Fluke Calibration Sales Channel

We are streamlining the number of standard calibration baths in our portfolio. We are reducing the number of calibration baths in our portfolio. This reduction is being done to simplify our offering and reduce product line overlap. Taking this action will allow our teams to concentrate their efforts on a smaller number of SKUs and improve delivery, quality, and efficiency. Every bath model being eliminated has a suggested alternative that will satisfy most application requirements

The attached list of items will be retired effective November 25, 2022. This list also contains accessories that are unique to each of the bath models being retired.

Please use this letter and list to communicate our plan to retire these products to channel partners and customers.

Sincerely,

A handwritten signature in black ink that reads "Wally Miller". The signature is written in a cursive, flowing style.
