DOG AGGRESSION: THE SECURITY GUARD

Taking Control

Have a leash in your pocket or close to the front door

When doorbell rings, go calmly to the front door & crouch down.

Hold your hand out calmly and wait for your dog to approach, you may even have a tasty treat ready, and then pop your dog on the leash.

Leave Or Remove

Decide if your dog can stay or need to be removed from the door

Removing the dog depends on:

- ▶ How calm they are
- ▶ If you think they're going to jump on the person
- ▶ Be aggressive

Test how calm they are by asking your dog to sit.

If they won't listen put them outside, bathroom, garage, or use a baby gate.

Bring In On Leash

If the person comes into your home and your dog calms down and stops barking, bring them in on a leash

The key here is:

- ▶ Only bring your dog in on a leash
- ▶ Only if they are calm
- ▶ Not showing signs of aggression

Keep them away from the visitor and if they start barking put them back outside and maybe try again later

Adding Fuel To The Fire

Don't add fuel to the fire by getting angry or yelling at your dog

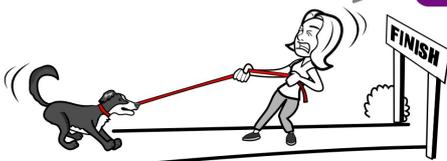

Be calm and quiet

Watch how your dog reacts to your calmer energy

Rushing Our Dogs

Rushing the training will only delay you

Become a master at reading your dog's energy

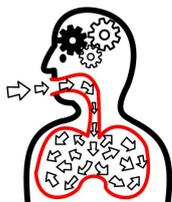

Work on bringing your dog into the green zone

Two Breaths For Success

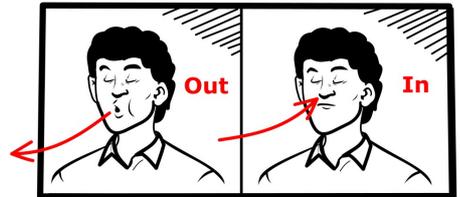

NON-REACTIVE ENERGY

This technique resets your breathing & your mind for training

Breathe out slowly thru the mouth, breathe in slowly thru the nose.

REPEAT.

Calm Freeze

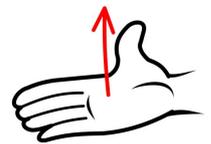

Look away and focus on something relaxing and say nothing.

After the dog is calm, let go.

Hold gently under your dog's collar

PALMS UP
