About This Guide

The lessons for Reading Mastery Signature Edition, Grade 3 provide virtually all the specific information that you need to present them. The purpose of this guide is not to repeat the specific directions that appear in the lessons, but to explain the rationale for the procedures and to provide the kind of information that you will probably need to deal with specific problems.

Introduction

Reading Mastery Signature Edition, Grade 3 is a one-year program containing 140 lessons that are designed to follow Reading Mastery Signature Edition, Grade 2. All levels of Reading Mastery Signature Edition are research-based sequences that have been thoroughly field-tested and revised on the basis of performance of teachers and students.

Following completion of Reading Mastery Signature Edition Grade 3, students may go into a variety of programs. They may continue with structured reading. One such option, which is continuous with the skills and formats of Grade 3, is Reading Mastery Signature Edition, Grade 4.

In any case, the students who complete Grade 3 will have solid decoding skills, a relatively large reading vocabulary, and a good working knowledge of word meanings. The most important attribute students will have, however, is skill in reading to learn. They will be well-practiced in learning new concepts and gleaning new information from texts that they read, rather than from accompanying discussions. Their ability to “read to learn” enables them to engage in a variety of sophisticated projects involving research and reading on a variety of topics.

Many students who fail to become good functional readers have not received the kind of practice and perspectives necessary to develop proficiency in reading to learn. Their reading programs concentrated almost exclusively on stories, simple information passages, and literature.

In contrast, Reading Mastery Signature Edition, Grade 3 provides a very strong focus on the skills needed for students to become proficient at letting a textbook or article “teach” them something that may involve rules and evidence.
For Whom

Reading Mastery Signature Edition, Grade 3 is appropriate for students who have completed Reading Mastery Signature Edition, Grade 2. It also may be used for any student who reads at about beginning third-grade level. The placement test that appears in Appendix A of this guide may be used to determine whether students meet the criteria for placement in Reading Mastery Signature Edition, Grade 3.

Program Components

Teacher Support

The following teacher materials are included in Reading Mastery Signature Edition, Grade 3:

- 2 presentation books provide specific teacher instructions for presenting every activity in the program.
- An Answer Key book contains answer keys for worksheet and textbook responses.
- The Teacher’s Guide provides a complete explanation of the program and how to teach it. Explanations of the program components indicate skills students learn. The guide provides suggestions for teaching critical exercises and for correcting more typical mistakes. The guide also discusses the mastery tests and specifies remedies for students who do not perform acceptably on these tests. The guide’s Appendices include a list of special projects, glossaries, placement test, and reproducible blackline masters used.
in teaching the program. It also contains two blackline masters of family letters to be sent home at the beginning and end of the school year.

- **Activities Across the Curriculum** provides directions and blackline masters for 33 activities that can be used throughout the program to extend and reinforce the skills the students are acquiring.

**Student Materials**

The following student materials are included in *Reading Mastery Signature Edition*, Grade 3:

- **2 textbooks** with 4-color illustrations contain vocabulary lists, stories, and information passages that students read as part of every reading lesson, comprehension items for the stories and the information passages presented in the lessons, and tests 1–14.

- **Worksheets for daily lessons** provide additional comprehension activities, which are coordinated with the textbook stories.

- **Blackline masters** appearing in this guide are to be reproduced for fact-game activities, literature-lesson activities, and other selected reading-related skills.

**Scheduling Lessons**

The program includes daily reading lessons and (starting at lesson 1 and continuing through lesson 140) daily lessons for reading-related skills. The program also includes intermittent project lessons and literature lessons.

Daily reading lessons require 35 to 40 minutes each. They address core reading skills—decoding, comprehension, and skills in “reading to learn.” The anticipated rate is that students complete one lesson per day.

Daily independent-work periods require 30 minutes each. Students need this in-school time to complete the independent work presented in the daily reading lessons.

Daily spelling lessons require 10 minutes each. These lessons should not be scheduled in the 40 minutes allocated for the daily reading lessons. Ideally, they should occur at another time of the school day.

Each project lesson requires 40 to 80 minutes; however, some projects could require even more time. These lessons should not be scheduled as part of the daily reading period, but should occur at other times.

The time required to complete the activities in *Activities Across the Curriculum* varies from approximately 10 minutes to about an hour. These activities should be scheduled outside of the daily reading lesson.

Also, a daily workcheck period of 10 minutes is highly desirable. This time could be scheduled at a time other than the reading period or could be added to the beginning of the reading period (making the reading period 45 to 50 minutes per day).

An efficient scheduling option has a daily 35 to 40-minute period in the morning for presenting the regular reading lesson and a daily 25-minute period in the afternoon a workcheck of the students’ independent work.
The chart below summarizes the time requirements for teaching *Reading Mastery Signature Edition*, Grade 2 effectively:

<table>
<thead>
<tr>
<th>Time needed</th>
<th>Lesson type</th>
<th>How often</th>
</tr>
</thead>
<tbody>
<tr>
<td>40 minutes</td>
<td>Reading lesson</td>
<td>Daily</td>
</tr>
<tr>

</tr>
<tr>
<td>40 to 80 minutes</td>
<td>Literature lesson</td>
<td>Every 10</td>
</tr>
</tbody>
</table>

**Lesson Types**

*Reading Mastery Signature Edition*, Grade 3 has seven lesson types. Some are main lessons, and some are supplemental. The following chart summarizes the lesson types:

Only the main reading lessons are to be presented during the daily 40-minute reading periods. All other lessons are to be presented during some other time of the school day.

**Main Lessons (1–140):**

<table>
<thead>
<tr>
<th>Number</th>
<th>Type</th>
</tr>
</thead>
<tbody>
<tr>
<td>113</td>
<td>Reading lessons (lessons 1–9, 11–14, 16–19, 21–24, etc.)</td>
</tr>
<tr>

<tr>
<td>12</td>
<td>Special project lessons (following every major story sequence).</td>
</tr>
<tr>
<td>33</td>
<td>Activity lessons (from time to time).</td>
</tr>
</tbody>
</table>

**Reading Lessons**

The teaching structures of the 140 numbered reading lessons fall into three types.

1. The first is the **regular reading lesson**, which generally consists of word attack exercises, vocabulary exercises, and one or more selections that students read during the period.

2. The second lesson type consists of a **regular reading lesson, plus a reading checkout**, during which students individually read a 100-word passage from the preceding lesson.

3. The third type of reading lesson is the **test lesson**, which occurs every tenth lesson. The test lesson assesses the students’ performance on both the content presented in the preceding nine lessons, and rate and accuracy in reading a 100-word passage. Students also play a fact game as part of the test lesson. The facts are taken from the preceding nine lessons.

**Special-Project Lessons**

The 12 special-project lessons occur intermittently, usually after students complete a major story sequence in the reading program. The special projects and the necessary materials are listed in Appendix B. The projects include making a dinosaur wall chart, training an animal to do a trick, and completing a scavenger hunt. The work on each project derives from rules and information that students have already mastered in the reading lessons. Some projects may require more than 80 minutes, and may take more than one day to complete. Some projects may require using computers to answer specific questions that are difficult to research through encyclopedias. (Web sites such as Ask.com are able to handle almost any question.) Some projects may be started in class and then completed as homework assignments.
The special projects expand on the unique emphases of each major story sequence. The special projects:
(1) provide students with information that amplifies rules or perspectives presented in main stories; (2) provide experience with cooperative learning; (3) give students an opportunity to work independently at finding information; (4) engage students in activities that reinforce self-expression.

The cycle guarantees that students learn that information applies to different contexts, that information serves as a basis for drawing inferences, and that comprehension and enjoyment of stories increases when inferences are drawn.

**Activity Lessons**

The lessons provide 33 activities, most of which have blackline master student material. Each activity is keyed to a specific lesson range in *Reading Mastery Signature Edition*, Grade 3. The activities cover a range of content areas, including science, social studies, and geography.

Each activity expands on the skills or information presented in the specified lessons of *Reading Mastery Signature Edition*, Grade 3. Each activity specifies the content area being explored, materials required, and the objective.

To use the activity lessons:
- Select the activities that you wish to present and schedule them at a time when the students have completed the targeted lessons in *Reading Mastery Signature Edition*, Grade 3.
- Schedule sufficient time for the activity, but don’t allow so much time that activity work seriously impedes students’ progress through *Reading Mastery Signature Edition*, Grade 3.
- Provide students with copies of blackline masters required for most activities.

**Lesson Events**

The 5-lesson planning pages show the specific lesson events for each lesson. The following chart summarizes the lesson events for the different types of reading lessons—regular lessons, fluency checkout lessons, and test lessons. The events are listed in the order of their occurrence during the lesson. Xs indicate which events occur in lessons. Xs in parentheses indicate that the lesson event does not occur in every lesson. For example, the parentheses around the Xs for **story background passage** indicate that the story background passages do not appear in every lesson; however, when they do appear, they are presented immediately before the main-story reading.

Here is a summary of the events for regular lessons:
- **Oral vocabulary practice**—teacher directed. Students learn and review words and expressions that will be used in later reading selections.
- **Word-attack presentation**—teacher directed. The students read lists of words aloud and do word-meaning activities with some of the words.
Lesson Events | Regular Lesson | Fluency Checkout Lesson | Test Lesson
--- | --- | --- | ---
Oral vocabulary practice | (X) | (X) | 
Word-attack presentation | X | X | 
Story Background passage | (X) | (X) | 
Main-story reading | X | X | 
Paired practice | | | X
Independent work | X | X | 
Workcheck | X | X | 
Individual reading checkout | | X | X
Fact game | | | X
Test of program content | | | X
Fact review | (X) | (X) | 

- **Comprehension passage**—teacher directed. The students orally read a short passage that presents information to be used in later reading activities. The students orally respond to specified tasks about key details of the comprehension passage.

- **Main-story reading**—teacher directed. Main stories are the primary teacher-directed activity in every regular lesson. The students orally read a long selection (between 250 and 950 words) and orally respond to specific comprehension tasks the teacher presents. Beginning with lesson 13, students silently read between 50 and 400 words for each lesson. All main stories have more than one part. Parts are presented on consecutive regular lessons. Some main stories (such as Al and Angela) span more than 10 lessons. The story comprehension items refer to earlier parts as well as the part presented in the current lesson.

- **Paired practice.** This activity is part of each regular lesson. It occurs immediately after the reading of the main story. Students work in pairs and read half of that story to their partner. For paired practice, students are permanently assigned as either the A member or the B member of the pair. On alternate days, the A member reads the first part of the specified passage, and the B member reads the second part.

- **Independent work.** Students write answers to written items relating to (a) the story background passage, (b) the main story, (c) previously taught content, and (d) skills that students have learned (vocabulary words, sequencing, etc.). For typical lessons, some independent work appears on the student worksheet and some in the student textbook.
• **Workcheck**—teacher directed. The teacher (a) checks the students’ independent work and (b) makes sure the students understand and correct the items they missed.

**Fluency Checkout lessons** occur every tenth lesson, starting with lesson 10. Students individually read a passage from the main story that was presented in the preceding lesson. Fluency checkout lessons are designed to give the students practice in meeting rate and accuracy criteria for oral reading.

**Test lessons** occur every tenth lesson, starting with lesson 10. Test lessons consist of items that test students’ comprehension of the new vocabulary, information, rules, and other skills that were presented in the preceding nine lessons. The lessons also present a rate-and-accuracy fluency checkout on a one-hundred-word passage from the preceding lesson.

Students also play a **fact game** in test lessons. These games provide students with practice on important facts presented in the preceding nine lessons.

---

**Grouping the Students**

If the ability level of students in the classroom is fairly homogeneous, *Reading Mastery Signature Edition, Grade 3* may be presented to the entire class. One problem with large entire-class instruction is that the individual students do not receive as many opportunities to read aloud. For this reason, you may decide to place the most able students in one group and the lower performers in another group. All students now receive more practice with supervised reading.

The placement test that appears in Appendix A of this guide may be used to evaluate each student’s entry level. Directions for administering the test and criteria for placing students in the program accompany the test.
Overview of Decoding and Comprehension Emphases

Each lesson in *Reading Mastery Signature Edition*, Grade 3 has two distinct objectives: one is decoding, the other is comprehension. The word-attack presentation deals not only with teaching decoding skills, but also with developing understanding of key words. Similarly, the story background passage and the main story are not simply vehicles for comprehension; important decoding objectives are also met through these activities.

The following outline summarizes the activities involved in the development of decoding rate and accuracy and the development of various comprehension skills. The outline specifies the part of the lesson or the material that develops each subskill.

I. DECODING EMPHASIS

A. **Word-Attack Exercises**
   (presented during the first part of each lesson)
   1. *New hard words* are modeled by the teacher and then decoded by the students.

B. **Main-Story Reading Procedures**
   (presented with the main selection for each lesson)
   1. Students orally read two or three sentences for each turn.
   2. Corrections for decoding errors are provided immediately. The teacher identifies the missed word, and the student rereads the sentence in which the word appears.
   3. Students read the last part of the selection silently (starting in lesson 13).

   **Note:** Procedures 1 and 2 also apply to the story background passage.

2. *Words with similar features* (for example, all end in *S*, all have an ending, or all are compound words) are grouped together in columns and are read by the students.

3. *Unrelated decodable words* (those that have been presented earlier or those that should be decodable by virtue of the students’ skills) are grouped in columns.

B. **Main-Story Reading Procedures**
   (presented with the main selection for each lesson)
   1. Students orally read two or three sentences for each turn.
   2. Corrections for decoding errors are provided immediately. The teacher identifies the missed word, and the student rereads the sentence in which the word appears.
   3. Students read the last part of the selection silently (starting in lesson 13).

   **Note:** Procedures 1 and 2 also apply to the story background passage.
C. **Paired Practice**
Permanently assigned pairs of students orally reread the main story to each other. Partners are to correct each other’s decoding errors.

D. **Fifth-Lesson Individual Fluency Checkouts**
Students individually read a one-hundred-word passage selected from the main story of the preceding lesson and meet a specified rate-accuracy criterion.

II. **COMPREHENSION EMPHASIS**

A. **Vocabulary Model Sentences**
Selected vocabulary words appear in sentences like “He responded to her clever solution.”
1. Students learn what each sentence means and practice saying the sentence.
2. Students respond to tasks about the meaning of specific words.

B. **Word-Attack**
Critical vocabulary items (idioms, phrases, and individual words that will appear in stories or comprehension passages) are pretaught. The teacher tells the meaning of each vocabulary word or models how to use it.

C. **Comprehension-Passage Reading**
(These passages preteach information that will appear in main stories.)

1. As the students read each passage aloud, the teacher presents specified comprehension tasks.
2. The students respond orally.

D. **Main-Story Reading Activities**
1. As the students read the story, the teacher presents specified comprehension tasks. The students respond orally.
2. The teacher presents a variety of tasks requiring recall of information, application of rules, inferences based on specific facts, and inferences based on information about different characters.

E. **Independent-Work Applications**
The students independently write answers to items that appear on the worksheets and in the textbook.
1. Some items relate to the main story that the group read.
2. If the lesson contains a story background passage, some items relate to the information presented in that passage.
3. Some items relate to skills (such as sequencing story events and vocabulary meanings).
4. Review items present information from earlier main stories or story background passages.
F. Daily Workcheck
   1. Independent work is checked.
   2. Students receive same-day feedback on their independent work performance. (They receive information on the correct answers to all items.)

G. Tenth-Lesson Fact Games
   1. The students play a game in which they orally respond to comprehension items.
   2. These comprehension items cover key concepts and facts from earlier lessons. The items are particularly important because they will recur in later lessons.

H. Tenth-Lesson Tests
   Students write answers to items that deal with rules, vocabulary meanings, and information presented in the preceding nine lessons.

The Decoding Emphasis

The decoding emphasis involves a cycle that introduces new decoding words and word families, presents these words in different story contexts, and provides practice in meeting oral reading rate-accuracy criteria. Both the decoding vocabulary and the various decoding-practice activities are coordinated in word-attack presentations, in group story readings, and, finally, in individual fluency checkouts.

Students read selections that are composed entirely of words or decodable elements taught earlier in *Reading Mastery Signature Edition, Grade 3.*

The Cycle for Developing Decoding Skills

The cycle for introducing a decoding word in *Reading Mastery Signature Edition, Grade 3* begins with the word appearing in the word-attack lists on one or more lessons. Then the word appears in reading selections. This development of decoding words ensures that students receive practice in reading words in sentence contexts after these words have been presented in lists.

Word-Attack Presentation

The first decoding activity in every lesson is the word-attack presentation, during which the students read about 5 to 25 words aloud.

- For words that appeared earlier or that are decodable the teacher asks, What word?
- Words that would probably be difficult to read are first modeled by the teacher, then read by the students. Some words are also spelled. For example: Word 1 is actually. What word? Actually. Spell actually. A-C-T-U-A-L-L-Y.
- To show students structural or phonemic similarities of different word families, the teacher presents groups of words that have common features. On page 15 are the word-attack words from lesson 41. Note that the words in columns 3 and 4 have endings, and the words in column 2 are compound words.
• For each word whose meaning may not be familiar to the students, the teacher gives an explanation of the meaning. Below is the teacher presentation script for column 4 of the word-attack exercise.

**Column 4**

- Find column 4. ✔
  - (Teacher reference:)
  
  | 1. mentioned | 4. protection |
  | 2. sternly | 5. unfolded |
  | 3. matching | 6. bakery |

  - All these words have an ending.

- Word 1. What word? (Signal.) Mentioned.
  - When you mention something, you quickly tell about it. Everybody, what’s another way of saying quickly tell?
    (Signal.) Mention.

- Word 2. What word? (Signal.) Sternly.
  - A stern expression is a frowning expression. Here’s a stern expression.
    (Frown.)

  - (Repeat for words 4–6.)

- Let’s read those words again.
  - Word 1. What word? (Signal.) Mentioned.
  - (Repeat for words 2–6.)

- (Repeat step x until firm.)

---

**Main-Story Decoding**

Following the word-attack part of the lesson, the group reads the story background passage and all or part of the main story aloud. As students progress through the program, less of the main story is read aloud. At first, they read only about 50 words silently. Later, they read 400 words or more.

The teacher calls on individual students to take turns, each reading two or three sentences. Every main story has an **error limit** based on two errors per hundred words in the story. If the group exceeds the error limit, the students are to reread the main story until they read within the specified error limit.

The main stories contain recently introduced words. The stories, therefore, provide word-recognition practice with these words. The error limit for the story helps the students develop effective strategies for learning new words: (1) The students quickly learn that words appearing in the word-attack lists will appear in main stories, (2) They learn that if they are to read the stories within the error limits, they should pay attention to these words when they appear in the lists.
Paired-Reading Practice

The purpose of paired reading is to provide students with an opportunity to read a relatively long passage without interruption. Although students receive oral reading practice during the main-story reading, they usually read only two or three sentences at a time, and their reading may be interrupted with comprehension items. The paired-reading practice takes 10 to 12 minutes for each lesson and makes a marked difference in the fluency performance of students.

