A delivery game for 2 to 4 players

For the fastest deliveries in town, you can depend on the Witch Academy Courier Service!

As a junior witch, you are racing to complete your delivery route the fastest. You must fly to each town location in the correct order for your delivery route, The witch who completes their route and returns home first is the winner!

Slipstream is a card game that is played as a tabletop game.

Each player controls a witch, and is given a delivery route and five Flight cards to move them around the table. Six town locations are randomly placed in the centre, and you must place your Flight cards down in a pattern that moves your witch over each location in the correct order.

As you play your cards, your movement options become restricted, until you pick up cards from the tail of your slipstream. Plan your flight carefully!

If you can overlap your witch onto a slipstream in play, you can follow it for a speed boost and pick up your cards, gaining a big movement advantage!

Can you complete all your deliveries the fastest?
