Introduction to Technology empowers students to discover technology through project-based learning, giving them hands-on understanding.

- Engage students with a project-based approach
- Support differentiated instruction with research-based strategies
- Prepare students for TSA competitive events with prep activities embedded throughout
- Build 21st Century and College and Career Readiness skills

Glencoe’s Pre-Engineering Essentials engages students with cost-effective, project-based learning in an interactive environment. The Student Edition contains core concepts, while the practical applications and projects are online. Teachers get easy access to all program assets in one place using Connect™.

- Apply engineering concepts in chapter and unit projects
- Communicate and collaborate with peers on projects and other assignments
- Access your eBook anywhere
- Prepare for competitive events
- Connect Plus™ contains an integrated eBook that allows students to complete their work online while teachers create and manage assignments electronically.

ENGINEERING DESIGN

Grades 9–12

Engineering Design is distinguished by its superb integration of technical graphics with the engineering design process—plus a dynamic online program. The engineering design process integrates critical thinking, teamwork, presentation skills and project-based learning.

- Apply the engineering design process in chapter and unit projects
- Practice problem solving and critical thinking skills
- Communicate and collaborate with peers in the Group Workspace
- Access your eBook anywhere!
- Connect Plus™ contains an integrated eBook that allows students to complete their work online while teachers create and manage assignments electronically.

ENGINEERING CAPSTONE PROJECT

Grades 9–12

Students demonstrate their engineering design skills in real-world contexts in this end-of-course curriculum. Built to teach College & Career Readiness, the Engineering Capstone Project requires students to implement skill sets related to documentation, research, testing and evaluation.

• Use as a year-long program
• Break into projects as independent or group study
• Use as a standalone project
• Combine with existing engineering curriculum

Student Materials
Up to 25 users/school/year, 1-year subscription 978-0-02-135785-7 $337.68
Technology Interactions helps students use technology principles to solve real-life problems as they study the engineering process hands-on to design, build, and evaluate.

- Integrates math, science, reading, and writing
- Includes Materials Science, Energy and Power Technologies, and Forensics modules
- Covers 20 technology careers

WOOD TECHNOLOGY & PROCESSES

Grades 9–PS

Wood Technology & Processes covers basic and advanced woodworking operations with clear instructions, strong graphics, and academic integration in every chapter with math and science features.

- Explore a wide range of woodworking projects: weather station, coat rack, flower tower, photo stand, and many more.

Healthcare Science Technology is a hybrid program featuring a print textbook and over 150 animated procedures online giving students a rich, project-based, hands-on learning experience.

- Plan easier with online classroom management
- Explore up-to-date coverage of medical records
- Ignite classroom learning with animated anatomy activities
- Enhance the lesson with digital flash cards for medical terms
- McGraw-Hill Connect™/Connect Plus™ enables students to take notes, complete assignments, and do homework online, while allowing teachers to digitally create, manage, and assess student assignments on a PPA, iPhone®, or iPod® Touch.
- McGraw-Hill Connect Plus™ has all the features of McGraw-Hill Connect™, plus an integrated ebook.

Electricity/Electronics

Electricity: Principles & Applications
w/ Student Data CD-ROM
Eighth Edition © 2013
Fowler

Great for an Introductory Course
This widely-used text prepares students for entry-level jobs in electronics, electrical trades and related fields. Its level and approach are ideal for both electronics and electricity programs looking for a relatively short, applied book covering DC/AC circuits. Additional chapters on topics such as safety, transformers, motors, instrumentation, and residential wiring are also included. No prior knowledge of electricity is assumed; the only prerequisites are arithmetic and basic algebra. Practical skills are emphasized throughout the text, and supported in the hands-on work provided in the companion Experiments Manual. MultiSim circuit files are provided, on a bound-in CD ROM, for those who want to bring software simulation work into their classes and labs.