Fluency: Rate/Accuracy

Every fifth lesson includes a fluency checkout, beginning with lesson 10. Students individually read a one-hundred-word passage to a checker. The purpose of the fluency checkout is to ensure that students are progressing acceptably in oral decoding rate and accuracy. The passage that they read for the checkout is taken from the preceding lesson. To pass the fluency checkout, the student reads the passage in less than a minute and makes no more than two errors.

The Comprehension Emphasis

Reading Mastery Signature Edition, Grade 3 has a comprehension emphasis on the facts and rules that are presented in what the students read. The program also has a vocabulary-building emphasis.

Vocabulary Emphasis

Model sentences are the principal vehicle for expanding students' vocabulary and for introducing words that will be in upcoming selections. In addition to the model sentences, the teacher presents vocabulary information for some words as part of the word-attack exercises.

Model Vocabulary Sentences

The first model sentence is introduced in lesson 3. Others follow about every four lessons. A list of sentences appears in the back of the student textbooks (and Appendix C of this guide). Students refer to this list when learning new sentences.

Each model sentence goes through a seven-step cycle.

1. The sentence is introduced. Students read the sentence. The teacher explains the key words (two to four new words that are in the sentence). Then students answer questions about the key words. For example, for the sentence Scientists do not ignore ordinary things the teacher asks these questions:

   What word means that you don’t pay attention to something?

   What word tells about things that you see all the time?

   What do we call highly trained people who study different things about the world?

2. In the following lesson, students review the model sentence.

3. In the third lesson of the cycle, students review the last three model sentences that had been introduced.
4. Later in that lesson, students do written tasks in which they write answers to questions about the key words.

5. In the next lesson, the teacher says part of the sentence but stops just before a key word. Students say the next word.

6. Later in that lesson, students work with the two most recent sentences, which are presented with key words missing. Students write the complete sentences. (For example, the model sentence would appear as: do not things.)

7. The test in every tenth lesson contains skill items that assess the students’ knowledge of vocabulary words presented in the model sentences that were introduced and sufficiently reviewed during the preceding nine lessons.

**Vocabulary During Word Attack**

The teacher script provides “definitions” for those words that students may not know. These descriptions often show the students how to use the word. There is no attempt to provide students with a variety of meanings of the word, but merely to illustrate the meaning that will be used in the upcoming selection.

Here are some examples:

**Shallow.** Shallow is the opposite of deep. What’s the opposite of a deep bowl? (Signal.) A shallow bowl.

**Practice.** When you practice something, you work at it. What’s another way of saying He worked on throwing a ball? (Signal.) He practiced throwing a ball.

Definitions for all vocabulary words appear in Appendix D of this guide and in a glossary at the end of each textbook.

**Developing Comprehension of Facts, Rules, and Perspectives**

As decoding skills are being developed through the various lesson activities, comprehension skills are also being developed for interpreting and using facts, rules, and information about unique story-character perspectives. The general skills students learn include cause and effect, literal meaning, inferential meaning, main idea, and sequencing of events. The program presents content and practice for these skills.

Here is a summary of the sequence for developing these skills:

1. Information is introduced in a comprehension passage.

2. Within two lessons of the introduction, the information is used in the main story.

3. A variation of the information also appears in the independent-work items.

4. Some of the items are reviewed in subsequent lessons.

5. Information that is particularly important or difficult appears in the fact games or in fact reviews. The game format provides the students with massed practice on a lot of information.

6. The tenth-lesson tests assess students’ understanding of the information.
7. The final step is the integration of recent information with information taught earlier. This integration provides for increasingly complex applications and review. For major story sequences, the integration culminates with a special project, in which students research additional facets of the story theme.

General Comprehension Skills

The comprehension skills that are traditionally presented in developmental reading series stress general skills such as literal comprehension, main idea, fact versus opinion, context clues, and sequencing of events. *Reading Mastery Signature Edition*, Grade 3 is organized so that these skills are taught in a cumulative manner, which means that a particular skill is practiced not merely as a part of a few lessons, but is practiced repeatedly as part of many lessons. This cumulative practice ensures that the students work with the various skills in a variety of story and information contexts.

The table on page 19 summarizes the comprehension skills emphasized in each of the larger story series in *Reading Mastery Signature Edition*, Grade 3. (Each story series listed spans at least three lessons.) The lesson numbers for each series are indicated in the table. If the series strongly emphasizes a particular skill, the skill is marked with a star (*). If the emphasis is not as strong, it is marked with a checkmark (✔).

As the table shows, literal comprehension, cause and effect, supporting evidence, sequencing, context clues, viewpoint, character development, reference–book skills, and information recall activities are part of each story series. In addition to providing practice in these categories of comprehension skills, each story series has at least one strong focus. For example, the series about Leonard (a boy who invents something) presents strong comprehension emphasis on sequencing, context clues, viewpoint, supporting evidence, cause and effect, character development, reference-book skills, and information recall.

Facts, Rules, and Perspectives

The information presented in *Reading Mastery Signature Edition*, Grade 3 covers a very broad range of topics. However, the goal of the program is to develop information so that individual facts are related to other facts in a way that provides students with a fact perspective.

Three major fact perspectives are developed in *Reading Mastery Signature Edition*, Grade 3. These deal with places, with common material in the environment, and with people.

Places

The scheme for developing a perspective for places involves introducing geographic information about different places, teaching about land forms associated with those places, teaching about the animals that live in the places, and providing information on unique details of the place or the things that are observed in the place.

The diagram below shows the organization of material for the place perspective.

**Common Materials**

The perspective for common materials is developed by introducing common material and then presenting facts and rules that explain the way the material behaves. For example, air and water are common materials. The students are introduced to facts and rules that explain how these materials behave in different settings (how air turns into a solid if it is cooled enough; how water exerts great pressure if you are far underwater).

Below is a diagram for the development of the common materials perspective.

The major common-material topics developed in Reading Mastery Signature Edition, Grade 3 are:

- **Water**
- **Clouds**
- **Air**
- **Snowflakes**

**People**

The perspective developed for people proceeds in two different directions. One direction involves character development. For example, information presented about a character is used to predict how that character will behave in a new situation. The other direction involves facts about the body systems of humans and how they work—muscles, bones, heart, and so on.

Below is a list of the major people-perspective topics developed in Reading Mastery Signature Edition, Grade 3.

- **Character**
- **Body systems**
- **Common Materials**
- **Facts and Rules**
- **Character and Rules**
- **Body systems**
Preparing to Teach

This section of the guide provides you with specific, technical information about what you will be teaching and some of the problems students may have with the presentations. The purpose is to provide you with the information and the general cautions you need to guarantee that the students move through the program smoothly.

The guide is a tool that you should refer to throughout the year as part of your preparation for teaching the program.

1. Don’t begin the program until you have studied this section of the guide.

2. Practice presenting the various exercises before you present the first lessons to the students. Don’t simply read them over and assume that you will be able to present them well. Read the script aloud. Present the signals the students are to respond to. Practice saying the corrections. Make sure you can smoothly present any new exercise type that is scheduled for upcoming lessons. During the first part of the program, a fair amount of practice may be required. For later lessons, less preparation is needed.

General Teaching Strategies

When teaching Reading Mastery Signature Edition, Grade 3 you will be engaged in various types of activities.

• You will present model sentences and word-attack exercises.

• You will direct the students in the group reading of comprehension passages and main stories. (As they read, you will present specified oral comprehension tasks.)

• You will monitor students as they do their independent work.

• You will provide a daily workcheck and record the number of errors students make on their independent work.

• For lessons that involve individual fluency checkouts and fact games, you will monitor the fluency checkouts and games.

• You will provide remedies for students who do not pass tenth-lesson tests.

Here is a summary of the general techniques that you will use.

Get into the lesson quickly. No discussions are necessary.

Teach to mastery. Use the following guidelines:

• Repeat tasks if students are not firm.
• Use clear signals. All signals have the same purpose: They trigger a simultaneous response from the group. All signals have the same rationale: If you get the group to respond simultaneously (with no student leading the others) you will receive good information about the performance of the students. At the same time, students will receive more frequent practice than they would using individual responses.

• Reinforce good performance. Make your praise specific. If the students have just completed a difficult word list with no errors tell them what they did: You read without any mistakes. Good for you. Praise students for following the rules you present.

Pace the exercises. Since a great deal of information must be taught during the daily presentation, it is important for you to move quickly, but not to rush the students so much that they make mistakes. To ensure a smoothly paced lesson, you should become familiar with the exercises before presenting them. You must be able to present them without having to refer to the page for every word. Fast pacing is important for the following reasons:

• It reduces the problems of managing students and maintaining on-task behavior. Studies have shown that faster pacing secures more student interest and reduces management problems.

• Fast pacing results in greater student achievement. With faster pacing, a teacher can cover more material in a fixed amount of time and provide more student practice in that time.

• Many tasks become more difficult when they are presented slowly. Slower pacing places greater memory demands on students. Faster pacing, on the other hand, reduces memory load.

Monitor independent work. Intermittently monitor students as they do their independent work. Make sure that students are working at a reasonable rate, but are not looking up answers to items and are not copying.

Using the Teacher-Presentation Scripts
The script for each lesson indicates how to present the structured activities. The lesson is a script that shows what you say, what you do, and what the students’ responses are to be.

What you say appears in blue type:

You say this.

What you do appears in parentheses:

(You do this.)

The responses of the students are in italics:

Students say this.

[Individual student says this.]
Follow the specified wording in the script. While wording variations from the script are not always dangerous, you will be assured of communicating clearly with the students if you follow the script exactly. The wording in the teacher presentation books is succinctly controlled. The tasks are arranged so they focus on important aspects of what the students are to do. Although you may initially feel uncomfortable “reading” from a script, follow the scripts very closely; try to present them as if you’re saying something important to the students. If you do, you’ll soon find that working from a script is not difficult and that students indeed respond well to what you say.

**Conventions**

Samples of the teacher presentation script appear on page 24.

The arrows show the six different things you’ll do that are not spelled out in the script. You’ll signal to make sure that group responses involve all the students. You’ll “firm” critical parts of the exercises. For some exercises, you’ll write things on the board.

**Arrow 1:** Signals for Group Responses

*(Signal.) and *(Tap.)*

Some tasks call for group responses. If students respond together with brisk, unison responses, you receive good information about whether the students are performing correctly. The simplest way to direct students to respond together is to signal or tap in a predictable cadence—just like the cadence in a musical piece. By listening carefully to the responses, you can tell both which students make mistakes and which ones respond late, copying those who responded first. As a result, you are able to correct specific mistakes, maximize the amount of practice, and evaluate the performance of each student.

Arrows labeled 1 on page 24 specify *(Signal.)* for the student responses *thun, thunder,* and taps for the student spelling of *thunder* (a series of responses).

**Using Signals**

To signal the group to respond:

1. Say the task specified in the presentation script.
2. Pause.
3. Clap, or make another auditory signal such as a tap or a finger snap. (An auditory signal is necessary because the students are not looking at you but at the material they are reading.)

Here are procedures for effective signaling:

- Don’t signal while talking. Talk first, then signal.
- Always maintain a time interval of about one second between the last word of the instructions or question and the signal. Signal timing should be consistent so students can respond together.
- Require students to respond together, on signal.
Column 1
a. Find lesson 27 in your textbook. ✔
   • Touch column 1. ✔
   • (Teacher reference:)

1. thunder  4. somehow
2. shallow   5. lightning
3. blinding

• All these words have more than one syllable. The first syllable of each word is underlined.
b. Word 1. What's the first syllable? (Signal.) thun.
   • What's the whole word? (Signal.) Thunder.
   • Spell thunder. Get ready. (Tap for each letter.) T-H-U-N-D-E-R.
   • What's the whole word? (Signal.) Shallow.
   • Spell shallow. Get ready. (Tap for each letter.) S-H-A-L-L-O-W.
   • What's the whole word? (Signal.) Blinding.
   • Spell blinding. Get ready. (Tap for each letter.) B-L-I-N-D-I-N-G.
e. Word 4. What's the first syllable? (Signal.) some.
   • What's the whole word? (Signal.) Somehow.
   • Spell somehow. Get ready. (Tap for each letter.) S-O-M-E-H-O-W.
   • What's the whole word? (Signal.) Lightning.
   • Repeat step e until firm. ❌

Individual Turns ❌
(For columns 1 and 2: Call on individual students, each to read one to three words per turn.)

EXERCISE 1
Vocabulary Review
a. You learned a sentence that tells about the new exhibit.
   • Everybody, say the sentence. Get ready. (Signal.) The new exhibit displayed mysterious fish.

EXERCISE 4
Fact Review
a. Let's review some facts word have learned. First we'll go over the facts together. Then I'll call on individual students to do some facts.
   • Everybody, tell me how much oxygen is on Io. (Pause.) Get ready. (Signal.) None.
   • Tell me how long it takes Io to go all the way around Jupiter. Less than... (Pause.) Get ready. (Signal.) 2 days.
   • Tell me which has more gravity—Jupiter or Io. (Pause.) Get ready. (Signal.) Jupiter.
   • Tell me where you can jump three meters high—on Jupiter or on Io. (Pause.) Get ready. (Signal.) On Io.
   • Repeat step b until firm. ❌

• To correct mistakes of not following the signal, show students exactly what you want them to do:
I'm good at answering the right way.
My turn: Spell thunder. Get ready.

Let's see who can do it just that way:
Your turn. Spell thunder. Get ready.
(Tap for each letter.) T-H-U-N-D-E-R.
• **Do not respond with the students** unless you are trying to work with them on a difficult response. You present only what is in blue. You do not say the answers with the students, and you should not move your lips or give other nonverbal clues about what the answer is.

Signals are very important early in the program. After students have learned the routine, the signals are not as critical because the students will be able to respond on cue with no signal. That will happen, however, only if you consistently present signals with the same predictable timing.

**Arrow 2: Firming**

(Repeat until firm.)

Wherever there’s a signal, there’s a place where students may make mistakes. You correct mistakes as soon as you hear them. A correction may occur during any part of the teacher presentation that calls for students to respond. It may also occur in connection with what students are writing.

• **Mistakes on oral responses** include saying the wrong thing or not responding. To correct: **You say the correct answer; then repeat the task the students missed.** For example:

You learned a sentence about the new exhibit. Everybody, say that sentence. Get ready. (Signal.)

If some students do not respond, respond slowly, or say an incorrect sentence, a mistake has occurred. As soon as you hear a mistake, you **say the correct answer:**

Here’s the sentence about the new exhibit: The new exhibit displayed mysterious fish.

**Repeat the task:**

Everybody, say that sentence. Get ready. (Signal.)

A special correction is needed when correcting mistakes on tasks that teach a series of things. This type of correction is marked with the notation:

(Repeat step _ until firm.)

An example of this kind of task appears on the next page. The bracket shows a section of the presentation that is to be repeated following a mistake.
**EXERCISE 4**

**Fact Review**

a. Let’s review some facts word have learned. First we’ll go over the facts together. Then I’ll call on individual students to do some facts.

b. Everybody, tell me how much oxygen is on Io. (Pause.) Get ready. (Signal.) *None.*

- Tell me how long it takes Io to go all the way around Jupiter. **Less than...** (Pause.) Get ready. (Signal.) **2 days.**

- Tell me which has more gravity—Jupiter or Io. (Pause.) Get ready. (Signal.) **Jupiter.**

- Tell me where you can jump three meters high—on Jupiter or on Io. (Pause.) Get ready. (Signal.) **On Io.**

- (Repeat step b until firm.)

When you “repeat until firm,” you follow these steps:

1. **Correct the mistake.** (Tell the answer and repeat the task that was missed.)

2. **Return to the beginning of the bracketed part and present the entire part.** For example, students miss the third task (Tell me which has more gravity—Jupiter or Io.)

   **You tell the answer:** Jupiter.

   **You repeat the task:** Tell me which has more gravity—Jupiter or Io.

   **You return to the first task in the bracketed part and repeat the entire part:** Let’s go back. Tell me how much oxygen is on Io... etc.

---

**EXERCISE 3**

**Arrow 3: Monitoring Students**

(Observe students and give feedback.)

**EXERCISE 3**

a. Find a lesson 10 on your worksheet. ✔

b. I’m going to say some dates. You’ll write them with commas.

- Item 1: Write the date for the fifth day of August in the year 1968. When you write the date, you start with the month August, then write the number of the day, then a comma, then the number of the year. Write the date August fifth, 1968 (Observe Students and give feedback.)

- (Write on the board.)

**AUGUST 5, 1968**

- (Write on the board.)

The arrows labeled 3 show a checkmark (✔) or the direction (Observe students and give feedback.). These script conventions indicate how you are to monitor student performance. The * is a note to see whether the students have found or touched what you refer to. If you tell them to turn their paper over, or touch column 2, you check to see that they are doing that. Your check requires only a second or two. Monitor the responses of several “average performing” students. If their responses are acceptable, proceed with the presentation. The (Observe students and give feedback.) direction implies a more elaborate response on your part. You sample more students and you give feedback, not only to individual students, but also to the group. Here are the basic rules for what to do and what not to do when you observe and give feedback:

- Circulate to make sure that you can see all of the students’ papers.

- **As soon as students start to work, start observing.** As you observe, make
comments to the whole class. Focus these comments on students who are following directions, working quickly, and working accurately. Wow, a couple of students are almost finished. I haven’t seen one mistake so far.

- When students raise their hands to indicate that they are finished, acknowledge them.
- **If you observe mistakes, do not provide a great deal of individual help.** For example, if the directions tell students to circle the answer and some students underline it, tell them, You didn’t follow the directions for number 4. Read the directions and do what they say.

If there are serious problems with part of the independent work, repeat it during the next reading period. Do not proceed in the program if the students are making a high rate of errors.

**Arrow 4: Board Work**

What you write on the board is indicated in blue display boxes (see page 26). In the sample exercise, you write the date **August 5, 1968.**

**Arrow 5: Script Conventions**

(Repeat for words 2–5.) and (Teacher reference:)

Sometimes teachers lose their place in the teacher presentation script. Teachers also have difficulty keeping track of where the students are supposed to be touching in their textbooks or workbooks. Arrow 5 on page 24 shows one of two script conventions that enable you to more easily track what you and the students are supposed to be doing.

In step g teachers are instructed to “Repeat for words 2–5.” Teachers are to repeat: **Word ___. What word?** (Signal.) Repeat for the remaining words shallow, blinding, somehow, lightning. You don’t have to read the script for those words. So you are able to attend more to what the students are doing. Here is what you would say:

- **g. Let’s read those words again.**
  - Word 1. What word? (Signal.) Thunder.
  - Word 2. What word? (Signal.) Shallow.
  - Word 5. What word? (Signal.) Lightning.

The presentation script provides a teacher reference that shows the students’ material.

- (Teacher reference:)

1. thunder
2. shallow
3. blinding
4. somehow
5. lightning

Refer to the teacher references as you monitor students’ responses to this activity.

