Campus

Integration Tour and Grade Sync Overview

moodle
McGraw-Hill Campus builds a digital bridge between your school’s Moodle system and McGraw-Hill’s content and assessment tools.
Users login with their Moodle credentials and are given the proper role, user rights and course affiliation in their paired Connect section.
Assignment information and student results are shared by instructors from Connect and recorded in the Moodle course gradebook.
Instructors may click the McGraw-Hill Campus link in the right hand navigation for single sign-on access to a wealth of teaching and learning resources.
Even if they have not adopted a McGraw-Hill text for their course, instructors still have complimentary access to our full library of eBooks and their online resource centers from which to share content with their students.
If the instructor has adopted a McGraw-Hill text for their course, they may click ‘View online resources’ to access the online learning center specific to the textbook in use.

Here instructors may access a variety of teaching and learning materials for use in their course, including test banks, presentation materials, virtual labs and many more.
Click ‘Launch eBook’ on the cover image to access a full, complimentary electronic version of the McGraw-Hill textbook.
The CourseSmart eBook reader provides search capabilities along with note taking and bookmarking.
Click Customize for single sign-on access to McGraw-Hill Create to tailor course content for students specific to course teaching and learning objectives.
Darwin and Evolution

Evolution Accounts for Diversity

What do the many breeds of dogs, the honeycreepers of Hawaii, and a child's antibiotic-resistant ear infection have in common? Evolution! Without evolution—change in a line of descent over time—we wouldn't see such a great variety of living things about us. But aside from its many benefits, evolution also sometimes causes problems for humans.

Some bacteria have evolved to the point that they are resistant to the antibiotics once successfully used to cure the diseases they cause. For example, penicillin originally cured bacterial ear infections within a few days. Unseen, however, were the one or two bacteria with just the right mutation to resist a particular drug. All the descendants of these bacteria were also resistant, causing the antibiotic to be useless as a cure for this type of ear infection. The antibiotic is considered the selective agent because it allowed the resistant bacteria to flourish while killing their relatives.

What was the selective agent for the many breeds of dogs available as pets?iddle cells. The selective agent was the person who chose the dog with the trait (e.g., color, size, color pattern) that the person liked.
The Connect button provides instructors and students one-click access to our best in class online assessment and assignment tool, without having to remember additional usernames and passwords or URLs.
The Connect section homepage provides an easy to use interface for assigning a variety of interactive, customizable assessments and learning tools.
LearnSmart’s super-adaptive technology is proven effective to improve students performance up to one full letter grade.
Ionic bonds
Label the following diagram with the appropriate terms to describe how ionic bonding works.

All Connect questions are mapped to learning objectives and are presented in a variety of interactive formats to engage students.
gradebook sync list

Send this section's assignment scores to your school gradebook to complete your records and for your students to view. Check your roster to see which students are ready to sync!

Any scored assignments that generate Connect gradebook entries may be synced to the Moodle gradebook.
Instructors may easily confirm which scores they have previously synced and if new submissions are ready to be sent to their Moodle gradebook.
Instructors simply check the box for the assignment(s) they wish to sync and select which attempt score type they would like to send to Moodle.
A message will appear confirming the selection(s)
A new gradebook item will be created in the Moodle gradebook the first time the item is synced from Connect. The item name and possible points will be the same as the Connect assignment, and students’ scores will be populated according to the attempt type selected.
