Android 10 update mobile list samsung

Google released the Android 10 update on September 3rd but what about your Samsung Galaxy device? Will it receive Android 10? If so, when will samsung's Android 10 update come out? And what is One UI 2? Well, let's get you some answers based on our previous experience with Samsung Android OS updates. Please note that Samsung has not revealed its official Android 10 roadmap, but we will update this page when we get the details. A UI 2.1 Samsung released the Galaxy S20 devices with its latest Android 10-build — One UI 2.1, with Single Take mode, Night mode hyper-lapse, Pro mode for video and more. From what it seems, the update will not be made available for galaxy note 9 or galaxy s9 devices, as evidenced by the latest notification sent via the Samsung Members app in South Korea. According to the report, Samsung is not working on One UI 2.1 for the 2018 flagships. Samsung released the One UI 2.1 update for the Galaxy Note 10 and S10 sets as the first devices. It also released the same update to the Galaxy Tab S6 as well, making it part of the tablet's Android 10 update. Latest news May 10, 2020: About 2 weeks after the update was first seen for the Galaxy A20 family, Samsung has released the Android 10-based One UI 2 for the budget-friendly Galaxy A20s. Wearing software version A207FXXU2BTD7, the update provides march 2020 security patch along with the long awaited One UI 2. As we all know, the One UI 2.1 is the current version of Samsung's proprietary ROM. But it is currently reserved for flagship only and probably won't be available for the Galaxy A20 anytime soon. April 27, 2020: The Android 10 update is now available for the Galaxy A20. As of today, the update is only available in Vietnam, but we expect to be released in various other markets really soon. Coming in as build BTD3, the full software version of the A20 Android 10 update is A205FXXU7BTD3 and it also provides One UI 2 only, not 2.1, which is the company's latest version of the UI and is available for S10 and Note 10 phones apart from the S20 series. April 16, 2020: Samsung One UI 2-topping Android 10 update is now available for galaxy A30S as well. Coming in as build BDT1, the update is available for two models of A30S — SM-A307FN with software version A307FNXXU2BTD1 and SM-A307G receiving software version A307GUBU4BTD1. April 09, 2020: Samsung's One UI 2-topping Android 10 update is now available for S10 Lite, A10s, A10, A20e, and XCover 4S units as well, come in as software version G770FXXU2BTD2, A107FXXU5BTCB, A105FDDU3BTCA, A202FXXU3BTC7 and G398FNXXU4BTC7 respectively. April 03, 2020: South Korean mobile giant has released Android 10 update for Galaxy Tab S6 today, but what a pleasant surprise it packs: The big update packs in One UI over One UI 2, which is great considering only S10 and Note 10 users got it the so far, while S9 and Note 9 users will not. The software version of the update is T865XXU2BTC7 and while it already exists as an OTA, it may take some time to reach all users. 06 May: The Wi-Fi-only variant of the Tab S6 in the US has also started receiving Android 10, arriving as building BTD1 by March 2020 security patch. The full software version of the update is T860XXU1BTD1. March 30, 2020: Topped with One UI 2, Android 10 update is now available for Samsung Galaxy A9 2018, model number A920. Released as build CTCD, the full software version of the update is A920FXXU3CTCD, according to a Samsung document. March 26, 2020: The South Korean giant is finally rolling out Android 10 to the Galaxy Fold. Dubbed as F900FXXU3BTCD, OTA also provides March 2020 security patch. It is currently the exhaust only for LTE variant, in France. March 12, 2020: Samsung is now rolling out the One UI 2-topped Android 10 update for its Galaxy A70 phones. The update is available in some few regions right now, but should expand into all global markets in the next few days to weeks. Coming in as build BTC2, the full software version of the A70 Android 10 update is A705FNXXU5BTC2. February 13, 2020: Another mid-range Samsung smartphone is getting the upgrade to