By looking at the teacher reference you don’t have to peek at a student’s textbook to see what the next word is. Using teacher references can help free you from the script without straying from the wording the script specifies. For most word lists, you’ll use the
same wording for all words. Once you know the wording (specified for the first word in the list) you can use the teacher reference to follow the same format shown for the first word to direct the other words.

**Arrow 6: Individual Turns**

Individual turns occur routinely as part of a word-attack presentation that has more than one column of words. Several other structured exercise types, such as fact reviews, also call for individual turns.

Think of individual turns as a diagnostic tool that lets you know if the students are firm on the material you just presented to the group. The general procedure for presenting individual turns is to present them only when you think the students are firm on the group tasks.

**Call on a sufficient number of individual students to let you know whether they have mastered the content.** You should not try to give every student a turn on every task, but rather you should sample the group in a way that does not consume a lot of time. If there are 25 students in the group, you might present tasks to 7 students. Of these 7, sample 4 students who may be weak on the material and 3 others. If students in this sample are firm, the others in the group are probably also firm.

---

**Teaching to the Group**

If the group has problems, you’ll correct their mistakes or firm students on the content that has not been mastered. If the group is firm, you’ll speed up the presentation and move on.

To adjust the presentation to the performance of the group, you have to attend to individuals within the group. Although all the students are supposed to have the skills needed to perform well in *Reading Mastery Signature Edition* Grade 3, there will be a range of individual variation.

This range in ability raises a question about whether you should adjust your presentation to the higher performers in the group, those in the middle, or the lower performers. Here are the guidelines:

- **If some students should not really be in the group** (according to their placement-test performance or performance on the lessons), **do not teach to them.** Either place them in a group that is appropriate for their performance level, or try to find a way to give them additional practice outside of the scheduled reading period. (One plan that may work is to have them read to a higher-performing student on a daily basis.)

- **If all students are appropriately placed, teach to the students who tend to be lower but who tend not to be the slowest in the group.** If you teach to the slowest, you may make the presentation tedious for most of the other students, and you will not move through the lessons
as quickly as you should. If you teach to the higher performers, you will make it
difficult for possibly half of the students. However, if you gauge your presentation
to the performance of the lower students, you will provide a little more practice than
the higher students require, but the presentation will not be significantly
slowed for them. The presentation will also be careful enough that the lowest students
in the group will benefit from it about 80 percent of the time. At that level, they will
master the material (even if they need some additional practice).

- **Provide students with very unambiguous models of what you expect them to do.** Do not praise them for sloppy approximations, but also do not lose patience with them. Repeat material until they can perform perfectly. Unless you provide such a model, you’re asking students to improve when they are not exactly sure what constitutes improvement.

- **Expect students to accelerate.** If you place students appropriately, initially teach them to a very hard criterion of performance, and show them what you expect them to do, they will learn faster and faster. Furthermore, they will enjoy learning much more.
This section gives information about teaching each part of the lesson.

**Vocabulary Exercises**

**General Information**

These exercises are the first in the lesson. They focus on model sentences and the meaning of several key words. The activities are oral. The expectation is that the students will perform very well on the exercises. Students should not require much time to respond, and their responses should be correct.

The exercise below is from lesson 39. The exercise introduces the vocabulary sentence: He responded to her clever solution. The key words are respond, clever, and solution. The focus is on the specific meaning used in the vocabulary sentence.

**EXERCISE 1**

**Vocabulary**

a. Find page 352 in your textbook. ✔
   - Touch sentence 9. ✔
   - This is a new vocabulary sentence. It says: He responded to her clever solution. Everybody, say that sentence. Get ready. (Signal.) He responded to her clever solution.
   - Close your eyes and say the sentence. Get ready. (Signal.) He responded to her clever solution.
   - (Repeat until firm.)

b. The **solution** is what she did to solve a problem. What word refers to solving a problem? (Signal.) Solution.

c. **Responded** is another word for reacted. If you respond to something, you react to it.

d. Her solution was **clever**. That means it was very smart.

e. Listen to the sentence again: He responded to her clever solution. Everybody, say that sentence. Get ready. (Signal.) He responded to her clever solution.

f. What word means **reacted**? (Signal.) Responded.
   - What word refers to solving a problem? (Signal.) Solution.
   - What word means **very smart**? (Signal.) Clever.
   - (Repeat step f until firm.)

**Presenting Vocabulary Exercises**

Follow these guidelines when presenting the exercises.

1. Make sure that the students produce good unison responses. Don’t permit droning responses when students say the sentence.

2. Make sure that students are firm in saying the sentence. In step a, you repeat the sentence until firm. For some sentences, students may have to say it three or more times. If students are not firm in saying the sentence, however, they will have problems when the sentence is used in this lesson and reviewed in later lessons.
3. Don’t make repeating the sentence seem like punishment. If you respond to these exercises as fun or challenges that you look forward to, the students will respond the same way. Keep it upbeat and fast moving: Once more. Get ready . . .

4. Make sure students are firm on what the key words mean. In step f, you present questions about the key words. If students are not perfectly firm on all the answers, they’ll have problems later. So don’t be afraid to repeat items that have weak responses. And don’t be afraid to use individual turns for students that produce weak or questionable responses.

5. Use the vocabulary review tasks as an indicator of how well students learn the new material. The review task below is presented in the next lesson. If students do not do well on these reviews, you may need to provide more practice on the exercises that introduce the sentences.

6. Expect student performance to improve if you bring them to mastery in the early lessons. You’ll find that they tend to learn new sentences with less repetition. You can often provide far less practice and maintain a far less strict criterion of performance. Occasionally, students will need firming, but they will tend to learn the sentences much faster than they do at first.

**Word-Attack Exercises**

**General Information**

The words the students are to read during the word-attack portion of the lesson appear in the textbook. The words are in columns, each containing four to seven words.

The main purpose of the word-attack exercises is to teach students the new words that will appear in the stories and information passages they read. For words that students probably understand, there is no work on word meaning. For words that may be unfamiliar to the students, you’ll tell the meaning of the word or show how to use the word in a sentence. The words that have a meaning emphasis are scattered throughout the lists. In the sample from lesson 57 (on the next page), there are three words for which you provide information about meaning. (One is in column 2, one is in column 3, and one is in column 4.)

---

**EXERCISE 2**

**Vocabulary Review**

a. You learned a sentence that tells what they were impressed by.
   - Everybody, say that sentence. Get ready. (Signal.) They were impressed by her large vocabulary.
   - (Repeat until firm.)

b. I’ll say part of the sentence. When I stop, you say the next word. Listen: They were . . . Everybody, what’s the next word? (Signal.) Impressed.

c. Listen: They were impressed by her large . . . Everybody, what’s the next word? (Signal.) Vocabulary.
   - Say the whole sentence. Get ready. (Signal.) They were impressed by her large vocabulary.
### EXERCISE 2

#### Reading Words

**Column 1**

1. demonstrate
2. computer
3. breakfast
4. aisle
5. gravity

- Touch column 1.
- (Teacher reference:)

<table>
<thead>
<tr>
<th>1. demonstrate</th>
<th>4. aisle</th>
</tr>
</thead>
<tbody>
<tr>
<td>2. computer</td>
<td>5. gravity</td>
</tr>
<tr>
<td>3. breakfast</td>
<td></td>
</tr>
</tbody>
</table>

b. Word 1 is **demonstrate**. What word? (Signal.) Demonstrate.

c. Word 2 is **computer**. What word? (Signal.) Computer.

d. Word 3 is **breakfast**. What word? (Signal.) Breakfast.

e. Word 4 is **aisle**. What word? (Signal.) Aisle.

g. Let’s read those words again.

- Word 1. What word? (Signal.) Demonstrate.
- (Repeat for words 2–5.)
- (Repeat step g until firm.)

**Column 2**

1. **tremble**
2. **cabinet**
3. **darkness**
4. **oxygen**
5. **equipment**
6. **keyboard**

- All these words have more than one syllable. The first part of each word is underlined.

  j. Word 1. What’s the underlined part? (Signal.) **trem**.

- What’s the whole word? (Signal.) **Tremble**.

- Spell **tremble**. Get ready. (Tap for each letter.) T-R-E-M-B-L-E.

- Something that trembles shakes a little. What’s another way of saying **The building began to shake**? (Signal.) The building began to tremble.

k. Word 2. What’s the underlined part? (Signal.) cab.
- What’s the whole word? (Signal.) **Cabinet**.

- Spell **cabinet**. Get ready. (Tap for each letter.) C-A-B-I-N-E-T.

l. Word 3. What’s the underlined part? (Signal.) dark.
- What’s the whole word? (Signal.) **Darkness**.

- Spell **darkness**. Get ready. (Tap for each letter.) D-A-R-K-N-E-S-S.

m. Word 4. What’s the underlined part? (Signal.) ox.
- What’s the whole word? (Signal.) **Oxygen**.

- Spell **oxygen**. Get ready. (Tap for each letter.) O-X-Y-G-E-N.

n. Word 5. What’s the underlined part? (Signal.) equip.
- What’s the whole word? (Signal.) **Equipment**.

o. Word 6. What’s the underlined part? (Signal.) key.
- What’s the whole word? (Signal.) **Keyboard**.

p. Let’s read those words again.

- Word 1. What word? (Signal.) Tremble.
- (Repeat for words 2–6.)
- (Repeat step p until firm.)
**Column 3**

r. Find column 3. ✔
   - (Teacher reference:)
      1. palms 4. partly
      2. gaining 5. helmets
      3. guests 6. provided

   - All these words have an ending.
s. Word 1. What word? (Signal.) Palms.
   - The insides of your hands are called palms. Touch the palm of your hand. ✔
t. Word 2. What word? (Signal.) Gaining.
   - (Repeat for words 3–6.)
u. Let's read those words again.
   - Word 1. What word? (Signal.) Palms.
   - (Repeat for words 2–6.)
v. (Repeat step u until firm.)

**Column 4**

w. Find column 4. ✔
   - (Teacher reference:)
      1. survive 3. waist
      2. pressure 4. suit

x. Word 1. What word? (Signal.) Survive.
   - If you survive, you live. If you don’t survive, you die. If you live through an earthquake, you survive the earthquake.
y. Word 2. What word? (Signal.) Pressure.
   - (Repeat for words 3 and 4.)
z. Let’s read those words again.
   - Word 1. What word? (Signal.) Survive.
   - (Repeat for words 2–4.)
a. (Repeat step z until firm.)

**Column 5**

b. Find column 5. ✔
   - (Teacher reference:)
      1. liquid 3. weightless
      2. baggage 4. fastened

   - (Repeat for words 2–4.)

The individual lists have different decoding emphases. In the previous sample, words 1 through 4 in column 1 are difficult to decode. These words are modeled before students read them.

Columns 2 through 5 present decodable words that require no modeling. Column 2 presents multisyllabic words. The first component in each word is underlined. The presentation for these words requires students to attend to the components. (First they read the underlined part of the word; then they read the whole word.) The students also spell some of these words. The words in column 3 have endings. The words in columns 4 and 5 are miscellaneous, decodable words that will appear in the reading selections. For all these words you, (1) indicate the number of the word students are to read; (2) say What word?; (3) then signal. For example, for word 1 you say, Word 1. What word? When you say word 1, students are to touch under the word. When you say, What word? they are to say the word.
The arrangement and focus of the various columns change from one lesson to another. In some lessons, words that have a particular sound feature will be grouped in a column—for instance, words that have the letter combination *ea*. Students spell some words, but never more than four per lesson. Some lists focus on various types of multisyllabic words. Some lists focus on endings. And some lists have no particular focus except that the words will appear in an upcoming reading selection.

The amount of drill and practice that you provide should depend on how well students read selections. If their reading is accurate and fluent (students reading at close to a conversational rate and not generally exceeding the error limit), you can usually go through the word lists very quickly and with very little repetition. If there are some students in the group who are a little weak, give them more individual turns. But do not try to give all students individual turns.

**Presenting Word-Attack Exercises**

**Maintain clear signals.** Use a clap or some other auditory signal to indicate when the students are to respond. Your signal should follow the last word of the task by one second. The timing should always be the same—very rhythmical and predictable.

**Correct signal violations early in the program.** If the students do not respond on signal, tell them what they did or what they should do: *Wait for the signal*, or *You’re late*. Then repeat the task, reinforcing the students if they respond on signal. Once you know that the students are firm, you can relax the corrections on signal violations, but don’t let the students get so sloppy that you can’t clearly hear their responses.

**Correct droning, sing-song responses.** Tell students, *Say it the way you talk*. Model the correct behavior and enforce it. Also, check your pacing and make sure you model responses in a normal speaking voice.

**Confirm all words that are read correctly by the group.** This is important early in the program. For example, immediately after the group reads the word *equator*, say, *Yes, equator*. This practice guards against the possibility that some students misread the word but that you didn’t hear the misreading.

**Correct all word-reading errors immediately.** Even if only one student in the group makes an error, say the correct word.

**Work within a specified time frame.** The word-attack portion of the lesson takes more time on some days than on others. However, even in the longest lessons, *the word-attack portion should not take more than seven or eight minutes.*

**Position yourself so you can observe what students are doing.** If you are working with a large group of students, do not stand in front of the group as you present the word-attack exercises. Instead, walk among the students. When you stand behind them and look over their shoulders, you can see whether they are pointing to the appropriate words, and you can observe their responses better than if you are in front of them.
A good procedure is to focus on six to eight individual students. Stand behind one of them as you present two or three words. Then move behind another one. Select the students that most probably would make mistakes. Observe whether they are:

- pointing to the appropriate words
- saying the correct words
- initiating the response on signal or waiting for others to lead them

**Regular Reading Selections**

*Reading Mastery Signature Edition, Grade 3* presents two types of regular reading selections: main stories and story background passages. Virtually all regular lessons and fluency checkout lessons have a main story. Not all of these lessons have a story background passage. During the first half of the program, a story background passage appears in about half of the regular lessons and fluency checkout lessons. In the second half of the program, story background passages are less frequent, occurring in less than a quarter of the lessons.

A list of story background passages and main stories appears by lesson in Appendix F.

**Story Background Passages**

Story background passages are designed to prepare students for comprehending details of upcoming main stories. If a story contains information that students probably do not know, a story background passage precedes the main story. The story background passage is not as long as the main story, usually between 100 and 200 words. For example, a main story may refer to clouds. Before students read this selection, they read a story background passage that gives them relevant information about clouds.

If a story background passage appears in a lesson, it appears immediately before the reading of the main story. Here’s the story background passage from lesson 21.

**You have read about a big storm cloud. Here are facts about clouds:**

- Clouds are made up of tiny drops of water.
- In clouds that are very high, the water drops are frozen. Here is how those clouds look.
- Some kinds of clouds may bring days of bad weather. These are low, flat clouds that look like bumpy blankets.

The arrows in picture 3 show how the winds move inside a storm cloud. The winds move water drops to the top of the cloud. The drops freeze. When a drop freezes, it becomes a tiny hailstone. The tiny hailstone falls to the bottom of the cloud. At the bottom of the cloud, the tiny hailstone gets covered with more water. Then it goes up again and freezes again. Now the hailstone is a little bigger. It keeps going around and around in the cloud until it gets so heavy that it falls from the cloud. Sometimes it is as big as a baseball. Sometimes it is smaller than a marble.

If you want to see how many times a hailstone has gone to the top of the cloud, break the hailstone in half. You’ll see rings. Each ring shows one trip to the top of the cloud. Count the rings and you’ll know how many times the hailstone went through the cloud. Hailstone A went through the cloud three times. How many times did Hailstone B go through the cloud?
Main Stories

General Information

For main stories a word-decoding error limit is specified. The error limit for all main stories is based on two errors for each 100 words read aloud. The limits are designed so that students won’t become anxious about reading and thus read hesitantly. At the same time, if students perform within the accuracy limits, they are accurately reading 98 out of 100 words.

The procedures for directing the reading of the story are spelled out in detail in the presentation book. Here is the format from lesson 24:

**EXERCISE 4**

**Story Reading**

a. Find part C in your textbook.
   - Everybody, who was Edna Parker’s father? (Signal.) Captain Parker.
   - Had Edna ever been on her father’s ship before? (Signal.) Yes.
   - What was going to be different about this trip? (Call on a student. Idea: Edna could bring a friend along.)

   - Everybody, who was Edna Parker’s father? (Signal.) Captain Parker.
   - Had Edna ever been on her father’s ship before? (Signal.) Yes.
   - What was going to be different about this trip? (Call on a student. Idea: Edna could bring a friend along.)

   This was going to be a great trip for Edna.
   - On other trips, Edna had a problem. She became bored. There was never anything for her to do on the ship after it left the harbor.
   - Sometimes she would sweep up or help with the meals, but most of the time she just sat around and looked over the side of the ship at the swirling water. With Carla along, Edna would have fun.

b. Everybody, touch the title.
   - (Call on a student to read the title.) Edna Parker.
   - Everybody, what’s the title? (Signal.) Edna Parker.
   - This is the first part of a new story. Everybody, who is this story about? (Signal.) Edna Parker.
   - (Call on individual students to read the story, each student reading two or three sentences at a time. Ask the specified questions as the students read.)

   - (Correct errors: Tell the word. Direct the student to reread the sentence.)
   - (If the group makes more than 7 errors, direct the students to reread the story.)

   - What was Edna’s problem on other trips? (Call on a student. Idea: She became bored.)
   - What does that mean, she became bored? (Call on a student. Idea: She didn’t have anything to do.)
   - How did Edna usually spend most of her time on the ship? (Call on a student. Idea: Looking over the side of the ship at the swirling water.)
   - What was Edna’s friend’s name? (Signal.) Carla.
   - Why would Edna have fun with Carla along? (Call on a student. Idea: Because she would have someone to do things with.)
   - There are three dots in the story. What does that mean? (Call on a student. Idea: Part of the story is missing.)

   - Captain Parker was explaining the trip to the two girls. He pointed to a map of Florida and the Atlantic Ocean as he spoke.
   - “We are starting from here,” he said, pointing to the tip of Florida. “We are going to follow this dotted line to an island called Andros Island.”

Edna Parker

Edna Parker was thirteen years old. She had been out on her father’s ship before. But this was the first time that her father, Captain Parker, let Edna bring a friend along.
• Everybody, touch the part of Florida where the dotted line begins. ✔
• That's where the ship is now. Follow the line to Andros Island. ✔
• That's where they will go. Everybody, tell me the direction they will be going. Get ready. (Signal.) East. ✔

Captain Parker continued, “That means we will pass through a place where hundreds of ships have sunk or been lost. It’s called the Bermuda Triangle.”

• Everybody, what’s the name of the dangerous place? (Signal.) The Bermuda Triangle. ✔
• What has happened in the Bermuda Triangle? (Call on a student. Idea: Hundreds of ships have been lost or sunk.) ✔

Captain Parker continued, “Many sailors say the Bermuda Triangle is the most dangerous part of the ocean.”

Carla’s face seemed to drop. • How did Carla feel when her face seemed to drop? (Call on a student. Ideas: Afraid; surprised; worried.) ❌

Everybody, I’ll read what Captain Parker said. You make your face drop when you hear the bad news:

Captain Parker continued, “That means we will pass through a place where hundreds of ships have sunk or been lost. It’s called the Bermuda Triangle.”
Captain Parker continued, “Many sailors say the Bermuda Triangle is the most dangerous part of the ocean.”

