

Photo Album for Winchester, NH

Job # 30623

W/O # 21514361

March 17, 2017

Since the last report the cab has arrived in Florida. The pump house structure was fabricated and the body panels began weld-up and fabrication. Next week the cab could begin the paint process. The chassis frame should begin assembly in Appleton. The pump house structure will remain in staging and the body should continue with fabrication.
