooling is available all across the state of Nebraska. Costs vary based on number of miles, number of commuters, etc. in your vanpool.

VANPOOLING CUTS COSTS BY 50-75%

Based on the average commute of 50 miles round trip per day, driving alone will cost nearly \$800* per month and almost \$10,000* per year.

UP TO A \$400 MONTHLY SUBSIDY

Go NEWhere Vanpools is offering up to a \$400 monthly subsidy to each vanpool, significantly reducing the out-of-pocket costs for riders!

*Based on AAA average commuting figures. Costs may vary by location.

FORMING A VANPOOL IS QUICK AND EASY.

Whether you want to join a vanpool or already have a group of co-workers gathered, the designated vanpool coordinator will determine a convenient start date, meeting time and number of pick-up points along the way. Once that has been determined, vanpoolers are ready to get started.

*All drivers must meet minimum qualification criteria.

PERKS OF A VANPOOL

Vanpool members will receive the following benefits in one low, monthly rate, along with the award-winning Enterprise Rent-A-Car customer service:

- Reliable, well-equipped vehicle providing all the creature comforts of a luxury vehicle
- Scheduled service and maintenance to guarantee complete vanpool safety
- 24-hour roadside assistance
- Primary Auto Liability Insurance and \$0 Deductible for Comprehensive and Collision
- Administrative support
- Month-to-month flexibility so you can vanpool according to your needs
- Optional Guaranteed Ride Home Program

KEEPING MONEY IN YOUR POCKET

GAS

Fuel costs while driving alone are usually more expensive than the total monthly cost of a riding in a vanpool. With gas prices around \$2.50 per gallon, this can cost you \$200 per month*.

MAINTENANCE

Taking your car to and from work every day increases the frequency of needing scheduled maintenance (e.g. brakes, oil change, etc.) as well as the increased likelihood of unscheduled repairs.

INSURANCE

Almost all major auto insurance companies offer significant discounts (10% to 30%) to drivers who designate their vehicle as “recreational only,” which means you use it for everything but driving to work. Plus, some major insurance companies now offer Pay As You Drive insurance, further incentivizing low-mileage drivers.

DEPRECIATION

Depreciation is typically the most dramatic commuting cost and the most difficult to recognize. Commuting adds the most significant miles during your car’s life and lowers resale value by thousands of dollars when you decide to sell.

COMMUTE WITH ENTERPRISE IS THE 
FOURTH LARGEST
PUBLIC TRANSIT PROVIDER IN THE U.S.

TAX-FRIENDLY

You may also be eligible to receive a tax break if your employer offers a pre-tax payroll deduction for mass transit. Check with your employer to see if they currently participate in this pre-tax benefit (IRS Tax Code 132(f)).