(Students’ faces should drop after “. . . the most dangerous part of the ocean.”)

“Hey,” Captain Parker said, and smiled. “Nothing’s going to happen in a big ship like this. We are very safe. And this is not the stormy

• Everybody, did Captain Parker think the trip would be dangerous? (Signal.) No. ❌
• He gave two reasons. What were they? (Call on a student. Idea: The ship was big and it wasn’t the stormy season.) ✔

Carla asked, “Why is the Bermuda Triangle such a dangerous part of the ocean?”
“Bad seas,” the captain answered. “There are huge waves and storms that come up without any warning. And there are whirlpools.”

• What kinds of things do you find when the seas get bad in the Bermuda Triangle area? (Call on a student. Ideas: Huge waves; unexpected storms; whirlpools.) ✔

Edna said, “You know what whirlpools are, don’t you, Carla?”
“I think I know what they are,” Carla replied.

Captain Parker said, “Let me explain. Did you ever watch water that was going down the drain? Sometimes it spins around and around and it makes the shape of an ice cream cone.”
“I’ve seen those,” Carla replied. “They suck water right down the drain.”
“Yes,” Captain Parker said. “Those are tiny whirlpools. The kind of whirlpools that you find in the Bermuda Triangle are just like those, except they are big enough to suck a ship down.”
“Wow,” Carla said.
• Read the rest of the story to yourself. Find out three things. Find out how far it is from Florida to Andros Island. Find out how long the trip will take. Find out what the girls should stay away from. Raise your hand when you’re finished.

Edna was trying to imagine a huge whirlpool.
Captain Parker said, “Well, girls, Andros Island is only 120 miles from here, so we should arrive there in less than a day. We should have a smooth trip. The weather looks good. I am going to look over some maps now. You girls may play on deck, but stay away from the sides of the ship. And stay away from the lifeboats.”
“All right, Dad,” Edna said, and the girls rushed onto the deck.

• (After all students have raised their hand:) Everybody, how far is it from Florida to Andros Island? (Signal.) 120 miles. 
• Everybody, how long will it take the ship to get there? (Signal.) Less than a day.  
• Name one thing the girls should stay away from. (Call on a student. Ideas: The sides of the ship; the lifeboats.)  
• Name something else the girls should stay away from. (Call on a student. Ideas: The lifeboats; the sides of the ship.)  
• I sure hope those girls follow the rules.

• The picture shows Captain Parker’s ship. The girls and Captain Parker were in the map room during this story. Everybody, touch the map room.  
• At the end of the story, the girls ran out on the deck. Everybody, touch the main deck.  
• Touch a lifeboat.  

Overview of Story-Reading Procedures
The story-reading procedures change throughout the program. Here is a summary of the procedures.

Lessons 1–12: Students read the entire story aloud. You call on individual students, each to read two or three sentences. You present the specified comprehension items.

Lessons 13–140: Students read most of the story aloud. They do not read the last part of the story, however. You present the specified comprehension items. Then students read the end of the story to themselves, and you present comprehension items for that part.

Presenting Reading of Comprehension Passage and Main Story
Here are procedures for effectively directing the group reading of story background passages and main stories:

Make sure you receive a good sample of each student’s reading behavior. For groups that have over 15 students, you may not receive adequate feedback about the performance of some students. The simplest remedy is to observe students reading individually during paired practice.

Make sure that students follow along as others are reading. Students are to point to the words that are being read. Pointing is a
behavioral indication that those students who are not reading aloud are reading silently. Think of the pointing behavior as a way of maximizing practice. By pointing, the students practice reading throughout the group reading. If they don’t point, they may practice only when they are reading aloud—a very scant amount of practice.

To ensure that students follow along, establish the procedure that students lose their turn if they don’t have their place when they’re called on. If the group is large (over 15), circulate among the students and observe them from behind.

**Decoding Errors in Main Stories**

Each main story has an error limit. If students are placed appropriately, the group should regularly read within the error limit.

Follow these guidelines for dealing with decoding errors:

- **Remind students of the error limit for the story and tell them how they are doing.** Remember, we aren’t going to make more than ten errors, so read carefully. Reinforce accurate reading: Good job. You’re reading very carefully. Warn the students if they tend to make careless mistakes: The group has already made seven errors, so be careful.

- If the students read within the error limit, congratulate them for doing a good job. Remind them that it is very hard: That was a tough story and this group read it making only ___ errors. That’s pretty good.

- If the students do not read within the error limit, (1) they are to reread the story, and (2) you will ask no questions during this rereading. Try to schedule the rereading as soon as possible. If there is time in the period, start the rereading immediately. Typically, however, the rereading will have to be scheduled during the next reading lesson.

**Tally each error and give immediate feedback.** Here is a list of common decoding errors:

- **Omitting an ending.** Saying “look” for **looked** is an error. Saying “run” for **runs** is an error.

- **Saying the wrong word.** Saying “a” for **the** is an error. Saying “what” for **that** is an error.

- **Repeated self-corrections.** A self-correction occurs when a student says the wrong word and then rereads the word correctly before you correct the student. If a student responds with the correct word after some signal has been given that the initial reading was wrong, count the self-correction as an error. If a student does a lot of self-correcting, count all self-corrections as errors. However, if the group makes only occasional self-corrections (no more than 1–3 per story), do not count them as errors.

- **Word omissions or insertions.** If a student reads They went with the boys from town, as “They went with the boys from the
town,” count the inserted word as an error. If a student reads the sentence as, “They went with boys from town,” the omitted word should be counted as an error.

- **Repeated line skipping.** Like self-corrections, occasional line-skipping should not be treated as an error; simply tell the student to move up to the appropriate line and reread the entire sentence. However, if line-skipping occurs frequently, count each occurrence as one error.

- **Repeated partial readings.** If a student usually reads sentences in this manner: “They went with went with the boys from town,” count one error. Occasional rereadings to fix the phrasing of the sentence are acceptable. Chronic rereadings, however, should be treated as errors.

- **Repeated word-part or syllable reading.** If a student usually pronounces longer words a part at a time before saying the word, the student is making decoding errors. Count each chronic occurrence of word-part or syllable reading as one error. For example, if the student reads “Ma— -manu— -manufac— -manufacture,” count one error. Remember, the number of decoding errors will drop if you:
  - give the students feedback on how they are doing.
  - make sure that you are not letting errors pass.
  - respond immediately to mistakes.

### Correcting Decoding Errors During Selection Reading

There is only one procedure for correcting decoding errors during selection reading:

1. Stop the reader as soon as you hear the error.
2. Indicate whether the reader skipped a line, reread a word, omitted a word, or misread a word. For misread words, say the word and ask the student to repeat it: That word is _____. What word?
3. Direct the student to read the sentence from the beginning: Go back to the beginning of that sentence and read it again.

The last step is particularly important. The only way you know whether the correction was effectively communicated is that the student correctly reads the sentence in which the mistake occurred.

### Recording Performance

The reproducible group summary chart that appears in Appendix H is designed for keeping track of:

- the group’s performance on the reading of the main story;
- the performance of individual students on their five-lesson reading checkouts;
- students’ tenth-lesson test performance;
- students’ independent work.

Each chart covers a ten-lesson span. The sample chart on the next page has been partially filled in for lessons 41 to 50.

The top of the chart provides the summary information for the group. You record the number of errors the group made in reading each main story. If the group exceeds the error limit, you circle the number. The 16 for lesson 45 is circled because the error limit for lesson 45 is 15.

**Presenting Comprehension Activities**

The presentation script for each main story and story background passage indicates the comprehension items you are to present.

Present items specified during the reading. Story background passages and main stories are read once. The text indicates both the items that are to be presented and when they are to be presented.

The teacher presentation book shows the material that the students are reading.

Excerpts from the student text appear in boldface type that is over a screen.

The following sample is from lesson 29. The boldface text in the screened boxes is the story the students read. The items below the boxes refer to the text immediately above them. The students read, “The size of the footprints told Edna something about the size of the animal.” You say, What would you know about the size of an animal that had footprints a yard long?

For some illustrations, the illustrations are reproduced in the script, and items immediately follow the illustration. In the sample, the script shows an illustration followed by the item, Everybody, touch the groove in the picture.
EXERCISE 3

Story Reading

a. Find part B in your textbook. ✔
   - The error limit for group reading is 12 errors. Read carefully.

b. Everybody, touch the title. ✔
   - (Call on a student to read the title.)
   - Everybody, what’s the title? (Signal.) [Footprints.]
   - (Call on individual students to read the story, each student reading two or three sentences at a time. Ask the specified questions as the students read.)
   - (Correct errors: Tell the word. Direct the student to reread the sentence.)
   - (If the group makes more than 12 errors, direct the students to reread the story.)

Footprints

There was a row of footprints in the red sand. The footprints of the animal were a yard long. Each footprint had three toes. The size of the footprints told Edna something about the size of the animal.

- What would you know about the size of an animal that had footprints a yard long? (Call on a student. Idea: It would be a big animal.)

The footprints made very deep dents in the sand. These deep dents told Edna something about how much the animal weighed.

- What could the deep dents tell you? (Call on a student. Idea: The animal weighed a lot.)

- Everybody, which would make deeper dents, an animal that weighed one hundred pounds or an animal that weighed one thousand pounds? (Signal.) An animal that weighed one thousand pounds.

- Between the footprints was a deep groove in the sand. Carla asked, “What could make that deep trail?”

Suddenly Edna shouted, “A tail. I’ll bet a tail did that. That animal is walking on its hind legs. It’s dragging a heavy tail behind it. The tail makes the groove in the sand.”

For a while, the girls walked around the footprints and didn’t say anything. Then they looked toward the jungle. The animal had left a huge path through the jungle. On either side of this path were thick vines and trees. But the path was almost clear. It looked as if somebody had driven a truck through the jungle and knocked down all the small trees and vines.

- Everybody, touch the path that goes into the jungle in the picture on page 143. ✔

- Can you see any trees that were knocked over when that animal went through the jungle? (Signal.) Yes.

Edna said, “I don’t think we should go into that jungle.”

“Yeah, we shouldn’t do it,” Carla said. The girls were silent for a few moments. They just stood there and looked at the great path that led into the jungle. Then Carla said, “But we could follow that path for a little way. We don’t have to go too far.”

- Do you think they’ll follow that path? (Call on individual students. Student preference.)
“I don’t want to go in there,” Edna said. But she wasn’t telling Carla the truth. Part of her was frightened and wanted to run away. But part of her wanted to see what made those huge footprints. Her mind made pictures of that animal. In one of the pictures, the animal was chasing Carla and Edna. Edna was running as fast as she could, but the animal was getting closer and closer and . . .

• Edna stopped right in the middle of this thought. Let’s find out why.

“Come on,” Carla said. “Let’s go just a little way.”

• Why did Edna stop imagining what the animal was like? (Call on a student. Idea: Carla started talking.)

Now another part of Edna’s mind was taking over. It wanted to see that animal. This part of Edna’s mind was not terribly frightened. It made up pictures of Carla and Edna sneaking up on the animal. In these pictures, the animal did not see Edna and Carla. “This animal is not very smart,” Edna said to herself. “If it was a smart animal, it would have found us last night. Maybe it does not have a good sense of smell. Maybe it has poor eyes.”

• Why didn’t Edna think the animal was very smart? (Call on a student. Idea: Because it didn’t find them last night.)

• What two things did Edna think might be wrong with the animal? (Call on a student. Idea: It might have poor eyesight or a poor sense of smell.)

• She thought the animal might have poor eyes. What does that mean? (Call on a student. Idea: It could not see very well.)

“Okay, let’s follow the path,” Edna said to Carla. “But just a little way.” Carla picked up a short, heavy branch. She practiced swinging it like a club. Edna picked up a branch too. They were easy to find in the path made by the animal.

• Why were they easy to find? (Call on a student. Idea: The animal knocked branches off the trees.)

• What do you think they planned to do with the clubs? (Call on a student. Idea: Protect themselves.)

So the girls started down the path into the jungle. They walked very slowly and carefully. They jumped each time a screech or a roar came from the jungle. They tried not to step on small branches that would make a cracking sound.

• Why? (Call on a student. Idea: So the animal wouldn’t hear them.)

Slowly, they moved farther into the jungle. Soon, Edna could not see the beach behind her. The trees over them blocked out the light.

“This is far enough,” Edna said after she realized that the girls had gone over a hundred meters into the jungle.

“Shhh,” Carla said, and pointed straight ahead. Edna could see a clearing. In the middle of it was a small pond. From the pond, steam rose into the air. The girls moved forward. Now Edna could see a small stream flowing into the pond. And she saw tall grass.
• What things did Edna see in the clearing? (Call on a student. Ideas: A pond with steam rising from it; a stream; tall grass.)

• The picture shows the clearing. There are no trees in the clearing. Everybody, touch the pond. ✔ VA

• Touch the steam that is rising into the air. ✔ VA

• Touch the stream. ✔ VA

• Touch the tall grass. ✔ VA

• Read the rest of the story to yourself. I’m not going to tell you things to read for. So read it very carefully and be ready to answer some questions. Raise your hand when you’re finished.

When the girls reached the edge of the clearing, Edna stopped. She noticed that the trees were very strange. She looked at a small tree on the edge of the clearing. “I saw a picture of a tree like this somewhere,” she said. “But I can’t remember where.” She tried to remember. Suddenly, she did. And when she remembered, she wanted to run from the jungle as fast as she could. She had seen a picture of that tree in a book on dinosaurs. She had looked at the picture in the book many times. And she clearly remembered the tree. It was in a picture that showed Tyrannosaurus fighting with Triceratops.

Edna looked at the tree and remembered the huge footprints. “Oh no,” she said aloud.

• (After all students have raised their hand:) Edna saw something next to the path that she recognized from a picture in a book. Everybody, what was that? (Signal.) A tree. RD

• What else was in the picture that showed the tree? (Call on a student. Ideas: Dinosaurs; Tyrannosaurus fighting with Triceratops.) RD

• When Edna remembered the picture, she thought of the footprints on the beach. Then she said, “Oh no,” aloud. She had figured out something. What was that? (Call on a student. Idea: Dinosaurs were on the island.) OD

Do not become sidetracked into long discussions. Certainly you may present additional tasks; however, these should be infrequent. For example, if the students have had problems with a particular name or concept, it’s all right to add a task even though the script does not indicate an item. If a specified task asks for student opinions, do not poll the entire group. A couple of quick responses will suffice.

Use the wording indicated in the script. Tasks that begin with the word everybody call for a group, unison response. Tasks that say Call on a student are to be presented to a single student. Tasks that are followed by Call on individual students call for a range of responses. In some cases, the task will call for an opinion, such as: What do you think will happen? In other cases, the students are asked to name items that fall into a particular category: Name some animals that are warmblooded.

Accept appropriate ideas for tasks that are answered by an individual. The appropriate response for the second task in the sample (What could the deep dents tell you?) is expressed as an idea. (Idea: The animal weighed a lot.) An appropriate response is one that clearly expresses this idea, regardless of the specific words used in the response—it was heavy. Present a follow-up task if the response is not sufficiently specific. For example, if a student
responds “how much it weighs,” you would say, If an animal made deep dents, would it weigh a lot or not very much?

Reducing Comprehension Errors

If the students make a mistake on an oral comprehension task, correct the error, mark the task, and tell them: I’m going to ask that question later. So remember the answer. At the end of the story, present any marked tasks. If an individual turn was missed, present the task to an individual (not necessarily the same one who missed the task).

Correcting Comprehension Errors During Selection Reading

You will correct two types of tasks: tasks in which students have just read the passage that answers the questions and tasks in which the information was presented earlier.

For each type of correction, you will follow this general pattern:

1. Make sure students have the information they need to answer the question.

2. Repeat the task.

3. Repeat the task again at a later time. For different item types, there are corresponding variations of this correction.

   • If the passage the students just read answers the question, reread the passage or summarize the content before repeating the task the students missed.

   • If the passage students just read does not answer the question, you will tell the students the information they need to answer the question before you repeat the task.

   • If the passage does not give the answer and if further facts will not clarify the answer, you tell them the answer, then repeat the task.

When information is presented in the passage students just read, you make sure they have the information they need either by rereading the passage or by telling them the relevant information. Sometimes, you’ll be able to give them the information they need by asking them a series of questions. If you can’t think of good questions to ask, however, you can simply tell them the information they need.

Example: Why didn’t Edna think the animal was very smart? A student responds, “He has a small brain.”

1. Repeat the part that answers the question: Listen to that part again: “This animal is not very smart,” Edna said to herself. “If it was a smart animal, it would have found us last night.”

2. Repeat the task: Why didn’t Edna think the animal was very smart?

3. Give the correct answer, if necessary: If the student doesn’t respond appropriately, say, It would have found them the night before.

4. Remind the students that you’ll repeat the task at a later time: Remember that answer. I’m going to ask the question later. At a later time, repeat the question.

When not all information is presented in the passage students just read, you provide students with the information they need.
Here’s the correction for a mistake from lesson 29.

Example: What would you know about the size of an animal that had footprints a yard long?

1. **Present an easier version of the question:** What kind of animal would have footprints a yard long, a big animal or a small animal?
2. **Repeat the task:** What would you know about the size of an animal that had footprints a yard long?
3. **Give the correct answer, if necessary:** It’s a really big animal.
4. **Repeat the task at a later time.**

At the end of the period, or at another time the group members are present (after recess, just before lunch, etc.) ask the students questions they missed. Remember to give them enough story information for them to answer the question.

**When additional facts do not clarify the answer:**
1. **Tell students the answer.**
2. **Repeat the task.**
3. **Repeat the task at a later time.**

Note that these items usually ask “Why?” or require students to make a judgment or draw a conclusion. Here’s another example from lesson 29: Why were they (branches) easy to find? A student responds, “I don’t know.”

Here’s the correction:

1. **Tell the student the answer:** Because the animal had knocked branches off the trees.
2. **Repeat the original task:** Why were they easy to find?
3. **Remind the students that you’ll repeat the task at a later time.**

**Correcting Errors on Picture Tasks**

Some picture tasks require students to touch an illustration or operate on it in some way. The task may be, **Touch that path,** or **Touch the steam rising from the pond.** These tasks are presented to the group, but are not accompanied by a signal to respond. Responses are incorrect if students:

- copy responses produced by a neighbor
- touch the wrong object
- fail to respond
- give ambiguous responses

To correct picture mistakes, show the students the right response. If possible, repeat the task later.

Example: The picture (seen on the next page) shows geese flying in a V, with dark blue air showing air that’s standing still and light blue air showing air that’s moving in the same direction as the flock. The task is: **Hold your finger on your book and point to show the direction the light blue air is moving.** The mistake: A student points in a vague manner above the page. The correction: **Put your finger right on the page. Now point to show the direction the light blue air is moving.** Do not accept ambiguous responses.
Some picture tasks require students to observe details of pictures and produce **verbal** responses about these details. Treat these verbal responses the same way you would treat responses to a written question. The picture answers the question you ask, so you would tell students the answer, repeat the task, and possibly repeat it later (although it may be difficult to do this without the book).

