

Maclocks Armored Glass™

Screen Shield for Tablets and Smartphones

Extreme Impact Protection

Can withstand up to
132 lb/ 60 kg of weight

Treatment in a bath of potassium salt at more than 300° C / 572° F causes sodium ions in the surface of the glass to be replaced by potassium ions, making Armored Glass™ tougher than common glass. Armored Glass™ can withstand up to 60 kg / 132 lbs of weight by bending before safely breaking!

Scratch Resistant

9H material delivers
unprecedented scratch
protection

Armored Glass™ has the highest rating in the Pencil Hardness Scale! The resistance of a coating is determined as the grade of the hardest pencil that does not scratch the coating when pressed firmly against it at a 45 degree angle. With Armored Glass™ protection, touch screens resist scrapes and last longer!

Maximum Clarity

High-grade tempered glass
preserves crystal clear image
resolution

Armored Glass™ is carefully treated and polished, much like optical lenses, to intensify the clarity of HD smart screen displays, improving the brilliance of each and every pixel of a 1080 pixel display. The screen image will remain crisp, clear, and detailed, enhancing the visual experience of HD.

Anti-Smudge Coating

Nano-coating repels natural
skin oils and dust, and is easy
to keep clean

Armored Glass™ is treated with a special hydrophobic nano-coating, creating an easy-to-clean, smudge-free surface that repels water, dust, oil and dirt. Also used on eyeglasses, flat panel displays and stainless steel, this coating ensures that Armored Glass™ stays sparkling clear!

Precision Touch

Ultra smooth glass allows
total image clarity with precise
touchscreen sensitivity

The exceptional thinness of Armored Glass™ preserves the high sensitivity and accuracy of touch screens, ensuring their responsiveness when using today's most advanced touch applications. Engineered for performance and ultra clarity, Armored Glass™ maintains rapid conductivity enhancing the user's screen interface.

Simplicity

Fits precisely on the screen;
easy to apply without air
bubbles.

Very simply, place Armored Glass™ over the screen of the intended smart device. Press the center of Armored Glass™ and the adhesive will apply itself smoothly and bubble-free across the surface. That's it. Hassle free. Durable. Convenient.

Maclocks Armored Glass Vest

Glass Screen Shield with Protective Back & Side Guard

The screen image will remain crisp, clear, and detailed, enhancing the visual experience of HD.

Secure Grip

Backside skin adds uncompromising protection in a surprisingly slim profile with enhanced corners for maximum stability at the weakest points. The anti-slip layer allows the phone to lie on its back without sliding, and shields all buttons, ports, sensors and the camera while keeping them fully accessible.

Anti-Smudge Coating

Nano-coating repels natural skin oils and dust, and is easy to keep clean

Armored Glass™ is treated with a special hydrophobic nano-coating, creating an easy-to-clean, smudge-free surface that repels water, dust, oil and dirt. Also used on eyeglasses, flat panel displays and stainless steel, this coating ensures that Armored Glass™ stays sparkling clear!

Precision Touch

Anti-Shock Protection

Made of top grade material, the bumper like skin provides anti-shock, high and heavy drop protection and allows phone to be functional and fashionable. Drop tested onto a hard surface with phone retaining full functionality and no damage to battery or screen.
