

HOW IOT IS HELPING DATA CENTERS WORK MORE EFFICIENTLY

Upto

30%

improvement in
temperature
compliance

Upto

25%

reduction in equipment
breakdown

Upto

20%

reduction in energy
cost

Automated Alerts

Automated alerts in case
of any anomaly
identification

Safety and risk management

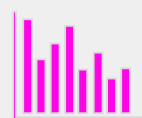

Data-driven anomaly
detection for critical
safety parameters

Energy Management

Energy monitoring and
smart control

Predictive Maintenance and FDD

Predictive alerts to
ensure higher
equipment uptime

Digital Ticketing System

Automated ticketing
system for issue closures

Centralized monitoring

Web-based dashboards
for real-time monitoring
of distributed assets