Here’s an example from lesson 78.

What kind of animal is at the top of the pyramid? **Parrot.**

Correction:
1. **You tell the answer:** It’s a pigeon.
2. **You repeat the task:** What kind of animal is at the top of the pyramid?
3. **Later you can ask students a question that is like the one you presented.**

### Paired Practice

#### General Information

Following the main-story reading, students work in pairs and reread the story with each student reading half of the story. Students are permanently assigned. Partners are to sit next to each other. They can either read from the same text or from two texts. Allow 10 to 12 minutes for paired practice.

#### Possible Problems

Here are the more common problems teachers encounter when implementing paired-practice procedures:

1. Students take too long to get started.
2. Students take too long to complete the reading.
3. Students become lax about following along when they are not reading and therefore do not respond to the partner’s errors.
For problem 1: The simplest way to get students into reading faster is to have a structured beginning. One good plan is to require some sort of response for the pair—such as both partners sitting next to each other with books in place and raising their hands. They are not to start reading until you acknowledge that they have raised their hands.

It’s time for paired practice. Raise your hand when you and your partner are ready.

Acknowledge each pair and tell them to start.

Praise students who start quickly, That was a good start. Almost all the teams are ready to read.

If some partners consistently take more than a few seconds to get ready for the paired practice, reassign the members of the team, or place a stronger contingency on getting started on time.

For problem 2: Set up a reinforcing contingency for completing the reading in a reasonable amount of time. If students often take 15 minutes to complete the reading, set the time limit at 14 minutes and give students who perform within this time limit praise and possibly some other reinforcer. After students consistently read within 14 minutes, change the time limit to 13 minutes, and so on.

For problem 3: Monitor the students as they read and have students report on their partner’s errors. If students are not catching errors their partners make, require the checker to write the number of errors the partner made.

At the end of the paired practice, record a quick summary:

A team, raise your hand if your partner made no errors.

Raise your hand if your partner made 1 or 2 errors.

Raise your hand if your partner made more than two errors.

Summarize the results on the board. Then conclude, Well, it looks like the B team won today, but not by much. We’ll see who wins next time.

The system works because the students want their team to win. If students miss their partner’s errors, however, the partner’s team gets an advantage.

**Independent Work**

**General Information**

As part of every lesson, the students work independently for about 20 to 30 minutes, completing all the textbook items specified for that lesson as well as completing side 1 and side 2 of that lesson’s worksheet.

Here are the types of items students work:

- Items based on the comprehension passage read that day (only on lessons that have a comprehension passage);
- Items based on the main story in the lesson;
- Skill items (sequencing, vocabulary review, crossword puzzles, etc.);
• Review items based on information from earlier lessons (either from comprehension passages or main stories).

**Early Preparation**

During the first part of the program, the teacher reads the items.

• Lessons 1–3. The teacher reads all independent work items aloud. After reading each item, the teacher calls on a student to answer the item. The teacher corrects mistakes and repeats items that students miss.

• Lessons 4–5. After the main story, individual students orally read and answer the items for the story background passage and the main story. The teacher reads review items and introduces new types of skill items.

• Lessons 6–9. After the main story, individual students orally read and answer the items for the story background passage and the main story.

• Lessons 11–14. After the main story, students orally read the items for the story background passage and main story. The teacher continues to introduce new types of skill items.

• Lessons 15–16. After the main story, students orally read only the main story items. The teacher continues to introduce new types of skill items.

• Lessons 17–140. As a rule some items appear in the textbook and some on the worksheets. The teacher does not read items, with the exception of specific skill items. When new types of skill items are introduced, the teacher goes over them with the students.

**Observe Students as They Work Independently**

Plan to observe the group at work on the independent-work activities every few lessons, especially during the first 20 lessons.

Identify specific problems students have. Make sure they are on task and are not copying from each other. Serious problems should be corrected immediately.

Is the student reading items correctly?

As part of answering correctly, students must read items correctly. Often it is possible to infer how a student misread an item from the response. For example, an item reads, “Why did Edna stop imagining what the animal was like?” The student answers, “Yes.” Inference: The student read the item as “Did Edna stop imagining what the animal was like?” Tell the student: I don’t think you read that item carefully. Read it again.

Note: As a rule, you shouldn’t help a student more than once during a lesson. The more you help, the less information you have about what a student actually knows, and the more the student will rely on you for help.

Is the student working at a reasonable rate?

Students who are just learning how to work independently often don’t use their time well. They need feedback about how much time has passed and how they are performing.
A good tactic is to remind the students about their rate of performance. As you observe individual students, make positive comments to the group about individual students’ rates: Oh, here’s somebody who’s already finished the workbook items. Very good . . . Here’s somebody else who is almost that far along. Fantastic.

If the students tend to go slowly, make sure you give students feedback about how they are doing as they work. For example, after they have worked for about fifteen minutes, remind them that they should have finished about half the independent work assignment.

Help students who get “stuck” on a particular item. They may not have a strategy for completing the exercises and then returning to problem items. Explain the strategy of (1) circling the number of a problem item, (2) skipping that item and working all non-problem items, and (3) returning to the problem (circled) item.

Are the answers to items correct? Refer to the answer key. If the answer a student wrote is not correct, tell the student something like: Your answer to item 5 is not correct. You should not tell the student the answer, and usually you should not provide more than one of these prompts to each student per lesson.

Answers that are obviously correct present no problem. But you may have questions about answers that have grammatical errors, that do not correspond precisely to the answer given in the answer key, or that contain misspelled words.

Some of the answers in the key are labeled “Idea.” This designation means that the student’s response must give a correct answer; however, the students are not required to use the exact words that appear in the key. The reason these items are shown as having “idea” answers is that there are different ways of expressing the answer, and all answers that express the idea are equally correct.

Here’s an item with some responses that students wrote. Item: Why wouldn’t Edna be bored on this trip?

In the selection, Edna’s friend Carla is coming on the trip with her.

Below is the answer key for this item:

3. Why wouldn’t Edna be bored on this trip?
   Idea: Her friend Carla was along.

Below are responses students wrote. Some of these answers are clearly correct or incorrect. Others present problems. You can test the items by asking yourself, Do I know what the student is trying to say? Did the student use enough words to really say that? Can I overlook any wording misuse and still judge that the student expressed the idea?

1. Because Carla wouldn’t make her boring. Clearly, the student means that Carla’s presence would keep Edna’s trip from being boring. The answer probably expresses the right idea.

2. She’d play with her friend. This answer has no problems. It clearly expresses the idea and uses adequate wording.
3. *Her friend.* The answer is wrong. It does not answer the question: Why wouldn’t Edna be bored on this trip?

4. *She’d play.* The answer is clearly wrong. She could play on any of the trips; what’s different about this trip is that she’ll have someone to play with.

5. *Carla.* The answer may be correct but like some of the others above, it is incomplete. Something about Carla prevented the trip from being boring. *(Carla was with Edna.)*

6. *She was there.* The answer is clearly wrong. To be correct, it would have to say something like, “They were there.” In other words, they were together. With no more information than “she was there,” however, we don’t know who the *she* was or if there was more than one *she.*

7. *It was a long trip.* The answer is clearly wrong. The trip is the same length whether or not Carla is there. The trip would seem longer if Carla was not there, because it would be boring. But that idea is not implied by the student’s response.

**Do students spell the words correctly?**

Here are some rules about spelling errors for words that are not spelling words:

1. If the word appears in the item, it should be spelled correctly in the answer.

2. If the word does not appear in the item, it will not be counted wrong if it is spelled incorrectly.

If *earthquake* is a spelling word, the students could be held accountable for it. However, don’t try to identify every spelling word students should know.

Spot-check items as you monitor the students. If you notice spelling words that are misspelled, mark them, but focus primarily on the words in the item. If the answers have words that appear in the item, the words should be spelled correctly.

**Are the answers to how and why questions expressed appropriately?** Some students do not write appropriate answers to these questions. For instance, the item, “Why did he go to the library?” is appropriately answered, “To get a book,” or “Because he wanted a book,” or “He wanted a book.” Some students, however, may write, “A book.” That answer is unacceptable.

To correct this type of response, present items orally. Then direct students to write appropriate answers.

Note that when students answer the questions orally, they tend to answer them correctly. For example:

- Listen: Why did he go to the library?
  - To get a book.
  - Yes, **to get a book.** Those are the words that answer the question. Say those words.
  - To get a book.
  - Write them.

Present tasks like the previous one until students are very firm on the words they are to write.
**Remedies for students who can’t remember story information.** Starting with lesson 17 the basic procedure is for students to complete their independent work without first hearing items read or answered. Students are supposed to remember the information from reading the story and answering the oral comprehension items (which usually include all the written items they will respond to).

If some students have great difficulty remembering the information from the story and continue to make mistakes on independent work because they don’t recall the answers, you may introduce a temporary procedure:

- Direct students who have problems remembering the information to write answers to all the items they can work.
- Next, have them circle the number of any items they cannot answer.
- Direct them to read these items to themselves.
- Tell them, Remember the questions that are circled because you’ll look in your story to find the answers.
- Permit them to look at their story one time to find answers to all items. Students are not to write anything during the time they are looking in the story. Also, students are to limit their information search to the lesson that was read today. They are not to refer to earlier selections.

Pencils down. You may look at today’s story one time to find answers you couldn’t remember. You have three minutes. You have to find answers to all your questions in three minutes. You can’t write anything until you’re done reading.

- Monitor students and make sure that they do not write the answer to one question and then attempt to look at the story again. Remind them, You can only look at the story one time.

Repeat the procedure on no more than 12 lessons. Remind students that they should try to remember the answers when the story is being read by the group. Reinforce students who improve in remembering information.

**Workchecks**

**General Information**

The goal of the workcheck is to review the independent-work tasks and to make sure that (1) students are not making too many errors and (2) students learn the correct answers to items they miss. The workcheck is not mere paper marking. It is teaching. It is particularly important for *Reading Mastery Signature Edition*, Grade 3 because many items will appear as review items on later lessons. Some students will miss these items repeatedly unless you present daily workchecks.

The independent work consists of the worksheet pages for the lesson and answers to textbook items written on lined paper.

During the workcheck, you go over all the items and students mark all items that are wrong.
At the end of the workcheck students record the total number of errors they made at the top of the lined paper. Students change all incorrect answers and hand in their lined paper and their worksheet (side 1 and side 2).

You quickly spot-check the worksheet answers and those on lined paper. Don’t spot-check only items that had mistakes, because some students are not reliable about marking incorrect answers.

After the spot-check, you will use the Group Summary Chart to record the number of errors each student made on the lesson. (See Recording Errors, page 55.)

A “passing grade” for each lesson is three or fewer errors. This criterion is fairly stiff because many lessons call for 35–40 responses. The structure of the program makes it possible for most students to pass almost all lessons. The record of errors may be used to award grades. More importantly, the error performance indicates how well the students are performing, what they are mastering, and whether they need additional practice.

The workchecks are designed to provide that practice and to assure that students continue to perform well in the lessons.

A workcheck is most efficiently handled as a group activity. It should be conducted some time after the group has completed the independent work activities, but before the next lesson is presented.

Although details of the procedure may vary from situation to situation, here are things you should do during the daily workcheck:

- Check the written responses to all items. (Answer keys for worksheet and textbook items appear in the Answer Key book.)
- Make sure that all incorrect responses are marked with an X.
- Give the students information about correct answers to items, so they can later change their incorrect answers.
- Make a final check of each student’s written work after the student has changed all the incorrect answers.
- Then record the number of errors (the number of items originally marked with an X and later corrected).

The workcheck should not take a great deal of time. In most cases, it requires only six to nine minutes. If it takes much longer, (a) your pacing is too slow, or (b) the students are not firm in some skills that are important in completing the independent work. Work on both possibilities.

**Presenting Workchecks**

Students may check their own independent work during the workcheck. They should use a colored pencil for checking.

The fastest procedure for going through the workcheck is for you to **read each item and call on a student to tell the correct answer**. Students who have questions may raise their hand. If many students have questions about a particular item, tell them to mark the item with a question mark. Go quickly to the next item.
As you read the items and give the answers, circulate among the students. Make sure they are marking each incorrect response with an X. By circulating among the students, you will discourage the students’ tendency to change their answers without first marking the item as incorrect.

Firm items that a lot of students tend to miss, and firm students who consistently make more than three errors on their independent work. You firm by giving additional practice.

There are different formats for firming, but the simplest is for you to go over the items that many students miss and provide paired practice for students who tend to make too many errors.

Don’t try to firm all difficult items during one session. Instead, give students short bursts of practice (10–15 trials) in possibly three or four lessons.

For students who consistently make three or more errors, provide paired practice. Pair the lower students with students who do well on the independent work. The higher student presents the various items the other student missed and gives feedback on each answer. The paired practice could be scheduled for about five minutes a lesson (possibly at the end of the workcheck period).

Plan to firm students on sets of related facts. For example, some students have trouble with facts that present numbers—what’s the speed of sound, what’s the speed of light, how long does it take to go around Jupiter, how far is it from the sun to the earth, how long does it take Jupiter to spin around one time.

If students tend to confuse the numbers or just can’t remember them, plan to provide a short review at the end of each lesson, until the students perform well. The review should not last more than 2 minutes and should not have more than three unfamiliar or unfirm facts. There’s no problem if the review contains facts that are firm. For instance, if students know two of the facts above and are weak on the remaining four, present a group of items that consists of the two firm facts and three of the facts that are not firm. If students perform well, present the full set of six facts on the next lesson. Continue presenting this set on the following lessons (with the items in different orders) until students are firm on all items. This is a variation of the fact-review format, with specifically selected items. A sample of a fact review appears below.

**EXERCISE 3**

**Fact Review**

a. Let’s review some facts you have learned. First we’ll go over the facts together. Then I’ll call on some of you to do some facts.

b. Everybody, name the ocean the Bermuda Islands are in. (Pause.) Get ready. (Signal.) Atlantic Ocean. RF/R

   • Name the ocean you go through when you go west from the United States. (Pause.) Get ready. (Signal.) Pacific Ocean. RF/R

   • Tell me if things look light or dark when you’re scuba diving 100 feet deep. (Pause.) Get ready. (Signal.) Dark. RF/R

   • (Repeat step b until firm.)
c. Let’s say you open a bottle of soda pop. Tell me if the pressure inside the bottle goes up or down. (Pause.) Get ready. (Signal.) Down. 
• Tell me what forms in the soda pop. (Pause.) Get ready. (Signal.) Bubbles. 
• Name the arrow-shaped fish that live in the ocean. (Pause.) Get ready. (Signal.) Barracudas. 
• (Repeat step c until firm.)

d. Tell me if the water in the ocean is warmer at 100 feet down or at the surface. (Pause.) Get ready. (Signal.) At the surface. 
• Tell me if all the water at 100 feet down is the same temperature. (Pause.) Get ready. (Signal.) No. 
• Tell me what a buoyancy device is filled with. (Pause.) Get ready. (Signal.) Air. 
• (Repeat step d until firm.)

Individual Turns
Now I’m going to call on individual students to do some facts. (Call on individual students to do the set of facts in step b, step c, or step d.)

The review consists of three or four items that students tend to confuse and two or three items that generally give students no trouble. You may use this format for any group of items that students tend to confuse.

If students make a lot of mistakes on independent work, direct them to redo either the entire page on which the errors occurred, or just the part that presented problems.

Recording Errors
Record errors for independent work for the students after you have looked at their corrected work. The number of independent-work errors has been written by the students at the top of the lined paper (at the end of the workcheck). Check the numbers for accuracy. Record the number of errors in column IW of your Group Summary Chart.

The sample Group Summary Chart on the next page has been filled out for lessons 41 through 49. The shaded areas show the parts of the chart used for recording independent-work errors.

A passing grade for each lesson is three or fewer errors. Yoko Higashi’s IW performance for lesson 41 is circled, indicating that a remedy is needed.

It is important to monitor students’ independent work performance. If students start making a large number of errors on their independent work, firm them before proceeding in the program.

Fluency: Rate/Accuracy

General Information

During every fifth lesson, starting with lesson 10, each student receives an individual fluency checkout. In these lessons that end with the digit 5 (15, 25, etc.), the paired practice is deleted. Students therefore have time for the individual fluency checkouts. The average time available for individual fluency checkouts is about fifteen minutes.

Fluency checkouts take about a minute-and-a-half per student. If the group is large, you may need an additional checker. You may use an aide, an older student, a parent volunteer, or possibly a higher-performing student in the classroom. The main qualification for a checker is the ability to identify reading errors and keep accurate time. If an additional checker is not available, you may be able to finish the fluency
checkouts at some later time in the school day. Possibly, you could finish them during the next lesson.

Each fluency checkout is conducted by an aide, adult volunteer, or by the teacher.

To conduct fluency checkouts, the checker calls up individual students as the group works on independent-work activities. The student orally reads a specified passage from the main story of the preceding lesson. For example, for the checkout in lesson 30, each student reads a specified passage from lesson 29. The passage in the student textbook has marks at the beginning and at the end ( ).

The checker times each student. To pass the fluency checkout, the student must read the passage in one minute or less and make no more than two errors.

---

### Conducting Fluency: Rate/Accuracy Checkouts

Identify a part of the room where a student can read individually to you or to the assigned checker. The simplest procedure is for the checker to:

- Sit next to the student.
- Tell the student when to begin reading.
- Observe the text that the student reads.
- Make a tally mark on a sheet of paper for each error.
- Help if the student gets stuck on a word for more than two seconds.
- Record the time it takes the student to complete the passage.
Decoding errors consist of word misidentifications, word omissions, line-skipping, and word additions. (Self-corrects and rereading words also may be counted as errors. See pages 39 and 40.)

Note that the checker is not to correct errors unless the correction is necessary for the student to keep reading the passage. If the student can’t read a word within about two seconds, the checker says the word and marks it as an error. The checker may first ask, “Do you want me to tell you the word?”

**Students’ Records**

Each student keeps a record of fluency checkout performance with thermometer charts (reproducible copies of which are at the back of student workbooks and in Appendix J of this guide). During the program, the student will fill in two thermometer charts. Together, they show all the fluency checkouts the student passed.

- The current thermometer charts may be posted in the classroom, kept in individual student folders, or in a central folder that you keep.
- If a student passes a fluency checkout on the first trial, the student colors the appropriate space of the thermometer red. For example, if the student passes the checkout for lesson 35, the student colors the space for 35 red.
- If the student passes the fluency checkout, but not on the first trial, the student colors the appropriate space, but not red. You may use blue, black, pink, or some other color. When the student completes *Reading Mastery Signature Edition*, Grade 3, both thermometer charts should be completely filled in. The colors show whether the student needed additional firming, and where that firming occurred.
Recording Rate-and-Accuracy Performance

Use column CO on the Group Summary Chart to record the number of errors each student made and whether the student passed (P) or failed (F) the rate criterion (one minute or less).