Digital Electronics: Principles and Applications
Eighth Edition © 2014
Tokheim

A Perfect Introduction to Digital Electronics
The eighth edition of Digital Electronics: Principles and Applications provides a concise, modern approach to this fascinating subject. It has been written so that a student needs no prior knowledge of electrical theory and principles and at a level that allows students with limited math and reading skills can gain a clear understanding of concepts and application covered in a digital electronics course. The textbook has been noted for its easy-to-read style and colorful illustrations. It is ideal for a wide range of electronics courses, especially programs in which students must learn the essentials and quickly apply them to real job situations.

The eighth edition has been updated, with new coverage of microcontrollers, memory, interfacing, new self-test questions for students, and more. Optional simulation work with Multisim is included in the text and accompanying Experiments Manual, with activity circuit files included on the Online Learning Center.

* Please Call Customer Service for Pricing

Student Edition ........................................ 978-0-07-756762-0 ............... *
Thoroughly Revised and Updated

*Medical Office Procedures* is a text-workbook that introduces and describes the tasks of a medical office assistant’s career; teaches records management, medical communications, and scheduling skills; and describes procedures for preparing patients’ charts and bills. Practice management, electronic health records, and finances are also addressed. Multi-day simulations provide real-world experience with physician dictation. Managerial skills are also included.

Student Edition .......... 978-0-07-786203-9 ............

Ideal for Those Interested in the Healthcare Field

*Electrocardiography for Healthcare Professionals* provides ECG skills training for healthcare students as well as healthcare personnel who are interested in mastering additional skills. The text includes the essential skills needed to perform an ECG, including anatomy of the heart, basic characteristics, equipment, appropriate intervention, and other technical applications, such as Holter monitoring and stress testing. Emphasis throughout the text is placed on troubleshooting.

Student Edition .......... 978-0-07-802067-4 ............

Learn About the Safe Administration of Medications

*Administering Medications: Pharmacology for Healthcare Professionals* teaches the safe administration of medications to healthcare students. This text speaks directly to students and provides them with a practical understanding of the core concepts of medication administration. Each chapter allows students to build a strong knowledge base on how to identify common signs and symptoms of diseases, how to calculate drug dosages, and an understanding of the different drugs used for treatment. The text focuses on the 50 most frequently prescribed drugs for the most common disorders in each of the body systems.

Navigating Legal and Ethical Issues in Healthcare

Law and Ethics for Health Professions explains how to navigate the numerous legal and ethical issues that health care professionals face every day. Topics are based upon real-world scenarios and dilemmas from a variety of health care practitioners. Through the presentation of Learning Outcomes, Key Terms, From the Perspective of, Ethics Issues, Chapter Reviews, Case Studies, Internet Activities, Court Cases, and Video Vignettes, students learn about legal and ethical problems and situations that health care professions currently face. Students also use critical thinking skills to learn how to resolve real-life situations and theoretical scenarios and to decide how legal and ethical issues are relevant to the health care profession in which they will practice.

Understanding Insurance in the Medical Office

The seventh edition of Insurance in the Medical Office: From Patient to Payment emphasizes the medical billing cycle—ten steps that clearly identify all the components needed to successfully manage the medical insurance claims process. Studying this cycle shows how administrative medical assistants must first collect accurate patient information and then be familiar with the rules and guidelines of each health plan in order to submit proper documentation and follow up on payments. Insurance in the Medical Office is specifically targeted to Medical Assisting students and addresses the role they play in contributing to the financial success of the medical office.

Using Computers in the Medical Office

Computers in the Medical Office 8e is the best-selling text for training students using full-featured and current Medisoft Version 17 Patient Billing software. Computers in the Medical Office 8e offers medical office training using current, realistic medical office cases while building transferable computerized medical billing and scheduling skills. Students who complete this course will learn the appropriate terminology and skills to use any patient billing software program with minimal additional training. As students progress through Medisoft, they learn to gather patient information, schedule appointments and enter transactions. The practical, systematic approach is based on real-world medical office activities.

