Geneva Construction

Construction Costs:

\$318K

Services Provided on this project:

PAVEMENT ANALYSIS
BUDGET DEVELOPMENT
PROGRAM DEVELOPMENT
PHASE II DESIGN SERVICES
PROJECT PROCUREMENT
RESIDENT ENGINEERING SERVICES

Morris completed the pavement analysis and completed a design for the work which included heat scarification, pavement patching and resurfacing for various roadways in the Township. Morris prepared the bid documents and assisted with the project procurement. Once the project was awarded, Morris provided Resident Engineering services for the construction phase. Morris coordinated the contractors work to maintain traffic to local residences and schools. Morris provided inspection services to assure quality compliance. In addition, Morris completed all of the project administration, quantity measurements, pay outs and change orders.