The CO columns on the Group Summary Chart have two parts. Record P or F in the top half of the box to indicate whether the student passed or failed the rate criterion. Record the student’s number of decoding errors in the bottom half of the box.

The sample Group Summary Chart on page 61 has been filled out for lessons 41 through 50. The shaded columns show the parts of the chart used to record rate and accuracy performance for the individual fluency checkout in lesson 45 and lesson 50 (test 5). Note that Denise Barton’s CO performance for lesson 45 is circled, indicating that a remedy is needed.

Firming Students Who Do Not Pass Checkouts

The students who do not pass a fluency checkout on their first attempt should reread the passage aloud to their partner until they achieve an acceptable rate-accuracy performance. During these readings, students should be told which words they missed. After each reading, they should study the passage and then reread that passage to the partner.

Students who don’t pass two consecutive attempts to meet the rate-accuracy criterion for a fluency checkout should receive additional oral-reading practice.

- This practice should be modeled after the individual fluency checkouts, with the exception that the student who is reading should receive immediate feedback about words that are misread. The checker simply tells the correct word.

- A plan that works well is to direct the student to read the last two or three stories that the group has read. Use the same error limit that is specified for group reading.

- Monitor the student’s paired-reading practice. Make sure that the student is participating and the partner is responding to any mistakes the reader makes. If the practice is not adequate, either reassign the student to another partner or increase the amount of paired-reading practice the student receives.

Often, the student who is weak in decoding will tend to make a greater number of errors when tackling long passages. Therefore, the checker can take turns with the student, the checker reading one paragraph (or a few lines) and the student reading the next few lines.

A good variation is for the checker to read somewhat haltingly and make mistakes from time to time. The student is to catch these mistakes. By reading haltingly, the checker ensures that the student will be able to follow along. Requiring the student to catch the checker’s mistakes ensures that the student
is attending to the words even when not reading aloud. The periods during which the checker reads are therefore not merely “breaks.” They are a switch from one kind of accuracy performance to another.

**Fact Games**

**General Information**

Fact games occur every tenth lesson as part of the test lessons. The game is presented before the test. Fact games give students a great deal of practice with facts and rule applications. The games are important because many oral tasks presented during the regular lessons are answered by individuals, not by the whole group, which means that the students may not receive sufficient practice with many tasks.

Some facts are particularly troublesome for many students. The games provide intensive practice on these facts, but do so in a context that is reinforcing. The games become a combination of work and fun.

Groups of four players and a monitor play the game. (More than one group can play simultaneously.) Each group has a question sheet (or sheets) with 11 items numbered 2 through 12. The teacher reproduces these Fact Game sheets from blackline masters located in Appendix G.

To take a turn, a player rolls two dice (or number cubes). The player then adds the numbers on the cubes together, reads the item that corresponds to that number total (2 through 12), and responds to the item (which may involve answering several questions).
An assigned student monitor refers to the answer key in the back of the textbook and indicates whether the answer is correct. If so, the player earns a point and a checkmark is made on the student’s scorecard. After 10 minutes, direct all students who earn more than 10 points to stand up.

On the next page is the fact game from lesson 30 and scorecard 30.

Reproducible Fact-Game scorecard sheets appear at the back of each workbook and at the back of this guide. Each student needs a copy for lessons 10 through 140.

**Introducing the First Fact Game**

The instructions for the first game (lesson 10) specify that you will be the monitor and demonstrate with four players how the game is played. When demonstrating the game, make sure that you model fast pacing, correct procedures, and appropriate responses to the players.

After demonstrating a few “rounds” of the game, assign students to permanent groups. Ideally, a group should consist of four players and a monitor. In some situations, you may have to form a group that consists of three or five players and a monitor. If possible, try to avoid larger groups. Each player in a larger group will receive fewer turns, and managing the group becomes more difficult.

Do not make groups homogeneous. (Do not place the better performers in one group and the lower performers in the other.) Rather, mix students of varying ability.

Assign monitors who are competent. The monitors should be good readers. Tell the monitors their responsibilities. They are to make sure that the players are taking turns, moving to the left. The monitor directs the player who is taking a turn to read the item aloud and answer it. Then the monitor confirms a correct response or gives the correct answer if the item was missed.

The next player does not roll the cubes until the preceding player has answered and has been told whether the response is correct. (If players are permitted to roll before the item is read and answered, they become so intent on getting ready for their turn that they do not listen to the preceding player’s item and the answer.)

The fact game items appear on blackline masters (Appendix G near the back of this guide). Make one copy of the game for each group. Give each group two dice or number cubes.

Here are the procedures for playing:

- The monitor is the only person in a group who is permitted to look at the answer page at the back of the textbook.
- The other players take turns. A player rolls the cubes, adds the numbers showing, reads the item that has the same number, and tells the answer.
- If the player answers correctly, the monitor makes one tally mark on the player’s scorecard. Or the monitor says, “Correct,” and the player then makes one tally mark.
- The cubes go to the next player (the player to the left), and that player takes a turn.
1. Which footprint was made by:
   a. the lightest animal.
   b. the heaviest animal.

2. Tell which footprint was made by:
   a. the lightest animal.
   b. the heaviest animal.

3. a. Whirlpools are made up of moving
   b. A whirlpool is shaped like a

4. Which came later on Earth:
   a. dinosaurs or strange sea animals?
   b. dinosaurs or horses?

5. Which layer went into the pile later:
   a. Layer C or layer A?
   b. Layer C or layer D?

6. Tell the letter of the layer that went into the pile:
   a. first
   b. next
   c. last

7. a. Tell the letter of the layer we live in.
   b. What's the name of layer C?

8. Tell the letter of the layer where we find:
   a. human skeletons
   b. horse skeletons
   c. dinosaur skeletons

9. As you touch each dinosaur, say the letter. Then tell the
   name of the dinosaur.

10. a. What kind of animals lived in the Mesozoic?
    b. Things closest to the bottom of the pile went into the pile.

11. a. What are clouds made of?
    b. What kind of cloud does picture C show?

12. Tell the letters of the things you find in the Bermuda Triangle.
    A. sudden storms  D. huge waves
    B. streams       E. whirlpools
    C. mountains     F. ice floes
Here are procedures for setting up the groups:

- If possible, provide a table for each group of players. There should be no obstructions that would prohibit the monitor from observing the players. Players should not be seated directly next to the monitor (where they could read the answers in the monitor’s book).
- Each player’s scorecard sheet should be on the table, ready for the game.
- If the monitor is to tally each player’s correct answers, the monitor should have a pencil. If the monitor is to direct the players to make the tally marks, each player should have a pencil. **Note:** It is important that their scorecards are visible so the monitor can see whether the players are tallying correctly.

**Observing the Fact Games**

Follow these guidelines when you observe the games.

**Reinforce a fast pace.** Praise players who have the number cubes ready to roll, find the item quickly, read it correctly, and answer correctly. Remind the players that the faster they play, the more points they can earn. A fast pace also ensures that the players will be less likely to argue with the monitor.

Make comments about each group’s progress: **Look at how well you’re doing. You’ve already played three rounds.** Comments of this type are important because they let the students know that they are part of a group that is working together.

Do not permit the games to drag. If the groups are going slowly, do not tell the monitor, **Come on, let’s get this game moving. Nobody’s going to earn very many points if they are this slow.** A more positive, effective technique is to comment on games that are moving quickly: **Wow, this group is really moving. Every player has had five turns already.**

**Make sure that players are following the rules.** After the players have played the game for a few minutes, they may remember what item 5 is or what item 3 is. Therefore, they may attempt to answer the item without first reading the item aloud. For example, they’ll say, “Number 10a. Dinosaurs,” rather than reading the item, “What kind of animals lived in the Mesozoic?” Stop players who do not read the item aloud, and remind them of the rule: **You must read the item aloud and then answer it.** This stipulation is very important. Many items are included in the game because they are difficult for the students. The difficulty will be reduced greatly if a strong association between the item and the answer is established. This association is ensured, however, only if the students read the item aloud before answering it. Although the students may read it accurately to themselves, the other students in the group will not receive the benefit of hearing the item and the answer.

**Make sure monitors award points only when the answers are correct.** For nearly all items, the correct response is phrased in a very specific way, which is indicated in the answer key.
Unless the player's response is the same as that in the key, the response is incorrect. (There are a few items in later games that permit players to express an idea. For those items, the monitor must use some judgment. For most items, however, very little judgment is required.)

If an answer is not correct, the monitor is to read the correct answer aloud. Students are not permitted to argue with the monitor. If they argue, they lose a turn. The monitors are to raise their hand to signal a problem or a question they can’t answer.

Stop the game after it has been played for 10 minutes. When only three minutes of playing time remain, tell the groups: Only 3 minutes more. When the time limit is up, tell the groups to stop: If a player has started a turn, finish that turn. Then the game is over.

Tell each group of players how well they did. Announce which groups played the game smoothly. Tell all students who have more than 10 points to stand up. Congratulate them.
Test lessons occur every ten lessons, beginning with lesson 10. Each test consists of content introduced and practiced in the preceding nine lessons. The tests also assess the vocabulary sentences that students have practiced.

In every test lesson students also play a fact game and do an individual fluency checkout.

Test lessons that have both a written test and an individual fluency checkout provide you with detailed performance information about individuals and about the group. The test shows you how well individuals and the group comprehend the content that was presented in the different selections, and also shows how well students perform on the skills and vocabulary being taught. The individual fluency checkouts give information about how accurately and fluently students read. This package of information permits you to identify specific problems that individual students have, identify problems that are common to more than one student, and provide timely remedies.

**Administering the Tests**

1. Make sure that students have all materials they need: lined paper, textbook, and pencil.
2. Seat students so they cannot see the work of other students.
3. Direct students to complete the test and turn it in.
4. Score and grade the tests, and perform any necessary remedies before presenting the next lesson.

**Scoring the Tests**

There are different formats for marking the test, one of which is to perform a workcheck, during which students use a marking pencil to indicate which items are wrong (with an X). A variation is a workcheck in which students exchange tests and mark each others’ tests. A third (and preferable) alternative is for you to score each test.
Even if you do not score each test, you should go over every test and make sure that the marking is accurate. After checking each student’s test, write the total number of errors at the top of the test.

### Recording Test Performance

You should record each student’s performance in two places—on the Group Summary Chart (Appendix H) and on the Test Summary Sheet (Appendix I). A copy of the Test Summary Sheet for tests 1–7 appears below.

You record each student’s performance by circling the number of each item the student missed. If the student missed items 3 and 18, you circle the numbers 3 and 18 for that student. The passing criterion for each test is shown at the bottom of the column for each test. Note that the criteria are not the same for different tests. (The criterion for test 2 is 26 correct out of 29, but the criterion for test 5 is 31 correct out of 34.) If the student fails the test, write F over the box with item numbers, or circle the box. Either system gives you a quick visual summary of the students who passed versus those who had trouble. In the Test 5 sample on page 66, Denise Barton has a failing score (29 correct out of 34 with passing criterion of 31/34) and so her error number has been circled.

</tbody>
</table>

Passing Criterion | 32/35 | 26/29 | 32/36 | 16/18 | 31/34 | 32/36 | 32/36 |
You should also record each student’s test performance on the Group Summary Chart. In the **Test** column, write the number of errors each student made on the test. Circle any number that exceeds the passing criterion for the test.

The sample Group Summary Chart above has been filled out for lessons 41 through 50 (test 5). The shaded column shows the part of the chart used for recording test 5 performance. (Denise Barton missed 5 out of 34 items. Her failing score has been circled.)

### Test Remedies

Reproducible blackline masters of the Test Summary Sheets appear in Appendix I. The Test Summary Sheets provide an item-by-item analysis of the errors each student made. This information implies the kind of remedies that should be provided (ideally before you present the next lesson). A sample Test Summary for test 5 has been filled out and appears on the next page.

#### Total Errors

The total errors a student made tells you whether the student is progressing adequately. Students who exceed the specified number of errors are not performing at a level required to thoroughly comprehend the material they read.

#### Error Patterns

The basic patterns that you should look for when summarizing the data are: (a) a student (or groups of students) who fails the passing criterion on two or more consecutive tests; (b) the same item (or group of related items) being missed by more than 1/4 of the students.

## Students Who Fail Consecutive Tests

Any student who fails consecutive tests is probably misplaced in the program. If more than one or two students exhibit this pattern, there are probably problems with the way the material is being presented, reviewed, and confirmed. The first step in remediation would be to make sure that the students are trying. The simplest way is to provide them with some sort of reward or positive response for meeting the criterion on tests. For example, make a chart that shows the number of students who pass each test. Have a party or some special award for students who pass two or more consecutive tests. Also make sure that you have a solid workcheck and that students are doing the fact games.

In some cases, you will have students who do not really belong in the program—based on their reading performance—and there is no possibility of putting them in another group. Although you teach carefully, these students still do not perform at criterion. The best practice in this case is to do what you can in firming these students and providing additional practice outside the regular reading periods. But when you are teaching the reading group, do not gear the rate of the presentation to these students. Rather, gear it to the students who are appropriately placed in the program. If you gear the presentation to the students who are misplaced, you will go far too slowly for the others, and the presentation will be boring.

## Students Who Fail the Same Items

If 1/4 or more of the students fail the same item or group of related items, those items require more practice and review. Here are the remediation steps.

1. Identify the common items that are missed, and create a fact review that involves these items.

A Test Firming Table for each test appears in the teacher presentation book, at the end of
the test lesson. You may use this table to help you construct fact reviews (or to firm specific concepts). The table lists the test items and indicates the first lesson in which that item appeared. Here is the table for test 5.

### Test 5 Firming Table

</table>

According to the Test 5 summary sample on page 67, 1/4 of the students missed items 22 and 24.

22. What does an inventor get to protect an invention?  
24. What are businesses that make things called?

By checking the Test 5 Firming Table, we see that item 22 was introduced in lesson 46, and item 24 in lesson 47.

Now create a fact review that involves these items. (See pages 54 and 55 and **Note** below.)

2. Present the fact review as part of the test remedy and then as part of subsequent lessons.

3. Present the items until the students are quite firm—virtually flawless.

4. If the number of students who had difficulties is large, present the review to the entire reading group.

**Note:** If students miss vocabulary items, you can follow a similar procedure in making up a fact review.

Sometimes, mistake patterns are predictable. If there has been a substitute for several lessons before the test, the students probably will perform more poorly than they would if you had been working with them. The remedy is not only to go over the information that relates to the items the students tended to miss, but also to go over information that is closely related. For example, if students tend to miss three items about the nervous system, they would probably miss other items about the nervous system that were not on the test. Go over the independent work for the lessons that introduce the nervous system, and identify all key items. (The Test Firming Table in the teacher presentation book indicates the key lessons where items are introduced.) Present those items in a fact-review format. (This review is probably best presented to the entire reading group, not to only those students who had serious problems.)

Use a variation of the same procedure if the pattern occurs on material that you had presented. Sometimes students get overloaded with information. First see if the items they miss are related. If they are, refer to the independent-work items, and identify all the major facts that are related to the items the students missed. Present those facts in a fact-review format.
Retesting Students

After you have provided remedies, a general rule is to retest students who failed.

Do not retest the students after you simply mark answers on their test. Provide a remedy first. Before retesting make sure that they can respond correctly to the various items they missed. One purpose of the retest is to document that the remedy has worked. Another is to show the students that they can perform well on the tests and to provide them with the practice they need to achieve mastery.

Grades

The purpose of letter or number grades is to show the progress and skill level of the students. If students pass the tests consistently, and generally do not make more than three errors on their independent work, they deserve an A. The number grade would be over 90.

A student should be able to fail one or two tests and still earn an A. The reason is that some tests present difficult items. The simplest grading system is to use the letter grades of A and F or U (for unsatisfactory). If students tend to meet criterion on independent work and tests, they receive an A. Otherwise, they receive a letter that suggests they are not performing adequately. Awarding Bs and Cs is difficult because the passing criteria for tests and independent work are quite high (sometimes above 90%). Students who average much below 90% are not performing adequately. If students do not meet the passing criteria for worksheets and tests, their percentage of correct responses may still be in the 80% range, but they are not performing at the level of mastery that is required by the program.
Present the spelling component of *Reading Mastery Signature Edition*, Grade 3 at a time other than the period for reading. In other words, don’t allow spelling lessons to infringe upon the time you’ve scheduled for reading. Each spelling lesson takes about ten to fifteen minutes, so you can use these lessons flexibly during the time allotted for language arts instruction. Spelling instruction begins with lesson 1 of the reading program and matches each reading lesson through 140. (You present Spelling lesson 1 on the same day as Reading lesson 1.) Remember, reading lessons match with spelling lessons, so under no circumstances should you end up on a spelling lesson beyond the reading lesson you are teaching.

Although these spelling lessons, when taught to mastery, will markedly improve your students’ spelling ability, their greatest value might be that of reinforcing reading. The ability to *encode* a word strengthens students’ ability to decode.

### Material

You present lessons from the *Reading Mastery Signature Edition*, Grade 3 *Spelling Presentation Book*. Your students write answers for some activities on their own paper. They will need a red pen on test day.

### How the Spelling is Taught

Follow the same conventions and critical teaching practices for teaching the spelling lessons that you use for teaching the reading lessons. As in a reading lesson, utilize group responses, clear signals, and fast pacing.

See the *Reading Mastery Signature Edition*, Grade 3 *Spelling Presentation Book* for further information.
Administering the Placement Test

As a rule, students who have performed well in a third grade reading program should be able to succeed in Reading Mastery Signature Edition, Grade 3. However, this rule may not apply to all students, particularly those who can decode words silently but cannot read aloud with sufficient accuracy (no more than two errors per 100 words). Also, students who are extremely weak in answering written comprehension questions should not go into Reading Mastery Signature Edition, Grade 3.

The placement test on page 74 determines the rate-accuracy and comprehension performance of students. Administer the test to all the students before placing them in the program. The test results will provide you with:

- “baseline” information about their reading rate and accuracy
- a basis for evaluating their improvement after they have completed the program
- a means of identifying students who may be placed in the program “on trial,” and those who should not be placed in the program.

Part 1 of the test is to be administered individually to the students. They should not observe others taking the test. Part 1 requires about two minutes per student. You will need a stop watch. If students make more than six errors on Part 1, do not administer Part 2 to those students.

Part 2 of the test may be presented to more than one student at the same time. Part 2 requires the students to write answers to comprehension questions about the Part 1 passage.

Instructions for Part 1

Reproduce the one-page Placement Test that appears on page 74. Make one copy for each student that you are to test.

