

2012 Product Range

Optical Media . Hard Drives . Flash Memory . Accessories . LED & OLED

Introduction

For more than 40 years, Verbatim has been at the forefront of the evolution in data storage technology and today remains one of the most recognisable and respected names in industry.

Verbatim is now the No.3 brand in Europe for all recordable media* and the global No.1 brand** in optical media with a reputation for quality and reliability, both for the products that it sells and the service that it provides.

And since entering the lighting industry in 2010, Verbatim has introduced a portfolio of energy-efficient, high quality LED and OLED lighting products for consumer and business applications, based on core technologies provided by Mitsubishi Chemical Corporation.

(*GfK Q1/2010 Europe 5 includes Tape, CD, DVD, Blu-ray, USB Flash Cards and External HDD.)
(**Santa Clara Consulting Group)

Optical Media

As the world's largest brand of optical media, Verbatim offers excellent reliability and wide-spread compatibility with its selection of recordable and rewriteable CD, DVD and Blu-ray discs.

With up to 50GB of storage capacity available on a single disc now, and 100GB discs being introduced to the market in the near future, Blu-ray provides the perfect solution for recording and playing high definition video and getting the best out of your new HD TV.

Blu-ray

Blu-ray discs offer 3 to 5 times the storage capacity of a standard recordable DVD disc, enabling the recording, rewriting and playback of high definition video (HD).

BD-R

BD-R are recordable discs with a 25GB storage capacity. For use in BD writers and recorders.

Professional Media

Verbatim’s DataLifePlus professional optical media combines selected high quality media with specially developed printable surfaces. Advanced AZO dye technology ensures excellent read and write performance, high-quality photo and sound storage recording quality and superior archival stability that lasts for generations. All DataLifePlus products are manufactured on selected lines using specifications which are up to 66% tighter than standard specifications. This means that it offers the best media; the best disc to disc consistency, the best burner and player compatibility and burning quality ever. It also results in less downtime for your hardware, fewer rejects and less cost for you. DataLifePlus comes with newly developed wide printable surfaces without any branding to suit your printing needs. Select the inkjet surface compatible with the professional printers or the new thermal surface, which is now compatible with both thermal sublimation and thermal transfer printing.

Portable Hard Drives

Store 'n' Go - Hard Drive for Macs

Specially created for the Mac community, Store 'n' Go Mac Portable Hard Drives, with their sleek, minimalistic design in a black or white glossy finish, are simply gorgeous. But there is a lot more to them than just looks. Available in two variants; one with a USB 3.0 SuperSpeed interface, and the other, a FW800 / USB 3.0 SuperSpeed combo unit, they are fast - lightning fast*.

The USB 3.0 drive is formatted FAT32 for use with Mac OS and Windows, while the FW800/USB 3.0 combo is formatted HFS+ specifically for use with the Mac OS. They come in two capacities: 500GB and 1TB. Is there a better way to add extra storage to your MacBook?

*USB 3.0 SuperSpeed has a data transfer rate up to ten times faster than USB 2.0 (based on USB bus speeds).

Specifications

Desktop Hard Drives

2-Disk RAID Hard Drive

The Verbatim 2-Disk RAID storage solution offers several RAID modes including BIG, RAID-0 and RAID-1 providing high speed and reliability for both professional and home use. Available in a USB/ eSATA II combination, each drive includes backup software to ensure your favourite music, photos, video and critical data are safe.

Mode Settings

BIG
Default setting that provides maximum storage with data saved in sequence to both disks.

RAID-0
Data is saved (striped) across both drives and accessed in parallel to provide highest data transfer rates.

RAID-1
Half of the capacity is used to store your data on one disk and the data is mirrored (copied) to the second disk for safety.