Android 10. Galaxy A50s users in Vietnam now get One UI 2 based on Android 10 on their devices that carry version A507FNXXU3BTB2. Sammobile says the update packs in February 2020 security patch and rollout should expand to other markets in the near future. February 13, 2020: Samsung has started sown a stable Android 10 update to the Galaxy A30 and the update is live in India at the time of writing. Weighing at 1.4GB, the update carries the software version A305FDDU4BTB3 (via Sammobile) and provides the February 2020 security patch along with all goodies from One UI 2 and Android 10. February 11, 2020: Android 10 is out for Galaxy Note 9 devices locked on Verizon in the United States. February 7, 2020: Samsung begins rolling out an update to the Galaxy M20 devices in Europe that bring android 10 and One UI 2 to the mid-range device. According to Sammobile, the update is currently being sown to users in Greece, Germany and Luxembourg and we can expect other regions to receive a similar update in the near future. Unlike the One UI 2 update on Samsung's flagship devices, the M20 update does not take the built-in screen recorder. February 7, 2020: T-Mobile Galaxy Note 10 and Note 10+ devices now receive february 2020 security patch update wearing software version BTA7 and weighs 216.46MB. February 5, 2020: Samsung's Android 10-based One UI 2 update is now also available for galaxy note 9 on AT&T! February 5, 2020: Good news for AT&T Galaxy S9/S9+ users as an update to Android have started rolling out (via Reddit 1, 2, 3) to those who wear version DTA5 and weigh weight 2GB. The update brings with it One UI 2 and January 2020 Android security. The software version on the Galaxy S9 is G960USQU7DTA5 and that on the S9+ is G965USQU7DTA5. February 4, 2020: U.S. Unlocked Galaxy Note 10 devices now receive February 2020 security patch update carrying software version BTA1 and weighs 211.71MB. February 4, 2020: U.S. Unlocked models of Galaxy S9/S9+ have started to get a stable update to One UI 2 with Android 10 and January 2020 Android security. According to Sammobile, the update arrives in the form of version G965U1UEU7DTA5 and weighs around 1.8GB. February 3, 2020: Just days after being released for a bunch of carriers in the region, U.S. Unlocked models of the Galaxy Note 9 are now getting a stable update to Android 10 with One UI 2 and January 2020 security patch. The update carries software version N960U1UEU3DTA5 and weighs 1921.57MB. Good Lock 2020 Samsung has announced that it will roll out Good Lock 2020 on February 3. The update to the customization app will be available on Samsung Galaxy devices running Android 10, providing a system-wide dark mode among other features. These changes include the ability to automatically arrange elements to match the background, a lock screen auto-lock setting setting, detailed message view, Task Changer Vertical Style, more one-handed features, dark mode customization, and a navigation hide feature. You can read the full changelog of the update on Samsung's website. Good Lock will initially start rolling out to users in South Korea while users in the US, Singapore, UK, Australia and Canada are expected to get the same in the following weeks. We are sure you have burning questions like when will Samsung release it Android 10 update, it will be One UI 2, when will your Samsung Galaxy device get it, when will the beta program start, etc. Well, let's get to them all below. Samsung Android 10 Release Date The stable Android 10 update is available for S9, S9+, S10, S10e, S10+, Note 9, Note 10 and Note 10+ phones Other devices that have received the Android 10 update are A40S, M30 and M20 Android 10 update comes with One UI 2 UI, which is Samsung's custom skin over Android OS. Samsung Android 10 Device List Below is a list of Samsung Galaxy devices that we believe will get the Android 10 update and the expected availability of the OS. Well, these devices are past their Android OS support window in two years. They have been updated to newer versions of Android on two occasions and unlike Google and OnePlus, Samsung devices only get