

URBAN CANOPY EXPANSION

Request for Qualifications

To outline associated costs and establish a timeline for the expansion of the Downtown Grand Rapids urban canopy through extensive tree planting.

DOWNTOWN
GRAND RAPIDS INC.

Due: June 22, 2022

Inquiries & Submittals

All inquiries and submittals should be sent to:
Downtown Grand Rapids Inc. c/o
Melvin Eledge Jr., Operations Manager - meledge@downtowngr.org

Due: June 22, 2022

Background

Downtown Grand Rapids Inc. (DGRI) is the organization responsible for city-building and place-management in the urban core of Grand Rapids, Michigan's second largest city. Established in 2013, DGRI serves as the singular management entity for the combined operations of the Downtown Development Authority (DDA), the Downtown Improvement District (DID), and the Monroe North Tax Increment Finance Authority. More details can be found at Downtowngr.org.

Historically, Downtown districts lack significant tree canopy coverage as a result of years of prolific development. Studies have shown the lack of trees and urban canopy create an urban heat island effect, making districts much hotter than their suburban counterparts.

The lack of greenery and increase in heat has a negative impact on the health of residents living in these more urban areas and it has been shown that the lack of greenery and shade can adversely affect downtowns' economic and environmental vitality.

In 2015, Downtown Grand Rapids Inc. in partnership with the City of Grand Rapids developed the GR Forward master plan which, among other things, established goals for improving the Downtown tree canopy. Specifically, a goal of increasing the Downtown tree canopy from 5% coverage to 10% coverage by 2025 was set. This aligns with Grand Rapids' overall goal of increasing tree canopy from 34% to 40% citywide.

More information about the GR Forward plan can be found here:

https://downtowngr.org/our-work/projects/gr-forward

DGRI partners plant trees in curbside greenspace

Scope of Work

The primary responsibility of the contractor falls into four categories – site preparation, tree species selection, tree planting, and maintenance.

Site Preparation

The contractor shall do all necessary work to prepare the 200 identified locations for tree planting (Attachment B). Preparations could include and are not limited to soil amendment, stump/tree removal, tree grate removal, and debris clean up.

Species Selection

The contractor shall propose a selection of tree species based on the following criteria: resilience in urban environments, growth potential (height), additive canopy potential, resilience to disease, and mix/variety of species being planted.

Contractors should consult the list of preferred and approved trees for the City of Grand Rapids (See reference #2).

DGRI reserves the right for final approval of the tree species being selected.

Tree Planting

Once the locations have been prepared and the tree species have been selected and agreed upon, the contractor shall plant the 200 trees on a schedule agreed upon between the contractor and DGRI, but to start no later than Fall 2022.

As part of planting, the contractor shall provide mulch (where necessary and agreed upon), staking, and tree watering bags.

Maintenance

If applicable, the contractor should provide a scope of maintenance responsibility that includes at a minimum outlined maintenance and care activities and the duration these activities will be performed.

Warranty

If applicable, the contractor should provide details, including coverage and duration, about any warranty offered on the trees once they're planted.

Volunteers plant trees along a street in Downtown

Budget

The contactor shall prepare a budget that outlines all applicable costs for site preparation, tree planting, and maintenance (as applicable).

Contractor Qualifications

Any applicant must have been established as a company performing landscaping or similar activities for a period of at least two years prior to the date of this bid and have a functioning operation of sufficient size to satisfactorily execute this contract.

Proposal Evaluation

The following criteria will be used in the consideration of proposals:

- Previous experience implementing similar programs in urban settings.
- Proposed schedule.
- Budget; overall cost in detail.