Specifications

External Power: +12 V DC input
Interface: 1 x USB 2.0 Port, 1 x eSATA Port
Data transfer Rate: eSATA II: 3000Mbit/s 9max), USB 2.0: 480Mbit/s (max)
Software: Backup Software
System Requirements: eSATA Port, USB Port, Windows 2000, XP, Vista or Windows 7 Mac OS x 10.1 or higher
Supported HDD File Systems: FAT-32/NTFS/HFS + / EXT 2

Home Network Storage

Gigabit NAS

Share files between computers within your network using Verbatim’s Gigabit Network Attached Storage (NAS) drive. Easily set up a computer network using the provided auto-configuration protocols, such as DHCP or Apple Bonjour to centralise your music, photos, video, and data files. Verbatim’s NAS with Ethernet connection is ideal for backing up your PC or Mac on your home network.

By using a network drive you can create multiple users and user groups. Network users can be assigned privileges and read/write access to data. UPnP Media Server and Print Server features are among the many benefits of this network drive.

Specifications

Interface: One 10/100/1000 Ethernet port (RJ45) for connection to network,
Two USB 2.0 Host ports (A) for connection to printer or other device
Data transfer Rate: Ethernet 1000Mbit/s (max)
Software: Backup Software
System Requirements: Ethernet, Windows XP, Vista or Windows 7
Mac OS x 10.4 or higher, Linux 2.4 or higher
Supported HDD File Systems: FAT-32/ EXT 2/ EXT 3

Home Network Storage

MediaShare Home Network Server

Many homes today have more than one computer, creating the need for centralised home storage systems. The new Verbatim MediaShare Home Network Server allows users to easily share files including photos, music and videos, by allowing remote access to these files from any computer or smart phone with an internet connection.

The MediaShare also protects files through automated back-ups and enables media to be streamed to a variety of digital devices including the Sony Playstation® 3, Microsoft Xbox 360 or other DNLA compliant devices.

Specifications

Interface: 1 x 10/100/1000 Ethernet port (RJ45) for connection to network, 3 x USB 2.0 host ports (type A), 1 x eSATA port
Data transfer Rate: Ethernet 1000Mbit/s (max)
System Requirements: Windows 7 / Vista / XP / Home or Pro (SP1 or SP2) / 2000 (SP4). Mac OS X 10.1 or higher. Broadband internet connection
Supported HDD File Systems: FAT-32/ EXT 2/ EXT 3
HDD Pre-Formatted: EXT 2
Unit Dimensions: 178mm x 178mm x 50mm
Unit Weight: 1.73 Kg
Package includes: MediaShare, Ethernet Cable, AC adapter + EU/UK plugs, Quick Start Guide, Software & User Manual CD

Professional Network Storage

PowerBay

The PowerBay DataBank NAS is a robust and secure four-bay cartridge-based hard drive system, offering up to eight terabytes of storage capacity and addressing the fast growing market for network attached storage for small- and medium-sized businesses. The “hot-swappable” cartridge system enables users with no IT expertise to easily remove and exchange protected HDD cartridges without having to turn off system power.

Also available is the PowerBay DataBank Removable Hard Drive System, a single-bay solution that can be used in combination with the PowerBay NAS or as a standalone replacement for tape systems.

Go to www.verbatim.com for more details on this product.

USB Drives

Store 'n' Go - PinStripe USB

With USB ports in almost every computer and popping up in cars, DVD and multimedia players, TVs, photo frames and more, USB drives are now being considered an essential accessory.

The "PinStripe" utilises a pull-mechanism which protects the USB connector without requiring a separate cap. It is available in capacities ranging from 2 to 32GB (black only) and five vibrant metallic colours; Sunkissed Yellow, Eucalyptus Green, Hot Pink, Caribbean Blue and Volcanic Orange (all 4GB & 8GB).

USB Drives

Store 'n' Go - Netbook & Audio USBs

These miniature USB drives, smaller than the size of a Euro coin, allow you to add storage capacity or music files almost unnoticed!

The Netbook USB comes in 8, 16 and 32Gb capacities and due to its very small size can be semi-permanently left in your Netbook for convenience.