CUSTOM SOLUTIONS

Craft Content to Match Your Vision

One size doesn’t fit all.

You need to deliver programs the way you want, better meet your students’ needs, and create compelling learning solutions to fit your budget.

Now, you can design custom educational solutions—classroom materials, books, digital solutions, and integrated program alternatives.

What Our Customers are Saying

One of my greatest needs and desires has been fulfilled by the creation of a custom-bound Louisiana Fine Arts textbook. Not only does it cover the areas of fine arts textbook. Not only does it cover the areas of fine arts—it includes the connection of the arts to our everyday lives, and extends to architecture, photography, film and television, and video art. This comprehensive book is currently being used in classrooms across our Caddo district and around Louisiana.

- Henry E. Price, Supervisor of Art, Caddo Parish Public Schools, Shreveport, LA
Let Us Build a Solution That Works For You

A customized solution from McGraw-Hill Education ensures you deliver a program containing trusted, research-based content. Partner with our Custom Solutions experts to create student and teacher editions, intervention programs, or supplemental products—delivered as print, digital or both.

Work With Your Representative

With the help of our skilled custom product development team, Custom Solutions lets you build classroom texts, digital solutions, and integrated program alternatives. Get flexible, economical, and dynamic solutions to specifically work for your district school or classroom.

DO IT YOURSELF WITH CREATE™

Your Courses Evolve Over Time. Shouldn’t Your Course Material?

Customize your own high quality, well-designed, full-color textbooks in print or ebook format.

What is McGraw-Hill Education’s Create™

Create™ is a self-service website that allows you to create customized course materials using McGraw-Hill Education’s comprehensive, cross-disciplinary content. You can even access third party content such as readings, articles, cases, and more. Arrange the content you’ve selected to match the scope and sequence of your course. Personalize your book with a cover design and choose the best format for your students – ebook, color print, or black-and-white print. And, when you are done, you’ll receive a PDF review copy in just minutes!

Browse Our Pre-Prepared Collections

Looking for an even faster way to get content that unlocks students’ potential within a given discipline or specialty? Browse through our pre-prepared collections for just the right fit!
Create Your Own Book in Three Simple Steps.

1. **Find**
   Our state-of-the-art search engine allows you to find and use content from:
   - Over 100,000 pages
   - Over 200 primary sources
   - Over 2000 science labs
   - 75+ core titles
   - 450+ supplemental titles

2. **Arrange**
   Match your textbook to your teaching style in minutes. You can:
   - Create and reorder chapters
   - Add section dividers
   - Delete unneeded content
   - Upload your own material

3. **Personalize**
   Make your textbook look polished and professional when you:
   - Select the cover of your choice
   - Add your name school and course information
   - Choose full color or black and white
   - Order it in print or ebook format

Professional Learning Environment

Inspired, right from the start

Get instant access to resources for mastering your K–12 programs with the Professional Learning Environment (PLE). Its easy-to-use tools support professional learning and help teachers meet continuous improvement objectives.

The PLE is currently available via ConnectED for the following programs: connected.mcgraw-hill.com

- McGraw-Hill Wonders
- McGraw-Hill My Math
- Glencoe Math
- iScience
- SRA FLEX Literacy®
- Number Worlds®
- High School Science
- Networks
- Coming soon! Additional professional development programs.

Program Mastery at Your Command

Each online portal leverages your investment in McGraw-Hill Education programs by:

- Ensuring your programs are implemented with fidelity
- Saving money and time on offsite training
- Reducing substitute teaching expenses
- Sustaining professional learning throughout the year
- Interactive modules and media-rich instructional resources promote comprehensive program knowledge.
- Discussion boards make it easy for teachers to collaborate and share within communities and across districts.
- Progress monitoring allows you to track program-specific professional development.
- Certificates of completion provide a pathway to gaining CEU credits.
Quick-Start Professional Development Online Courses

For back-to-school implementation

Quick-Start online courses deliver weekly video-based instruction to support your back-to-school implementation of McGraw-Hill Education programs. They provide:

- Sessions led by program experts
- Exposure to the tools and components teachers use during the first few weeks of program implementation
- A timely, well-organized way to get information

QuickStart online courses are part of your program’s Professional Learning Environment. You can access them through ConnectED. connected.mcgraw-hill.com
Mastery Courses

In-depth knowledge for essential topics

Address key classroom issues and challenges with these affordable professional-level moderated or self-paced online courses.