two major OS upgrades. So, if your Samsung device came pre-installed with Android Nougat or older, you don't have a chance to receive Android 10. In other words, if your Galaxy device has lived long enough to get two major OS upgrades, don't expect a third version. What is Samsung's beta program Samsung is testing the update under a beta program before releasing it to the public Galaxy S10 were the first devices under the Android 10 beta program Android 10 officially arrived on May 7 on Google I / O 2019, becoming the first in the software's history to support more than 20 devices in the beta program. Even so, none of the non-Google devices included in the program have a Samsung name for it, which is disappointing from the world's leading smartphone provider. Samsung eventually rolled out the beta around November 2019 for the Galaxy S10 family, breaking the record they set with Android Pie, last year. The beta updates came thick and fast. And soon enough, the stable construction was released for the current flagship of the S series. The Galaxy Note 10, Note 9 and S9 were also blessed with beta-builds before the stable build was released. RELATED Android 10: Everything you need to know Samsung Android 10 release date RELATED → Motorola Android 10 update Samsung Galaxy S10e, S10, S10+, and S10 5G Stable One UI 2 update based on Android 10 update is now available in Germany (Nov 28) Released for Sprint (Dec 16), T-Mobile (Dec 06), Verizon (Dec 16), AT&T (Dec 17), and USA Unlocked (Dec 23). The update provides all the goodies from Android 10 as well as One UI 2. Related: Galaxy S9 and S9 Plus update timeline Samsung Galaxy S8, S8+ and S8 Active None are eligible for Android 10 update Update to Android 9 Pie is the second and last Android OS upgrade for the Galaxy S8 family of phones. This means no official update to Android 10, but there should be several custom ROMs that will bring Q to at least the Galaxy S8 and S8+. Related: Samsung Galaxy S7, S7 Edge and S7 Active None are eligible for Android 10 update None of these three will get an official update to Android 10. Their last major OS upgrade brought Android Oreo and the only hope of receiving Q is through custom ROMs. Related: Samsung Galaxy Note 10 Stable build released in Germany as version BSL7 [Dec 13] Verizon Note10/10+ models get stable Android 10 with One UI 2 [Dec 20] AT & T Note10/10+ users start receiving One UI 2 based on Android 10. [Dec 21] Sprint has released the stable build of Android 10-based One UI 2 [Jan 03] T-Mobile has released A UI 2 for Note 10/10+ [Dec 30th] Related: Galaxy Note 10 and Note 10 Plus update timeline Samsung Galaxy Note 9 Released for the global variant on January 5, 2020. Released on locked Galaxy Note 9 models from Xfinity Mobile, US Cellular, Comcast and Spectrum Mobile on January 29, 2020 – version N960USQU3DTA4. USA Unlocked models received Android 10 with One UI 2.0 on February 3, 2020 wearing software version N960U1UEU3DTA5. February 5: Released for AT&T Note 9 as well. Roll out to Verizon devices (Feb 11) Not yet available on other carrier-locked models Related: Galaxy Note 9 software update news Samsung Galaxy Note 8 Not eligible for Android 10 update There will not be an official Android 10 update from Samsung for galaxy note 8. The device's update to Pie was its second and major OS upgrade. At the moment we can't promise anything from the Android developer community as well, which is pretty unfortunate for such a Device. Related: Galaxy Note 8 software update news Samsung Galaxy A80 Eligible for Android 10 update OS should be released in Mar-Apr 2020 Galaxy A80 running Android 9 Pie out of the box, making it eligible for an update to Android 10. Since we expect Samsung to be done with updating the high-end Galaxy S and Note devices to Q in February 2020, the next in line is the Galaxy A series led by the Galaxy A80, probably in March or April 2020. Samsung Galaxy A70 March 12: A70 users began receiving android 10 update It should expand to all markets soon Samsung Galaxy A60 Eligible for Android 10 update Rollout should begin in Mar-Apr 2020 Samsung expected