INE: Nutritionally Oriented Physical Exam - Skin

Skin Assessment	
<p>Observe your body head to toe. Use a mirror or a trusted companion to see areas you normally would not see. Use the diagrams to note any areas of rash, skin tag, discoloration, bumps, bruises, moles, or other abnormalities of your skin.</p>	
	
Circle all that apply	Possible interpretation
Skin tags	Blood sugar problems like hypoglycemia, tendency towards diabetes, low chromium, tendency to develop cysts and/or polyps
Dry skin "Goose flesh" at the backs of arms or thighs	Deficiencies in EFA, vitamin A or vitamins E Vitamin A deficiency, low thyroid, low essential fatty acids, low zinc, low vitamin E
Brusing – slow to heal or excessive	Deficiencies in vitamin K, C, E, or bioflavonoids
Wounds that take a long time to heal	Deficiencies in vitamin A, vitamin C, zinc or EFA; diabetes may also be the cause
Hemorrhoids	Deficiencies in adequate fiber, low levels of bioflavonoids, vitamin E, vitamin A, or essential fatty acids; inadequate exercise or food allergies
Tenderness at rib margins	Sign of adrenal distress or over-work
