

6 ways IoT can help **Industrial** companies

Machine Benchmarking

Energy benchmarking and optimization across – machine clusters and multiple plants

Electrical Health & Safety

Data-driven anomaly detection for critical safety parameters

Real-time Monitoring

Centralized visibility of energy consumption by geographically distributed machines

Advanced Analytics

Cloud-connected centralized platform for advanced analytics

Automated Alerts

Automated alerts in case of any anomaly identification

Digital Ticketing System

Automated ticketing system for issue closures

Machine level
energy optimization

zenatix

Reduction in
Asset Breakdowns