1. Call a student to a corner of the room, where the test will be given.
2. Give a copy of the test to the student.
3. Point to the column of words at the top of the test. Tell the student: “Touch word 1.” (Wait.) “That word is California.”
4. Repeat step 3 for words 2–5.
5. Point to the passage in part 1.
6. Tell the student: “You’re going to read this passage out loud. I want you to read it as well as you can. Don’t try to read it so fast that you make mistakes. But don’t read it so slowly that it doesn’t make any sense. You have two minutes to read the passage. Go.”
7. Time the student. If the student takes more than three seconds on a word, say the word, count it as an error, and permit the student to continue reading. To record errors, make one tally mark for each error.
Count all the following behaviors as errors:

- Misreading a word (Count as one error.)
- Omitting a word part (Listen carefully for s and ed.) (Count as one error.)
- Sounding out a word but not saying the word at a normal speaking rate (Count as one error.)
- Skipping a word (Count as one error.)
- Skipping a line (Immediately show the student the correct line.) (Count as one error.)
- Not identifying a word within three seconds (Tell the word.) (Count as one error.)
- Reading a word incorrectly and then reading it correctly (Count as one error.)

Also count each word not read by the end of the two-minute time limit as an error. For example, if the student is eight words from the end of the passage by the end of the time limit, count eight errors.

**Instructions for Part 2**

After you’ve administered Part 1 to all the students, present Part 2 to those students who made no more than six errors on Part 1. (Part 2 is a group test.)

1. Assemble the students.
2. Give each student a copy of the placement test.
3. Make sure the students have pencils.
4. Give the group these instructions: “These are questions about the passage that you read earlier. Write the answers to the comprehension items at the bottom of your paper. You have five minutes to finish the questions.”
5. Collect the test sheets after five minutes.

**Answer Key Part 2**

1. Idea: Because the ship was on fire
2. Linda, Kathy
3. lifeboats
4. Linda 5. 13 6. 10 7. hand
8. Idea: In a lifeboat
9. Japan
10. Idea: To see their father
11. 3 days

**Placement Criteria**

Use the table below to determine placement for each student.

<table>
<thead>
<tr>
<th>Errors</th>
<th>Placement</th>
</tr>
</thead>
<tbody>
<tr>
<td>If a student makes seven errors or more on Part 1 OR three errors or more on Part 2</td>
<td>Place the student in a reading program more elementary than <em>Reading Mastery Signature Edition</em>, Grade 3.</td>
</tr>
<tr>
<td>If a student makes no more than six errors on Part 1 AND no more than two error on Part 2.</td>
<td>Place the student at <em>Reading Mastery Signature Edition</em>, Grade 3, Level 1.</td>
</tr>
</tbody>
</table>
If you suspect that some students are too advanced for the program (students who score 0 or 1 on the placement test and who exhibit good comprehension skills), present the main story from lesson 103 to them. Present the tasks specified for the main story oral reading, and assign items 1–10 (17 responses) from lesson 103 in the workbook.

If the student makes no more than eight story-reading errors and no more than two workbook errors on lesson 103, place the student in a higher-level program, *Reading Mastery Signature Edition*, Grade 4.

**Remedies**

- If students fail Part 1, they are weak in decoding. The simplest remedy for these students is to select material that they are able to read without making more than two errors per 100 words. Set rate criterion for these students (based on the rate at which they are able to read making no more than two errors per 100 words) and as they improve, change the criterion so they are required to read faster. Continue to provide lots of practice until the students read at the minimum rate of 100 words per minute without making more than two errors per 100 words.

- If students fail Part 2, provide practice on basic comprehension questions (who, what, when, where, why). Direct these students to read aloud. Ask questions after each sentence. Make sure that each question can be clearly answered by the passage that the students read. Provide this kind of practice until the students are proficient at answering questions.

When you feel the students are firm on skills that were initially deficient, readminister the placement test.
“Fire! Fire!” a voice said over the loudspeaker. “The forward deck is on fire,” the voice announced. “Everybody, leave the ship. Get into the lifeboats!”

Linda and her sister were on their way from the United States to Japan. Linda was thirteen years old, three years older than Kathy. Their father was in Japan, so the family had left California on a great ship called an ocean liner. They were now somewhere in the middle of the Pacific Ocean.

“Fire! Fire!” the voice shouted. “Everybody get into the lifeboats!”

People were running this way and that way on the deck of the ship. They were yelling and crying.

“Hold on to my hand,” Linda said. The girls went to the lifeboats. People were all around them, shoving and yelling. Linda could not see much. She was afraid. Suddenly she was no longer holding Kathy’s hand.

Suddenly a strong pair of arms grabbed Linda. “In you go,” a voice said. A big man picked Linda up and put her in the lifeboat.

“Where’s my sister?” Linda asked. Linda looked but she couldn’t see her younger sister. “Where’s my sister?” Linda asked. Suddenly she was no longer holding Kathy’s hand.

“Fire! Fire!” the voice shouted. “Everybody leave the ship. Get into the lifeboats!”

Linda told Kathy, “Hold on to my hand.” Linda said. The girls went to the lifeboats. People were all around them, shouting and yelling. Linda could not see much. She was afraid. Suddenly she was no longer holding Kathy’s hand.

“Hold on to my hand,” Linda said. The girls went to the lifeboats. People were all around them, shouting and yelling. Linda could not see much. She was afraid. Suddenly she was no longer holding Kathy’s hand.

Linda told Kathy, “Hold on to my hand.” Linda said. The girls went to the lifeboats. People were all around them, shouting and yelling. Linda could not see much. She was afraid. Suddenly she was no longer holding Kathy’s hand.

Part 1
1. Why was everybody trying to leave the ship?
2. Name the two sisters that were on the ship.
3. People were trying to get into the.
4. Which sister was older?
5. How old was that girl?
6. How old was her sister?

*Nome* is a very small city in Alaska.

**nonsense**

*Nonsense* means no sense at all.

**o’clock**

*O’clock* tells about the hour of the day.
An **official** is somebody who can judge if things are done as they are supposed to be done.

When you **overcome** a problem, you solve it.

When you **panic**, you become so afraid that your mind doesn’t work well.

If a body part is **paralyzed**, it can’t move.

A **parka** is a warm jacket with a hood.

A **partner** is somebody you do something with.

When you look at something as hard as you can, you **peer** at that thing.

When you let something happen, you **permit** it to happen.

**Plateosaurus** was the very first dinosaur.

A **platform** is a level place that is above the places around it.

If something **plunges** into the water, it dives into the water.

A **porpoise** is sometimes called a dolphin.

When you **prevent** something, you make sure it doesn’t happen.

When you **protect** something, you don’t let anything hurt it.

When you **prove** something, you show that it has to be true.

When something **pulses**, it beats.

If you do something on **purpose**, you do something the way you planned to do it.

Another word for **quickly** is **rapidly**.

If something happened not long ago, that thing happened **recently**.

A **reef** is a ridge that forms underwater.

**Regular** is another word for usual or ordinary.

**Reins** are the straps that are attached to horses.

When you **relax**, you take it easy.

The **retina** is the part of the eye where pictures are formed.
saber

A saber is a kind of sword.

scene

If you look at something with many things or parts to it, you’re looking at a scene.

scent

Another word for the smell of something is the scent of something.

science

The careful study of anything in the world is a science.

scuba diver

A scuba diver goes underwater wearing a mask and a tank of air.

separated

Things that are separated are no longer together.

sheltered

Things that are sheltered are protected.

shortly

Another word for soon is shortly.

single

Single means one.

skull

Your skull is the bone that covers the top of your head.

spinal cord

The spinal cord is the bundle of nerves that goes down the middle of your backbone.

spiral

A spiral is a circle that keeps getting bigger.

Guide to Reproducible Appendices

Appendix A
Placement Test.......................... 74

Appendix G
Blackline masters for Fact Games .... 104
(Reproduce 1 set for each group.)
Fact Game 30  Fact Game 40
Fact Game 50  Fact Game 60
Fact Game 70  Fact Game 80
Fact Game 90  Fact Game 100
Fact Game 110 Fact Game 120
Fact Game 130 Fact Game 140

Fact Game Scorecards ............... 138
(Reproduce 1 of each sheet for each student.)

Appendix H
Group Summary Charts............ 140
(Reproduce 1 group sheet for every 10 lessons.)

Appendix I
Test Summary Sheets .............. 142
(Reproduce 1 sheet for each 8 or fewer students in each group.)
Tests 1–7  Tests 8–14

Appendix J
Thermometer Charts ............... 144
(Reproduce 1 of each sheet for each student.)

Appendix K
Map for Special Project
After Lesson 10 ....................... 146

Appendix L
Family Letters ....................... 147

Appendix N
Skills Profile Chart ............... 164
2. a. Which line starts at the circle on the map and goes east?
   b. If you start at the circle and move to the number 3, in which direction do you go?

3. Tell which place is:
   a. the coldest
   b. the hottest
4. Which letter on the map shows Henry’s landing place:
   a. in Florida?
   b. in Kentucky?

5. Which letter on the map shows Henry’s landing place:
   a. in Canada?
   b. in Michigan?

6. Which letter on the map shows:
   a. Big Trout Lake?
   b. Crooked Lake?
   c. the first landing place?
7. As you touch each Earth, say the letter. Then tell which season the Earth shows.

8. a. The earth makes a circle around the sun one time every ____________.
   
   b. How many days does it take the earth to make one full circle around the sun?
   
   c. How many Great Lakes are there?

9. Answer these questions about geese:
   
   a. How old are they when they mate for the first time?
   
   b. After they mate, how long do they stay together?
   
   c. How long do most of them live?

10. In which direction do geese migrate:
   
   a. in the fall?
   
   b. in the spring?
11. a. Which side of Earth 1 is closer to the sun, X or Y?
    b. Which side of Earth 1 is in daytime?
    c. Which side of Earth 2 is in daytime?

12. Which earth shows the person:
    a. In daytime?
    b. 6 hours later?
2. Tell which season each thing happens.
   a. Alaskan animals are the most dangerous.
   b. Female animals in Alaska have babies.

3. Which direction is:
   a. ocean current F moving?
   b. ocean current J moving?
   c. the wind coming from?

4. Which arrow shows the direction the current will move:
   a. ice chunk B?
   b. ice chunk R?

5. Is the North Pole tilting toward the sun or away from the sun:
   a. when days get shorter?
   b. when days get longer?

6. Tell what season we have when:
   a. the North Pole tilts away from the sun.
   b. the North Pole tilts toward the sun.
7. Which globe shows how the earth looks on the first day of:
   a. summer?
   b. winter?

8. Which letter on the map shows:
   a. Canada?
   b. Alaska?

9. a. Which letter on the map shows the main part of the United States?
   b. Which 2 letters show where Eskimos live?
Fact Game

10. a. Name 3 cold-blooded animals.
   b. Name 3 warm-blooded animals.

11. a. Are killer whales fish?
   b. Are killer whales cold-blooded or warm-blooded?

12. a. How warm is it during winter in Alaska?
   b. In April, the sun shines for more than hours _______________ each day in Alaska.
2. Tell which footprint was made by:
   a. the lightest animal.
   b. the heaviest animal.

3. a. Whirlpools are made up of moving ______________.
   b. A whirlpool is shaped like a ______________.

4. Which came later on Earth:
   a. dinosaurs or strange sea animals?
   b. dinosaurs or horses?
Fact Game

5. Which layer went into the pile later:
   a. Layer C or layer A?
   b. Layer C or layer D?

6. Tell the letter of the layer that went into the pile:
   a. first
   b. next
   c. last

7. a. Tell the letter of the layer we live in.
   b. What’s the name of layer C?

8. Tell the letter of the layer where we find:
   a. human skeletons
   b. horse skeletons
   c. dinosaur skeletons

9. As you touch each dinosaur, say the letter. Then tell the name of the dinosaur.
10. a. What kind of animals lived in the Mesozoic?
   b. Things closest to the bottom of the pile went into the pile

11. a. What are clouds made of?
   b. What kind of cloud does picture C show?

12. Tell the letters of the things you find in the Bermuda Triangle.
   A. sudden storms
   B. streams
   C. mountains
   D. huge waves
   E. whirlpools
   F. ice floes
2. Which object went into the pile:
   a. first?
   b. last?
3. Which object went into the pile later:
   a. the book or the rock?
   b. the bone or the cup?

4. Each picture has 2 arrows that show how the melted rock moves. Which picture shows 2 correct arrows?
5. Most of the things that we use every day were invented after the year _____________.

6. Which things were invented by somebody?
   - trees  shoes  dirt
   - pens  snow  flowers
   - paper  grass  stoves
   - rain  houses  cows

7. a. The person who makes an object for the first time is an _____________.

    b. The object the person makes is an _________________.

8. a. The first thing you do when you think like an inventor is find a _________________.

    b. What’s the next thing you do?

9. The men who invented the airplane saw a need. What need?

10. How long ago did the dinosaurs live on Earth?

11. What is it called when the earth shakes and cracks?

12. Name 2 things that happen when melted rock moves down the sides of a volcano.
Fact Game

2. Answer these questions about Leonard’s invention:
   a. How many electric eyes did he use?
   b. How many beams of light went across the doorway?

3. Answer these questions about Leonard’s invention. Tell whether the person is moving into the room or out of the room:
   a. if the outside beam is broken first.
   b. if the inside beam is broken first.

4. As you touch each picture, say the letter. Then tell if the lights in the room are on or off.

   A
   B
   C
   D

5. a. When you invent something, you start with a ________________.
   b. Then you build a ________________ of the invention.
   c. Then you get a ________________ to protect your invention.

6. What are businesses that make things called?
7. The solid arrows show how many people went into the room. The dotted arrows show how many people left the room.
   a. Are the lights on in the room?
   b. How many more people would have to leave the room before the lights go off?

8. a. What does an inventor get to protect an invention?
   b. Special lawyers who get protection for inventions are called ___________.

9. Tell what the counter on Leonard’s device does:
   a. every time somebody goes into the room.
   b. every time somebody leaves the room.

10. Answer these questions about Leonard’s invention:
    a. If a person moves into the room, which beam is broken first—the inside beam or the outside beam?
    b. Which beam is broken next?
    c. Will the lights turn on or off?

11. Here’s the rule about an electric eye: **Each time the beam of light is broken, the light changes.** For each item, tell if the light is on or off at the end.
    a. The light is off. The beam is broken 4 times.
    b. The light is off. The beam is broken 3 times.

12. a. What number does Leonard’s counter end up at when the last person leaves the room?
    b. What happens to the lights?
2. Answer these questions about Earth and Mars:
   a. Which is smaller?
   b. Which has more clouds around it?
   c. Which is warmer?
3. If something weighed 100 pounds on Earth:
   a. would it weigh more than 100 pounds on Saturn?
   b. would it weigh more than 100 pounds on our moon?
   c. how much would it weigh on our moon?
4. a. How far is it from Earth to Jupiter?
   b. Which is smaller, Earth or Saturn?
5. A person weighs 100 pounds on planet X and 200 pounds on planet Y. Which planet has stronger gravity?
6. a. Is Earth the planet that is closest to the sun?
   b. The sun gives __________ and __________ to all the planets.
7. a. What’s in the middle of the solar system?
   b. Name the planet we live on.
   c. Name the only part of the solar system that’s burning.
8. Tell how many moons each planet has.
   a. Saturn
   b. Jupiter
9. Say all the planets in the solar system. Mercury, ____________,
   ____________, Mars, ____________, Saturn, ____________,
   Neptune, ____________.
10. a. Which planet is largest?
    b. Which planet is next-largest?
    c. How many times larger than Earth is the sun?

11. Tell how many:
    a. planets are in the solar system.
    b. suns are in the solar system.

12. a. Which is bigger, Alaska or Japan?
    b. Is Japan a state or a country?
    c. What’s the largest city in Japan?
Fact Game

2. What’s another name for hot, melted rock?
3. As you touch animals A, B and C, say the letter. Then name the animal.
4. As you touch animals D, E and F, say the letter. Then name the animal.
5. a. How long does it take Jupiter to spin around one time?
   b. Which uses more oxygen, running or sitting?
6. Answer these questions about Jupiter and Io:
   a. Which has stronger gravity?
   b. Which is smaller than Earth?
   c. Where can you jump 8 feet high?
7. a. Does Io move around Jupiter slowly or fast?  
   b. It takes Io about _____________ to go all the way around Jupiter.

8. When you’re training an animal, what do you do:  
   a. each time the animal does the trick?  
   b. if the animal does not do the trick?

9. a. Which has stronger gravity—Earth or Jupiter?  
   b. So where would you feel lighter?

10. What color is lava:  
    a. when it’s very hot?  
    b. when it’s completely cooled?

11. a. Do gases surround Io?  
      b. How much oxygen is on Io?

12. a. What planet is shown in the picture?  
      b. Which is bigger, the “eye” of the planet or Earth?
Fact Game

2. Say **top** or **bottom** for each blank.
   a. A regular pyramid has one animal at the ____________ of the pyramid.
   b. An upside-down pyramid has one animal at the ____________ of the pyramid.

3. Tell the letter of the glass that will make:
   a. the lowest ring.
   b. the highest ring.

4. a. Name 2 cities in Colorado.
   b. Name one city in Utah.

5. Tell about driving from Colorado to Utah.
   a. What mountains do you drive over?
   b. In which direction do you go?

6. a. When you teach an animal to work for a new reward, do you change the reward **quickly** or **slowly**?
   b. When do you stop changing the reward?

7. When you teach an animal a simple trick:
   a. when do you reward the animal?
   b. when don’t you reward the animal?

8. a. When you teach an animal to work for a new reward, what kind of reward do you start with?
   b. Then what do you do to that reward?
9. As you touch A and B, say the letter. Then name the state.

10. The more water the glass has, the __________ the sound it makes.
    - higher
    - lower

11. When you’re teaching a hard trick:
    a. can the animal do the trick at first?
    b. what happens if the animal doesn’t receive rewards until it does the trick?
    c. what do you reward the animal for doing at first?

12. A person weighs 200 pounds on planet X and 100 pounds on planet Y. Which planet has stronger gravity?
2. a. Coral is made up of tiny _____________.  
    b. An underwater ridge that's covered with coral is called a coral _____________.

3. a. What does the color of water tell you about the water?  
    b. Name an arrow-shaped fish.

4. Tell which body has:  
   a. the most pressure on it?  
   b. the least pressure on it?

---

Appendix G Lesson 90  Fact Game
5. a. When you open a bottle of soda pop, what happens to the pressure inside the bottle?
   b. What forms in the soda pop?

6. a. In what ocean is the X?
   b. About how many miles is it from Florida to the X?

7. How many times greater is the pressure on you:
   a. when you dive down 33 feet?
   b. when you dive down 66 feet?

8. When you move up too fast from very deep water:
   a. you may get the ______________.
   b. what forms in your blood?
   c. is there less pressure or more pressure on your body?
9. a. The Iditarod is about _____________ miles from start to finish.
   • 2000  • 200  • 1100
   b. In most years, the race takes about _____________.
   • 3 days  • 10 days  • 3 weeks

10. Answer these questions about the Iditarod sled-dog race.
   a. In what state is it held?
   b. In what city does it begin?
   c. In what city does it end?

11. Answer these questions about the ocean 100 feet down.
   a. Is the water all the same temperature?
   b. Is the water cooler or warmer than water at the surface?
   c. Do things look light or dark?

