SERCO

SERCO

Serco Inflatable Dock Seals and Shelters provide greater flexibility and a positive seal for improved dock safety, energy efficiency and improved loading dock environmental control.

**SERCO**[®]

Play it safe.

IMPROVE DOCK SAFETY. ENERGY EFFICIENCY. AND ENVIRONMENTAL CONTROL.

Play It Safe With Serco Inflatable Seals And Shelters.

SERCO INFLATABLES

PROVIDE the ultimate energy seal for climate-controlled loading docks. They deliver a tighter seal on the top of trailers for better weather control and allow you to seal a wider variety of trucks. Best of all, Serco inflatables can be interlocked with Serco vehicle restraints and other dock equipment for improved efficiency and safety. With a wide variety of models to meet your specific needs, Serco inflatables all improve energy efficiency with little or no pressure on your building walls.

SERCO SI-300 INFLATABLE DOCK SEAL

The SI-300 is designed for smaller doorways and uniform trailer sizes. The dock seal features a one-piece unitized construction that creates a virtual gasket seal at the rear of the trailer.

- Durable, one-piece cover construction
- Wall-mounted blower located above the seal
- Ideal for docks up to 8' wide and 8' high
- Can be interlocked with other dock equipment for improved performance and efficiency

◀ When interlocked with vehicle restraints and other dock equipment, Serco inflatable seals and shelters are prevented from operating until the trailer is secured to the dock for maximum efficiency.

SERCO SI-350 INFLATABLE DOCK SEAL

The SI-350 is designed for taller doorways and docks servicing a wide variety of trailer heights to provide a tight, energy-efficient seal with minimal pressure to the building wall.

- Full-width header and protective canopy
- Variable height head member adjusts to different trailer heights
- Head member includes torsion-spring retraction system
- Inflated by low-pressure, high-volume blower motor
- Can be interlocked with other dock equipment for improved performance and efficiency

SERCO SI-450 RIGID FRAME INFLATABLE DOCK SHELTER

The Serco SI-450 allows full, unobstructed access to a wide variety of trailers. Horizontal and vertical translucent panels provide maximum lighting during loading/unloading operations.

- Durable one-piece cover construction
- Provides full height and width access to trailer interior
- Head and side members completely retract out of the contact area and store behind heavy-duty curtains
- Minimal building wall pressure exerted through dock shelter
- Inflated by high-volume, low-pressure blower motor
- Ideal for docks up to 10' 11" wide and 11' high
- Can be interlocked with other dock equipment for improved performance and efficiency

SERCO SI-400 ADJUSTABLE FRAMELESS INFLATABLE DOCK SHELTER

The SI-400 is a fully inflatable shelter ideal for wider and taller doorways that service a wide variety of trailers, including those equipped with hydraulic lift gates.

- Durable one-piece, full-width canopy construction
- Head and side members adjust to seal a wide variety of trailer sizes
- Provides full width and height access to trailer interior
- Minimal building wall pressure exerted through dock shelter
- Inflated by high-volume, low-pressure blower motor
- Ideal for docks up to 9' wide and 10' high
- Can be interlocked with other dock equipment for improved performance and efficiency

SERCO SI-310-3 INFLATABLE RAIL DOCK SHELTER

The SI-310-3 inflatable rail car shelter features one-piece unitized construction for a positive, energy-saving extension between the facility and the rail car. Available in three-sided or four-sided models.

- Durable one-piece cover construction
- Minimal building wall pressure exerted through dock seal
- Inflated by high-volume, low-pressure blower motor
- Can be interlocked with other dock equipment for improved performance and efficiency

STANDARD INFLATABLE DOCK SEAL AND TRUCK SHELTER FABRIC

10 oz. per sq. yd. vinyl-coated fabric (black, blue).
Contact your Serco distributor for availability of optional fabrics and colors.