The Audio USB, available in 8GB only, neatly stays in your car radio, allowing you to listen to over 2000 of your favourite MP3 tracks while motoring.

Both USB drives can be used in any computer or gadget with a USB 2.0 port - anything from netbooks, tablet PCs, music players, digital picture frames and desktop PCs.*

USB Drives - **SECURITY**

Secure 'n' Go - Secure Data USB Drive

The new Store 'n' Go Secure Data USB Drive addresses the burgeoning need of private users to keep data safe when being carried around.

The secure USB drive offers a powerful 256bit AES hardware-encryption and mandatory password which ensures that the data on the drive is always encrypted and secure. For added security, the USB device erases all data after 20 wrong password attempts.

It is available in three storage capacities - 4GB, 8GB and 16GB.

SSD

What is SSD?

Flash-based, solid-state drive (SSD) solutions are increasingly finding their way into laptops, servers and other devices.

Solid State devices have no moving parts making them rugged and power efficient.

- Fast read and write speeds
- Quicker application loading
- Fast booting times (twice as fast as a 7200 rpm HDD)
- Increased durability - engineered to withstand shocks and vibrations
- Silent operation
- Extended battery life
- Improve data reliability
- Lower latency (time delay experienced before data is read or written).

SSD

2.5" SATA Solid State Drive

Available in both SATA II and SATA III interfaces, Verbatim SSDs feature ultra-fast data transfer rates, faster system boot-up, shut down, and increased system responsiveness. Verbatim's new SSDs are the ideal hard drive alternative for users seeking a performance and reliability upgrade. Verbatim SSDs contain no moving parts, resulting in greater mechanical stability and reliability, increased shock resistance, silent operation, and reduced power consumption for increased battery life.

The 2.5" SATA II Solid State Drive Upgrade kit is bundled with NTI Echo smart cloning software, which allows users to copy their entire hard drive, including operating system, without the need to reinstall programs or update drivers. Also included is a special casing that converts your existing hard drive into an external drive for additional storage space as well as all components needed for desktop installations, including a 3.5" bay adapter, mounting screws and a Molex power cable (for optional desktop use).

Offering even higher performance on SATA III based systems, Verbatim SATA III SSDs take full advantage of the SATA III bandwidth and are capable of achieving Read and Write speeds over 500MB/second.

LED & OLED

LED Lighting

LED

The lighting market is changing. LEDs and OLEDs are now positioned to replace classic lighting technologies in residential and professional spaces. They will bring huge energy efficiencies and offer innovative solutions to support every conceivable application. Verbatim is at the forefront of this change, introducing a selection of LED and OLED lights that incorporate the know-how of its parent company, Mitsubishi Chemical Corporation – one of the largest chemical companies in the world with more than 50 years experience in developing lighting materials.

The technology behind each Verbatim LED lamp is focused on efficiency, comfort and respect for the environment. LED's by their nature are more efficient in converting electricity into light. They also have a very long lifetime; less waste is produced, reducing the impact on the environment. The combination of the comforting light that LED lamps produce and the peace of mind which comes with caring about the environment in which we live contribute to the Verbatim lighting experience.

Offering optional comforting warm light or brilliant cool light, Verbatim LED lamps have modern, yet timeless designs and provide a direct replacement of classic incandescent or halogen lamps incorporating popular bases including E27, B22, E14, GU5.3, GU10 & G53.

They are all energy saving, long life, shock and vibration proof and emit no ultraviolet or infrared radiation.

To find out more, go to www.verbatimlighting.eu

LED & OLED

Experiencing light like never before:

OLED – Velvet Lighting

OLEDs (Organic Light Emitting Diodes) promises a paradigm shift in lighting design which will have designers, planners and architects glowing with excitement. They offer high quality, soft, colourful lighting with a luxurious feel; as smooth and as rich as velvet.

VELVE
OLED LIGHTING

OLED is a lighting device composed of ultra thin films of organic molecules that create light.