Proposal Timeline

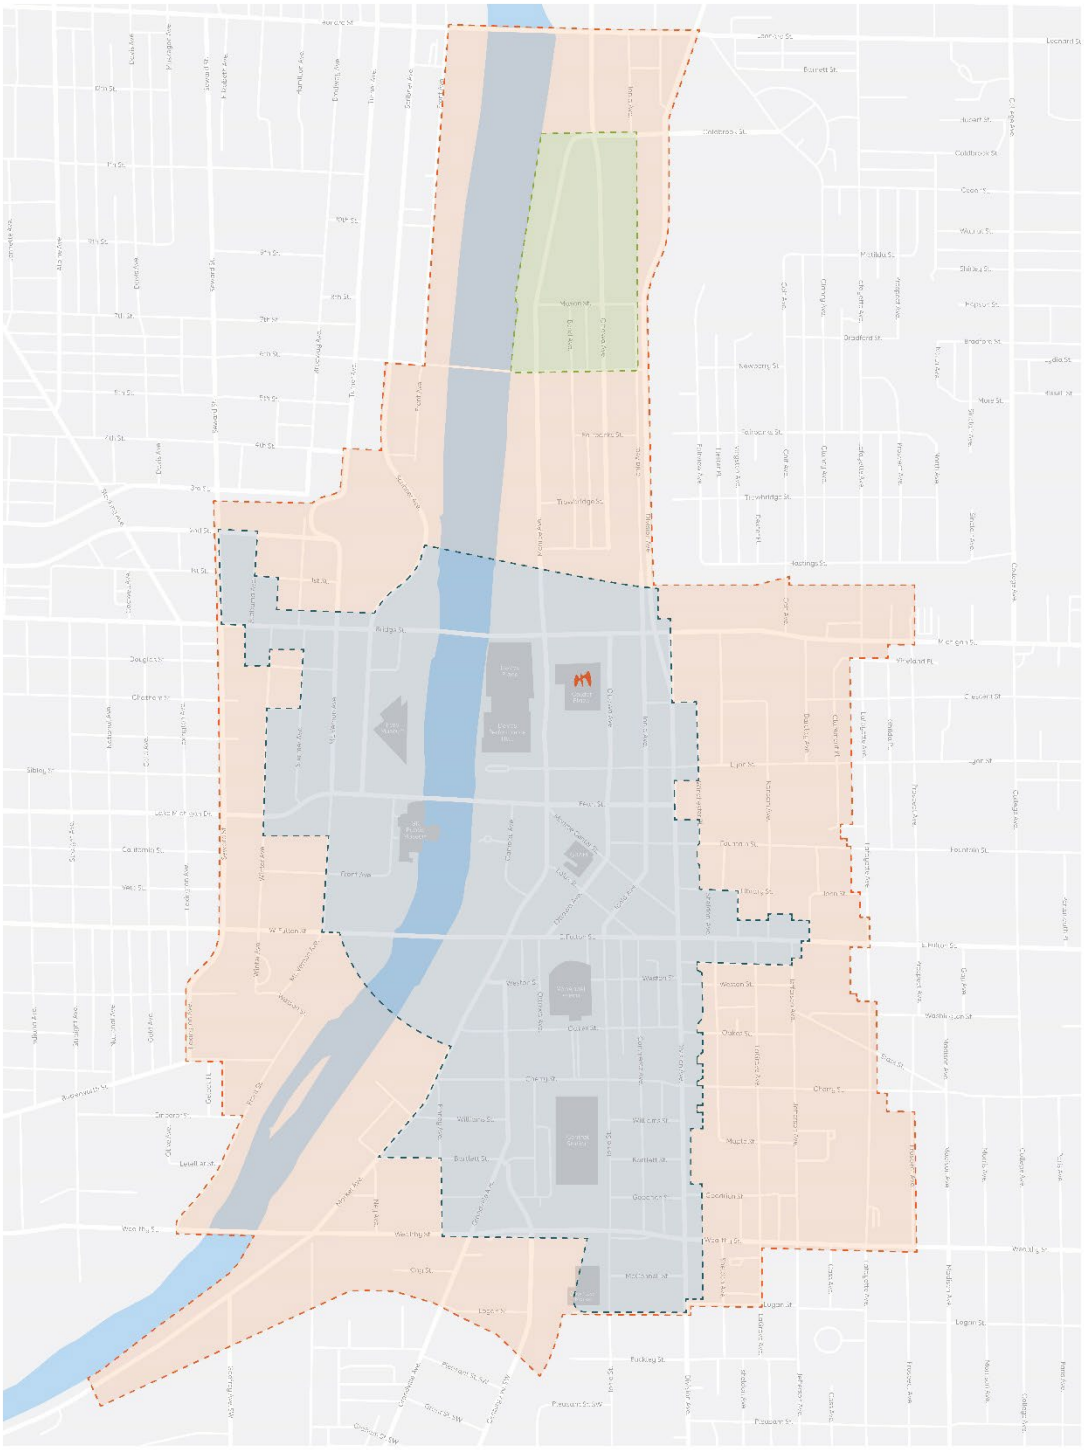

- May 23, 2022: RFQ Issued
- June 03, 2022: Deadline to submit RFQ Questions/Clarifications (by 5:00pm EST)
- June 13, 2022: DGRI Response to Questions (by 4:00pm EST)
- **June 22, 2022: Responses Due 5:00pm Eastern Time**
- July 06, 2022: Notice of Selection
- Fall 2022: Trees Planted

Downtown Grand Rapids Inc. List of Remediation/Planting Sites

Data and sites prepared by Friends of Grand Rapids Parks

Project Overview

The following document was created to provide physical, in-field locations of planting sites within the Downtown Grand Rapids Inc. footprint. The 200+ planting sites can be broken down into 3 categories:

1. **Vacant Planting Site** – Sites that are believed to be ready to plant with no remediation.
2. **Stumps/Dead Trees** – Sites that currently has a stump or dead tree that needs to be removed and then replanted with a new tree.
3. **Removals** – Sites with poor condition trees that are in decline and need to be removed and replaced with a new tree

Each of these categories are represented with a unique symbol on the maps:

Site Locations

All sites included in this document can be located by using the **'PARCEL ADDRESS'** to find the adjacent property, and then using the **'SIDE'** to determine whether the individual site is on the **'FRONT', 'SIDE', or 'REAR'** side of the adjacent parcel address.

Parkway Types

All sites have a field for **'PARKWAY TYPE'** that describes the type of parkway where the site is located. If this field is blank, the site is a standard tree lawn/parkway, other types are as follows:

1. TreeWell – Standard tree well