Use the principles of effective professional learning to create a deep understanding of:

- Rigorous learning standards
- Effective teaching practices for specific content
- Ways to use classroom materials to elevate student results

Mastery courses are available for select programs from McGraw-Hill Education:

ONLINE CUSTOMER SERVICE: MHonline.com Select Customer Service. Select from the menu options on the left side of the screen.

After You Place Your Order
Once you place your order online, by email, phone or fax, you should receive confirmation of your order within 24-48 hours after placing. If you DO NOT receive confirmation of your order within 24-48 hours, inquire with customer service by phone or email.

Shipping and Handling: Shipping and handling charges are additional and determined by weight and distance for United States orders. Shipping and handling will be added to your invoice.

When You Receive Your Order
Upon receipt of your order, please check your shipment carefully. If carton(s) are missing or damaged, please indicate any missing or damaged cartons on the Bill of Lading before you sign it. If there is an error with your order, notify Customer Service within 60 days. Defective goods or incorrectly shipped materials will be replaced at no charge if returned within 60 days. Do not stamp or distribute books or educational materials until you have verified the accuracy of your order. Do not install software until you have verified the accuracy of the order.

When calling or writing to inquire about an order or report a discrepancy, please have the following information available from your invoice or packing slip:
• Sales order number
• Purchase order number
• Invoice number
• ISBN(s) of title(s) in question
• Date of order placement or return
• The total number of cartons received

INTERNATIONAL CUSTOMERS
Many titles in this catalog are not available for international supply or to any destination outside the U.S. (except DoDEA schools). Please consult the international catalogs for titles available for supply outside the United States and Canada. Shipping Method: Order shipments are made using the least expensive, traceable mode, unless otherwise stated by the customer.

Returns: Please see information in “Returns” for details regarding international returns.

ORDERS FROM INDIVIDUALS
Orders from individuals are accepted only with full payment. Check or money order for materials must include applicable taxes and shipping and handling charges. (American Express, MasterCard, and VISA are accepted.)

PAYMENTS AND STATEMENT INQUIRIES
To inquire about payments and billing statements, refer to your invoice(s) or billing statement(s) for the name of your credit analyst and for remittance information.

RETURNS FROM SCHOOLS/DISTRICTS
When returning instructional materials, direct the returns to the address on the packing list or call 1-800-334-7344.

Shipping to McGraw-Hill Education via UPS or common carrier, prepaid, insured, and traceable. Please note: Book postage, library and media rates are NOT traceable. All returns must be accompanied by a copy of the invoice and/or packing slip. McGraw-Hill Education cannot issue credit on items lost in transit to our facilities.

Please include the reason for the return. Customers must report shortages, damaged, or defective products within 60 days of the invoice date. All shipments must meet our returns policy guidelines. McGraw-Hill Education accepts 100% return of its products, without prior written authorization, provided the following conditions are met:
• Products are returned prepaid in new, unmarked, and resalable condition.
• Returns are accompanied by our invoice or invoice information (invoice number, date, account number, ISBN, purchase price). If this information is not provided and we fail to locate the invoice in our files, a credit cannot be issued.
• Returns from domestic customers are received within 12 months of invoice date.
• Out-of-print products can be returned within 90 days following announcement of out of print status.
• Customers must report shortages, damage, or defective products within 60 days of invoice date. Returns: Please refer to your invoice for the appropriate returns address or contact customer service for assistance.
