

Photo Album for Cotuit, MA

Job # 29562

W/O # 19782542

April 15, 2016

This week the cab and chassis were joined together as assembly continued. The pump and pump house structure remained in staging (no photos), while the body began having trim and wiring harnesses installed on the body assembly line. Next week the chassis should continue with chassis assembly, the pump and pump house structure should be joined together and the body should finish with body assembly.