to upgrade Galaxy A60 to Android 10 no earlier than March 2020. This will be the first major Android OS upgrade for the device, but more people/regions should start seeing it in early Q2 2020. Samsung Galaxy A50 Galaxy A50 now gets Android 10 update (source / screenshot) Galaxy A50s devices in Vietnam start receiving stable Android 10 (version A507FNXXU3BTB2) update with February 2020 security patch (Feb 13) Android 100 is now available for Samsung Galaxy A50 as build BTC4, with the software version is A505FDDU4BTC4. The Android 10 update is also available for Samsung Galaxy A50s, comes in as build BTB2, and the full software version is A507FNXXU3BTB2. Samsung Galaxy A40s and A40 Eligible for Android 10 update Galaxy A40s updated to Android 10 (Jan 08) Update for Galaxy A40 expected in April 2020 Galaxy A40 has Android Pie preinstalled, meaning an update to Android 10 is guaranteed. As for when the rollout will begin, we expect it somewhere in April 2020 to be a realistic move, but with staged updates, some regions will have to wait until May 2020 before Q arrives on all A40 units. Samsung Galaxy A30 Galaxy A30 devices in India get Android 10 (version A305FDDU4BTB3) update with February 2020 security patch (Feb 13) Eligible for Android 10 update Stable Q should arrive in April 2020 Samsung Galaxy A30 is eligible for an update to Android 10. The device should start receiving the OS somewhere in April 2020, unless Samsung says otherwise. Samsung Galaxy A20 and A20e May 10: Released for A20s April 26: Samsung releases Android 10 for A20 (global model only) April 08: Samsung releases Android 10 for A20e (global model only) April 27: Android 10 update is now available for Galaxy A20. As of today, the update is only available in Vietnam, but we expect to be released in various other markets really soon. Coming in as build BTD3, the full software version of the A20 Android 10 update is A205FXXU7BTD3 and it also provides One UI 2. April 08: Samsung has released Android 10 galaxy a20e in the global market. The update comes as software version A202FXXU3BTC7 and is available for the model num A102F. Despite Despite The 10 for the A20e is available only in Slovakia right now, we expect Samsung to make it available across Europe and Asia and other markets around the work soon. Samsung Galaxy A10 and A10e April 08: Samsung releases Android 10 for A10 A10e is yet to get Android 10 (expected in April-May 2020) Android 10 update is available for Galaxy A10 sets in India, coming in as application version A105FDDU3BTCA. It should be available in other countries soon. We expect the A10e to get its own Android 10 update really soon, probably in May 2020. Samsung Galaxy A9 2018 Released for Galaxy A9 2018, model No. A920F, March 30, 2020 March 30, 2020: Topped with One UI 2, Android 10 update is now available for Samsung Galaxy A9 2018, model number A920. Released as build CTCD, the full software version of the update is A920FXXU3CTCD, according to a Samsung document. Related: Galaxy A9 software update news Samsung Galaxy A8 2018 and A8+ 2018 Not eligible for Android 10 update Galaxy A8 2018 and Galaxy A8 + 2018 has received two major OS upgrades after its debut with Android Nougat. That said, the duo is not eligible for an update to Android 10, at least officially. For now we can't say if Q-based custom ROMs will be available for these two, but we hope so. Related: Galaxy A8 Software Update News Samsung Galaxy A7 2018 Eligible for Android 10 Update Development began The rollout starting in April 2020 Samsung will upgrade the Galaxy A7 2018 to Android 10 OS (A750FNXXU3CTA1), but this can wait until April 2020 as it will be the second major OS upgrade, which is usually not rushed. Related: Galaxy A7 software update news Samsung Galaxy A6 and A6+ Both are eligible for Android 10 update Development started for bth devices OS to arrive in Q2 2020 Galaxy A6 and A6+ got their first Android OS upgrade to Android 9 Pie and they are still eligible for a second OS upgrade to Android 10. The update with firmware A600FNXXU5CSL5 (A6) and A605FNXXU5CSL1 (A6 Plus) is expected to arrive