2. WellPerm – Tree Well with a permeable surface installed
3. WellGrate – Tree Well with iron grate installed
4. Median – Site is located in a Median
5. OtherMaint – Other Maintained area

Common and Botanical Species Information

All sites have fields for **'COMMON'** and **'BOTANICAL'** names. These fields are currently filled with species codes using the USDA Forest Service standards. All final species selections will be reviewed by DGRI as well as Friends of Grand Rapids Parks' Certified Arborists. The **'BOTANICAL'** defines the potential size of tree to be planted, the codes for vacant planting site size class are as follows:

1. VPSS – Vacant Planting Site Small, trees that will not grow taller than 30'
2. VPSM – Vacant Planting Site Medium, trees that grow between 35'-45' tall
3. VPSL – Vacant Planting Site Large, trees that grow taller than 45'

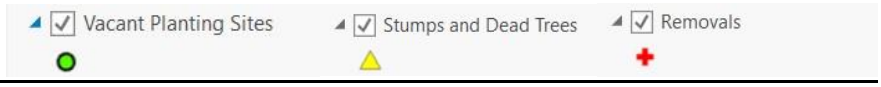

Planting Zones

The sites have been broken down into a total of **7 Zones**, each of these zones were organized as a means to group the individual sites in a logical, geographic area. Each zone can have all 3 types of assets and will be numbered from 1-End for each geographic area.

Planting Tables and Maps

The following tables and maps are designed to enable contractors to be able to locate the physical sites, in the event that you have specific questions, please do not hesitate to reach out. Sites are subject to potential deviation as the Downtown area of Grand Rapids is under constant development. Backup and alternative sites will be located in the event that any current site is untenable for remediation and planting.