Multiple times thinner than a human hair, OLED lighting can be made flexible and as light as a feather. They provide brighter, more dynamic lighting, are mercury free and use even less power than LEDs.

Mitsubishi Chemical Corporation (MCC) has decided to use the unique qualities of OLEDs, integrating them into printable whole injecting material (HIM) with newly researched light emitting technology. This allows the mass production of the world's largest class of lighting area, about 14cm square.

Verbatim's OLED 'Evaluation Kit' is available for order directly from - www.verbatimled.eu

It is an engineering sample for evaluation for use by lighting designers, artists, engineers and architects to discover the capabilities and creativity of OLED first hand.

The Evaluation Kit contains everything one needs to get started and experience the beauty and creativeness of VELVE OLED including:

- Colour tunable framed OLED (207(L) x 145(W) x 18.3(D) mm)
- Pre-programmed colour & white tones
- USB connection to PC incl. software
- Information explaining OLED technology

Trusted Technology

For more than 40 years, Verbatim has been a leading company in data storage technology.

Verbatim benefits from the \$1.4B spent on R&D each year by parent company Mitsubishi Chemical Holdings and its 60 years of experience in developing high class materials.

Everything that Verbatim does is geared to its customers from the quality of the components and materials that are used to build Verbatim products to the support and state of the art operations that it offers, ensuring fast, flexible and accurate deliveries.

We also take care for the environment, maximising recycling while minimising packaging and CO₂ emissions. We consider environmental impact at every stage of product design. All the materials we use are compliant with RoHS and WEEE and our manufacturing sites and warehouses comply with the highest standards of environmental management systems.

EXPERIENCE

- Over 40 years of success
- Global number one in optical media*
- Number three in Europe for all recordable media**

- Customisable offering - alternative packaging, different labelling etc.

ENVIRONMENTALLY FRIENDLY

- Wherever possible, we select recycled raw materials
- Minimised waste through reduced packaging sizes
- Energy saving components used
- Reduced CO₂ emissions by minimising air freight, cutting emissions and opting for delivery by sea where possible and maximising truck loads to reduce the number of vehicles on the roads

Green Button - Energy Saving

The GREEN BUTTON software reduces energy consumption and extends the drive's life expectancy by automatically placing the Verbatim Store `n` Go into sleep mode after a programmed period of time or by the user manually clicking on the GREEN BUTTON on the desktop.

* The mA indicated are achievable in a testing laboratory environment. Actual performance may vary and will depend upon the hardware / software specifications / settings of the device in which the item is used.

Green button software enables you to control when to suspend the hard drive to save energy.

When the hard drive is idle, you can just click the "suspend now" button and turn the hard drive to "sleep mode" to save energy.

Core Technologies

Verbatim has always been at the forefront of technological innovation. We are able to maintain our leadership and market the very latest products and technologies due to the extensive research and development that is undertaken by parent company Mitsubishi Kagaku Media in Japan.

We pride ourselves on our 'Core Technologies'.

AZO™ Ultimate resistance to UV light for increased protection and reliability. High quality picture and sound with more than 100 years archival. Used in BD-R LTH type, DVDR and CD-R discs.

SERL™ A special recording layer present on Verbatim's CD-RW, DVD/ RW and BD-RE media that ensures noise-free recording time and time again.

HARD COAT A specially created tough coating for DVD media and Blu-ray Discs that is superbly resistant to harmful scratches.

CRYSTAL A tough, clear surface layer for increased protection against accidental surface damage.

M•A•B•L™ Metal Ablative Recording Layer. A specially created inorganic recording layer present on Verbatim's BD-R media ensures excellent recording compatibility and prolonged stability for archival life.

Medi Disc CD-R and DVD-R targeted toward the medical industry for storing valuable patient information. Using tighter specifications for better compatibility and recording quality. Uses AZO.

Support Services

To maintain and deliver our promise of guaranteed customer satisfaction, we have provided online support services to help you with any questions you may have regarding product releases, downloads, technical issues and useful links.