in the spring of Q2 2020, probably around May or June 2020. Related: Galaxy A6 software update news Samsung Galaxy M40 Eligible for Android 10 update OS could arrive in Q2 2020 The first of its kind is expected galaxy M40 to be upgraded to Android 10 in Q2 2020, probably in April or May. This will be its first major OS upgrade and hopefully not the only one. Samsung Galaxy M30 One UI 2 test build cleared by Wi-Fi Alliance Eligible for Android 10 update Rollout should begin in Q1 2020 Samsung Galaxy M20 Released for devices in Germany, Greece, and Luxembourg (Feb 7) Full rollout to complete within Q1 2020 Samsung Galaxy M10 Eligible for Android 10 update OS may arrive Q3 3020 Galaxy M10 already received a major Android OS upgrade that installed Android Pie. We expect that Samsung will provide a second OS upgrade to the device at some certain but the wait could go all the way to late Q2 or somewhere in Q3 2020. At the moment we can't say for sure. Samsung Galaxy J8 Eligible for Android 10 update The update may arrive in Q2 2020 Samsung Galaxy J8 has received the first update to Android 9 Pie and is expected to receive a second OS upgrade to Android 10 when the stable version arrives, probably somewhere in May or June 2020. Related: Galaxy J8 software update news Samsung Galaxy J6 and J6 + April 08: Samsung released android 10 update for J6 Both J6 and J6+ are eligible for the Android 10 update April 08, 2020: The Android 10 update is now available for Galaxy J6 phones whose model No. is the SM-J600G. The update arrives as software version J600GUBU6CTC8. We expect the J6 Plus Android 10 update soon. Related: Galaxy J6 software update news Samsung Galaxy J4 and J4+ Both should get the update to Android 10 Rollout can begin in Q3 2020 Both Galaxy J4 and J4+ come pre-installed with Android Oreo and have already received their goodies for Android Pie. While not sure, we believe the J4 pair will also get a second major OS upgrade to Android 10, but probably in Q3 2020. Related: Galaxy J4 Software Update News Samsung Galaxy Tab S5e Eligible for Android 10 Update Update may be released in March 2020 Galaxy Tab S5e has the new One UI installed on top of Android Pie. This combo gives it a direct ticket to Android 10, which should arrive somewhere in March 2020. Samsung Galaxy Tab S4 Eligible for Android 10 update OS may arrive in Q2 2020 Update to Android 10 will be the second major OS upgrade for Tab S4. That said, Samsung won't have much urgency to update it before newer its counterparts, which could delay the rollout until somewhere in April or May 2020. Related: Galaxy Tab S4 software update news Samsung Galaxy Tab S3 Not eligible for Android 10 update Galaxy Tab S3 came pre-installed with Android Nougat and the update to Android 9 Pie is the second and last OS it will get. This does not mean an official upgrade to Q for the Tab S3, but it should continue to receive monthly security fixes for at least a year or so. Related: Galaxy Tab S3 Software Update News Samsung Galaxy Tab A 10.1 19 Eligible for Android 10 Update Rollout may begin in Apr-May 2020 Galaxy Tab A 10.1 2019 has Android 9 Pie preinstalled, ensuring it an update to Android 10. As for when the Olympics will arrive, we think around April or May 2020 may be the possible release date. Related: Galaxy Tab A software update news Samsung Galaxy Tab A 10.5 Eligible for Android 10 Update May Come in Q3 2020 Galaxy Tab A 10.5 is a 2018 slate running Android Oreo out The update to Pie is the first major OS upgrade for the tablet and we expect an update to Android 10 to also be lined up for a future release, probably in Q2 or Q3 2020. Related: Related: Tab A software update news Samsung Galaxy Tab An 8 2019 Eligible for Android 10 update Update may come in Q2 2020 The Galaxy Tab A 8 2019 is eligible for an update to Android 10 thanks to the fact that it has Android Pie out of the box. As for when the Olympics will be released, it's likely to show up in Q2 2020. Related: Galaxy Tab A software update news Note: We will continuously update this post with new/official information about and when they are received.
