

Access *iRead* on an iPad (Teacher)

All schools entitled to use *iRead* can access it on an iPad®. If your students use iPads to access *iRead*, the *iRead* app must be downloaded to the iPads, and depending on how your students open *iRead*, you may need to configure the login credentials.

- Note:**
- If you are using mobile devices other than iPads, such as Androids™, you can access *iRead* directly through a browser. No additional steps are required.
 - *iRead* functions identically on a workstation or mobile device with the exception that students tap buttons and links on a mobile device rather than use a mouse or pointer, as they do on workstations.

Instructions to assist you in setting up *iRead* on an iPad are provided as follows.

- Download the *iRead* App
- Open *iRead* using one of the following two options:
 - Access *iRead* by Logging in to Ed
 - Access *iRead* by Logging in to the App (*requires configuration*)
- Exit *iRead* on an iPad
- Use Guided Access

Download the iRead app

Important: The *iRead* app requires that your iPad uses iOS 11 or later.

- Locate the *iRead* app from the iTunes App Store and download it on the iPad.

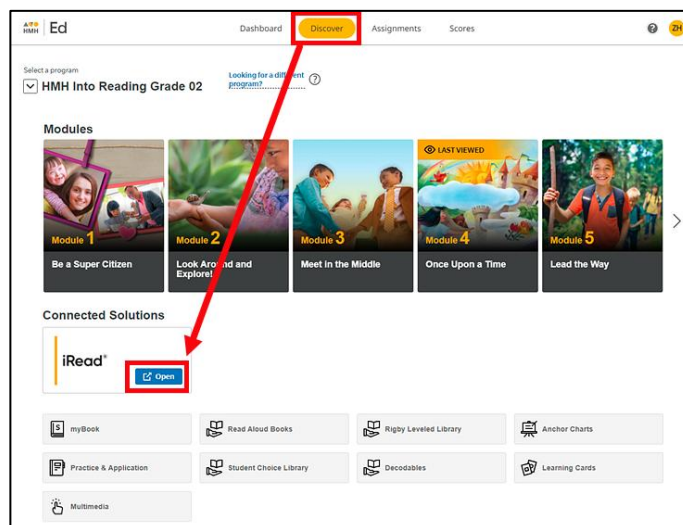

Access iRead by Logging in to HMH Ed™

After the *iRead* app is downloaded to their iPads, students can open *iRead* by logging in to *Ed* through a browser.

Note: The student's *Ed* login is recognized through single sign on (SSO) functionality. No additional *iRead* app setting configurations are needed.

To log in and open *iRead* in *Ed*:

- 1 Using the iPad, log in to *Ed* through a browser.
- 2 Click the **Discover** tab.
- 3 Locate the **iRead** card and click **Open**.
iRead opens.

Access *iRead* on an iPad (Teacher)

Access iRead by Logging in to the iRead App

Students can log in to the *iRead* app directly using their *Ed* login credentials. This access option does not recognize single sign on (SSO) functionality and requires a settings configuration. This configuration is required only once.

Before you begin . . .

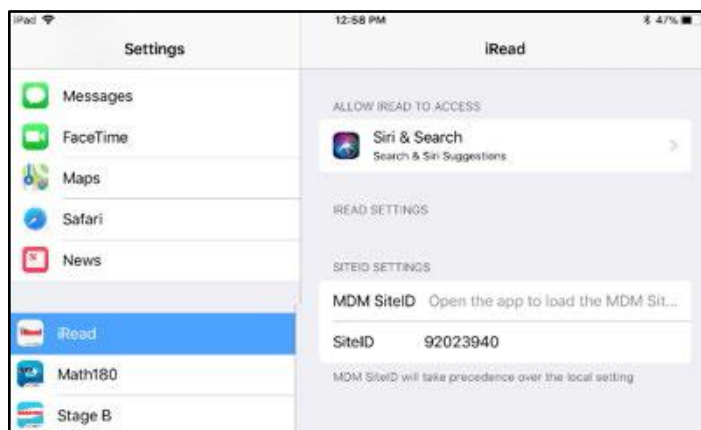

- To configure the app settings, you need your HMH Site ID, otherwise known as PID or MDR PID. (Public schools require the District PID; private and charter schools require the School PID.) If you do not know your District or School PID, contact your school or district administrator.

To enable direct log in and open iRead:

- 1 On the iPad, find the **Settings** icon and tap to open. *The Settings app opens.*
- 2 In the **Settings** menu, tap the *iRead* link. *The iRead settings menu appears.*
- 3 In the **Site ID** field, enter your District PID for public schools or the School PID for private and charter schools.

Note: The Mobile Device Manager (MDM) Site ID is used for informational purposes only by districts deploying the app via MDM and is not configurable from this screen. If your organization is deploying *iRead* through an MDM, consult your MDM's documentation for instructions on pushing the app out to all classroom iPads.

- 4 Depending on the iPad type, press the **Home** button or swipe up. *The Home page appears.*
- 5 Locate and tap the *iRead* app. *The iRead login page appears.*
- 6 Log in to *iRead* using your HMH username and password. *The iRead app opens.*

Exit the *iRead* App on an iPad

Important: The *iRead* app requires that your iPad uses iOS 11 or later.

- Depending on the iPad type, press the **Home** button or swipe up. *The iRead app closes.*

Use Guided Access

Guided Access is an iOS function that allows users to control which iPad functions and buttons are enabled or disabled for student use. This may be useful for teachers with young students. For more information on using Guided Access, see the [iPad User Guide](#)  available at www.apple.com .