12. Answer these questions about a buoyancy device.
   a. What is it filled with?
   b. When it is filled up, what happens to the diver?
   c. When it is empty, what happens to the diver?
2. Tell what could happen if booties on a sled dog are:
   a. too loose.
   b. too tight.

3. a. Most sled-dog teams have an _____________ number of dogs.
    • even  • odd
   b. For the Iditarod, a sled-dog team can’t have more than _____________ dogs.

4. Answer these questions about Iditarod rules.
   a. What does a musher have to do with an injured dog?
   b. At least how many dogs must be on the gang line at the end of the race?
   c. Every musher must rest for _____________ hours at one checkpoint and for _____________ hours at 2 other checkpoints.

5. a. Name the first woman who won the Iditarod.
   b. In what year did she win it?

6. Answer these questions about the Iditarod.
   a. How much food does each dog need every day?
      • 1 pound • 2 pounds • 5 pounds
   b. Each sled must have room to hold _____________.
      • an injured musher
      • an injured dog
      • 100 pounds of food

7. Say which dogs each item tells about:
   • wheel dogs  • swing dogs  • lead dogs
   a. Which dogs are responsible for freeing the sled when it gets stuck?
   b. Which dogs are very smart and do other dogs obey?
   c. Which dogs are very good followers and smart?
8. What command tells sled dogs:
   a. to turn left?
   b. to turn right?
   c. to move straight ahead?

9. a. Name the woman who finished the Iditarod 16 times.
   b. How many times did she enter the Iditarod?
   c. How many times did she finish in first place?

10. Tell which things each Iditarod musher must have.
    • enough food for a week  • booties
    • enough food for a day   • an ax
    • a good sleeping bag    • a tent
    • extra shoes           • extra dogs
    • firewood             • snowshoes

11. Answer these questions about Iditarod checkpoints.
    a. How does food get to them?
    b. About how far apart are they?
    c. About how many are there?

12. Answer these questions about Iditarod rules.
    a. What happens if a sled dog doesn’t pass the health examination?
    b. How much help can mushers get when they’re on the trail?
2. a. What are tiny parts of matter called?
    b. How many forms of matter are there?
3. In what form of matter is air:
   a. on Earth?
   b. on Pluto?
   c. on Saturn?
4. How can you change:
   a. solid matter into liquid matter?
   b. gas matter into liquid matter?
5. What form of matter is:
   a. the air around you?
   b. the sun?
6. a. How many miles does light travel in one second?
    b. What else travels as fast as light?
7. Tell how long it takes:
   a. sound to travel one mile.
   b. light to travel from the sun to Earth.
8. Name all the things in the list below that are matter in the solid form.
   • air  • water  • milk  • steam
   • wood  • rock  • tea  • glass
9. Name all the things in the list above that are matter in the gas form.
Fact Game

10. Tell which thing in the list below:
   a. travels fastest.
   b. travels slowest.
   • racing car   • rocket   • jet plane
   • sound   • light

11. What form of matter is:
   a. water?
   b. ice?
   c. steam?

12. Name each form of matter:
   a. the coldest form
   b. the next-coldest form
   c. the hottest form
2. a. In which form of matter are molecules lined up in rows?
   b. Which planet is warmer, Saturn or Pluto?

3. a. Are whales **cold-blooded** or **warm-blooded**?
   b. Are whales fish?

4. Tell the letter of the fish:
   a. with the **greatest** pressure on it.
   b. with the **least** pressure on it.
5. Name the muscle:
   a. on the back of the upper arm.
   b. on the front of the upper arm.

6. Name the arm muscle that gets shorter:
   a. when you straighten your arm.
   b. when you bend your arm.

7. In which form of matter do molecules:
   a. move fastest?
   b. move slowest?

8. Answer these questions about the galaxy we live in.
   a. What is its name?
   b. How many stars are in it?

9. In which form of matter are molecules:
   a. farthest apart?
   b. closest together?

10. Tell where a balloon would be smaller:
    a. at the surface of the ocean or 40 feet deep?
    b. 60 feet deep or 30 feet deep?

11. Name all the things in the list below that are matter in the liquid form.
    • air
    • milk
    • rock
    • tea
    • steam
    • water
    • wood
    • glass

---

Appendix G Lesson 120  Fact Game
12. As you touch each letter, say the letter. Then name the animal.

A  B  C
Fact Game

2. a. If you cut the nerve going from your foot to your brain, you could not __________ your foot.
   
b. If you cut the nerve going from your brain to your foot, you could not __________ your foot.

3. Name the bundle of nerves that goes up and down through the middle of your backbone.

4. Name the part of the eye:
   a. where pictures are formed.
   b. where light enters the eyeball.
   c. that bends the light.

5. a. How many chambers does the heart have?
   
b. How many chambers does the blood go through before it goes to the lungs?
   
c. How many chambers does the blood go through after it goes to the lungs?

6. Say big or small to tell in which part of your ear chamber you would pick up each sound.
   a. very high voice
   b. low voice

7. a. Where does black blood go after it leaves the heart?
   
b. Then the blood goes to the ________________.
   
c. Then the blood goes to the ________________.

8. a. What color is blood that has fresh oxygen?
   
b. What color is blood that does not have fresh oxygen?
   
c. Where does blood pick up fresh oxygen?
9. a. How many bones are in the human body?
   b. Name the two things that bones do.

10. a. Things can’t burn without ________________.
    b. In the lungs, the color of blood changes from ________________ to ________________.

11. What’s strange about:
    a. the bones in your backbone?
    b. the images in your eye?

12. a. Which part of your brain works when you think?
    b. To which part of the brain do the nerves from the eye go?
2. a. Which dinosaur lived earlier, Plateosaurus or Tyrannosaurus?
   b. About how long was Plateosaurus?
3. a. About how deep is the snow at the North Pole?
   b. How many hours does it take the sun to make a full circle around a person at the North Pole?
4. What’s under the snow:
   a. at the North Pole?
   b. at the South Pole?
5. What part of a camera:
   a. bends the light that goes through it?
   b. lets just enough light into the camera?
6. Which letter shows:
   a. the film?
   b. the lens?
   c. the iris?
7. Say **toward** or **away from** for each blank.
   During our winter, the North Pole tilts __________ the sun and __________ the South Pole tilts the sun.
8. a. What is part X?
   b. What is part Y?

9. Tell if the hole in the iris is **big** or **small**:
   a. when things are very bright.
   b. when there’s not much light.

10. As you touch animals A, B and C, say the letter. Then name the animal.
11. As you touch animals D and E, say the letter. Then name the animal.

12. a. What are the 2 kinds of seasons that Africa has?
   b. Dinosaurs lived during the ____________.

### Main Story Errors

Record number of errors group makes during main-story reading.

### Independent Work (IW)

Record number of errors. Passing criterion: 3 or fewer errors.

### Reading Checkouts (CO)

Record number of errors in lower part of box. Record P or F in upper part of box. Passing (P) is 100 (or more) wpm with 2 or fewer errors.

### Test

Record number of errors. See Test Summary Sheet (Appendix I) for passing criteria.

For all categories, circle any non-passing mark.

For more details, see pages 40, 55, 58, and 65 of this guide.

Reading Mastery Grade 3  Teacher's Guide  145
MAP FOR SPECIAL PROJECT
AFTER LESSON 10

Reading Mastery Grade 3  Teacher’s Guide
Grade 3, Letter 1

To the family of ________________

This school year your child is enrolled in the Reading Mastery Signature Edition program. Reading Mastery Signature Edition, Grade 3 will help your child continue to improve upon the reading skills needed to succeed in school. Faster reading and more accurate word identification are two big areas your child will work on this year. Also, more silent reading practice will help your child become a better independent reader. Your child will be involved in research activities that require finding, reading, and using information to answer questions. And best of all, your child will learn about reading and why it is a useful tool that brings success in school work and enjoyment beyond the classroom.

In Reading Mastery Signature Edition, Grade 3, your child will continue to develop the ability to “read to learn.” That means your child will be able to read with better understanding in subjects such as science and social studies. In addition, your child will work on important writing and language arts skills.

The best thing you can do this year is to let your child know that the work done in Reading Mastery Signature Edition, Grade 3 is very important. Encourage your child to read something at home every day. Remind your child “the more you read, the better reader you will be.”

If you have any questions or want more ideas about how to help your child with reading this year, please call me at the school. I’ll be happy to talk with you.

Thank you,

__________________________
Grado 3, Carta 1

Para la familia de ________________

Este año escolar su hijo está inscrito en el programa Reading Mastery Signature Edition. Reading Mastery Signature Edition, Grado 3 ayudará a su hijo a mejorar sus destrezas de lectura necesarias para triunfar en la escuela. Dos áreas importantes en las que su hijo trabajará este año son lectura más rápida e identificación de palabras más precisa. También la práctica de la lectura en silencio ayudará a su hijo a ser un mejor lector independiente. Su hijo estará involucrado en actividades de investigación que requerirán búsqueda, lectura y uso de información para responder preguntas. Y lo mejor de todo es que su hijo aprenderá acerca de la lectura y por qué es una herramienta útil que lleva al éxito en el trabajo escolar y del placer más allá del salón de clases.

En Reading Mastery Signature Edition, Grado 3, su hijo continuará desarrollando la destreza de “leer para aprender”. Eso significa que su hijo podrá leer con un mejor entendimiento en materias como ciencias y estudios sociales. Además trabajará en destrezas de escritura y artes del lenguaje importantes.

Lo mejor que usted puede hacer este año es dejar que su hijo sepa que el trabajo que hace en Reading Mastery Signature Edition, Grado 3, es muy importante. Anímelo a leer algo en la casa diariamente. Recuérdelle a su hijo que “mientras más lea, un mejor lector será”.

Si tiene alguna pregunta o quiere más ideas acerca de cómo ayudar a su hijo con la lectura este año, por favor llámeme a la escuela. Me encantará hablar con usted.

Gracias,

______________________________
Grade 3, Letter 2

To the family of ________________

Your child has completed lessons of *Reading Mastery Signature Edition*, Grade 3. Every day your child has worked on skills needed to read faster and more accurately. Your child is now a better independent reader and is able to find, read, and use information to answer questions and complete research assignments in other school subjects. These are important skills that will lead to success next year in school and in all the years to come.

During this break in the school year, encourage your child to read something every day. Remind your child “the more you read, the better reader you will be.” Tell your child you are proud of the progress made in school.

If you have any questions or want more ideas about how to help your child with reading during this break in the school year, please call me at the school. I’ll be happy to talk with you.

Thank you,

*Reading Mastery Grade 3*  Teacher’s Guide  149
Grado 3, Carta 2

Para la familia de ________________

Su hijo ha terminado lecciones de Reading Mastery Signature Edition, Grado 3. Cada día su hijo ha trabajado en las destrezas necesarias para leer más rápido y con más precisión. Su hijo es ahora un mejor lector independiente y puede encontrar, leer y utilizar información para responder preguntas y completar trabajos de investigación en otras materias. Éstas son destrezas importantes que conducirán al éxito en el próximo año escolar y en los años venideros.

Durante este receso del año escolar, anime a su hijo a leer algo diariamente. Recuérdale que “mientras más lea, un mejor lector será”. Dígale que usted está orgulloso de su progreso en la escuela.

Si usted tiene preguntas o quiere más ideas acerca de cómo ayudar a su hijo con la lectura durante este receso del año escolar, por favor llámeme a la escuela. Me encantará hablar con usted.

Gracias,

Student worksheets 21 ............ 157
Teacher presentation book 21 ..... 158
Spelling presentation book 21 .... 164
You have read about a big storm cloud. Here are facts about clouds:

- Clouds are made up of tiny drops of water.
- In clouds that are very high, the water drops are frozen. Here is how those clouds look.
- Some kinds of clouds may bring days of bad weather. These are low, flat clouds that look like bumpy blankets.
- Some clouds are storm clouds. They are flat on the bottom, but they go up very high. Sometimes they are five miles high.
The arrows in picture 3 show how the winds move inside a storm cloud. The winds move water drops to the top of the cloud. The drops freeze. When a drop freezes, it becomes a tiny hailstone. The tiny hailstone falls to the bottom of the cloud. At the bottom of the cloud, the tiny hailstone gets covered with more water. Then it goes up again and freezes again. Now the hailstone is a little bigger. It keeps going around and around in the cloud until it gets so heavy that it falls from the cloud. Sometimes it is as big as a baseball. Sometimes it is smaller than a marble.

If you want to see how many times a hailstone has gone to the top of the cloud, break the hailstone in half. You’ll see rings. Each ring shows one trip to the top of the cloud. Count the rings and you’ll know how many times the hailstone went through the cloud. Hailstone A went through the cloud three times.

How many times did Hailstone B go through the cloud?

---

**The Killer Whales Wait**

Oomoo took off one of her boots. She kneeled down and slammed the boot against the surface of the ice. The boot made a loud spanking sound. Oolak watched for a moment, then took off one of his boots and slapped it against the surface of the ice. “Maybe they’ll hear this,” Oomoo said. “I hope they do,” she added. But she knew that it was still raining a little bit and that the rain made noise. She also knew that she and Oolak were far from shore—too far. They were more than a mile from the tent. She guessed that the sounds they made with their boots were lost in the rain and the slight breeze that was still blowing from the south.

From time to time, Oomoo glanced to the ocean. She hoped that she would see the killer whales
moving far away. She hoped that the sound of the boots would scare them away. But each time she looked in their direction, she saw them moving back and forth, just past the top of the C-shaped ice floe.

Suddenly, Oolak tugged on Oomoo’s shoulder and pointed toward the whales. His eyes were wide. He looked as if he was ready to cry. “I know,” Oomoo said. Her voice was almost a whisper. “Just keep trying to signal,” she said. “Maybe the people on the shore will hear us.”

As she pounded her boot against the surface of the ice, she stared toward the shore. She wanted to see a kayak moving silently through the rain. She wanted to hear the signal of a bell ringing. She wanted to . . . .

Suddenly, she saw something white moving through the water. At first, she thought that it was a chunk of ice. But no, it couldn’t be. It was not moving the way ice moves. It was very hard to tell what it was through the light rain. It wasn’t a kayak. It wasn’t a long boat. It was . . . Usk.

Usk was swimming directly toward the ice chunk. And he was moving very fast.

“Usk!” Oomoo yelled as loudly as she could. “Usk!” She stood up and waved her arms.

The huge polar bear caught up to the ice chunk when it was not more than a hundred meters away from the killer whales. “Will they go after Usk?” Oolak asked.

“They’ll go after Usk if they’re hungry,” Oomoo replied. “We’ve got to get out of here fast.”

The huge bear swam up to the ice chunk, put his huge paws on the surface, and started to climb onto it. When he tried that, he almost tipped it over.

“No,” Oomoo said. “Stay down.” She tried to push him back. He rolled into the water and made a playful circle. “Give me your laces,” Oomoo said to Oolak. Oomoo and Oolak untied the laces from their boots. These laces were long, thick straps of animal skin. Oomoo tied all the laces together. Quickly, she glanced back. The ice chunk was less than a hundred meters from the killer whales.

She called Usk. He playfully swam around the ice chunk, rolling over on his back and slapping the water with his front paws. Oomoo waited until Usk got close to the shore side of the ice chunk. Then she slipped the laces around his neck. “Hang on tight,” she told Oolak, and handed him one end of the laces. She and Oolak sat down on the ice chunk and tried to dig
their heels into dents in the surface of the ice. “Play sled,” she told Usk. “Play sled. Go home.”

At first, Usk just rolled over and almost got the laces tangled in his front paws. “Home,” Oomoo repeated. “Play sled and go home.”

Usk stayed next to the ice chunk, making a playful sound. “Home,” Oomoo shouted again.

Then Usk seemed to figure out what he was supposed to do. Perhaps he saw the fins of the killer whales. He got low in the water and started to swim toward shore.

---

D Number your paper from 1 through 12.

**Story Items**

1. What were Oomoo’s boot laces made of?
2. What did Oomoo do with the laces after she tied them together?
3. What did she want Usk to do?
4. Did Usk immediately understand what he was supposed to do?
5. What did Usk start doing at the end of the story?
**Review Items**

6. The map shows a route. What state is at the north end of the route?
7. What country is at the south end of the route?
8. About how many miles is the route?

9. Female animals fight in the spring to protect __________.
10. Name 2 kinds of Alaskan animals that are dangerous in the spring.
11. Is it easier to fly alone or with a large flock?
12. Flying near the back of a large flock is like riding your bike __________.
   - with the wind
   - against the wind
Name ____________________________

A

1. What are clouds made of? __________________________
2. What kind of cloud does picture A show? ________________
3. Write the letter of the clouds that may stay in the sky for days at a time. _____
4. Write the letter of the storm clouds. ______________________
5. Write the letter of the clouds that have frozen drops of water. __________
6. Write the letter of the clouds that may be five miles high. __________
7. Look at cloud A. At which number does a drop of water start? __________
8. What happens to the drop at the number 2? ____________
9. Draw 2 arrows on cloud A to show how a hailstone forms and returns to 1.

10. If you break a hailstone in half, what will you see inside the hailstone? __________
11. The picture shows half of a hailstone. How many times did the stone go through a cloud? __________

B  Story Items

12. Oomoo slapped her boot on the ice to make noise. Why did she want the people on shore to hear the noise? __________________________
13. Why did she want the killer whales to hear the noise? __________________________
14. Was Oomoo sure that someone would hear her? ________________
15. About how far was the ice chunk from the tent? _______________

Review Items

17. Write north, south, east and west in the correct boxes.
18. In which direction is ocean current J moving? ________________
19. In which direction is ocean current K moving? ________________
20. Which direction is the wind coming from? ________________
21. Make an arrow above ice chunk L to show the direction the current will move the ice chunk.
22. Make an arrow above ice chunk M to show the direction the current will move the ice chunk.

GO TO PART D IN YOUR TEXTBOOK.
EXERCISE 1

Vocabulary

a. Find page 352 in your textbook.
   • Touch sentence 4.
   • This is a new vocabulary sentence. It says: The smell attracted flies immediately. Everybody, say that sentence. Get ready. (Signal.) The smell attracted flies immediately.
   • Close your eyes and say the sentence. Get ready. (Signal.) The smell attracted flies immediately.
   • (Repeat until firm.)

b. The smell attracted flies. If the smell attracted flies, the smell really interested the flies and pulled them toward the smell. Everybody, what word means really interested the flies? (Signal.) Attracted.

c. The sentence says the smell attracted flies immediately. Immediately means right now. Everybody, what word means right now? (Signal.) Immediately.

d. Listen to the sentence again: The smell attracted flies immediately. Everybody, say that sentence. Get ready. (Signal.) The smell attracted flies immediately.

e. What word means really interested the flies? (Signal.) Attracted.
   • What word means right now? (Signal.) Immediately.

EXERCISE 2

Reading Words

Column 1

a. Find lesson 21 in your textbook.
   • Touch column 1.
   • (Teacher reference:)

1. mukluks
2. wrist
3. hailstone
4. playfully

b. Word 1 is mukluks. What word? (Signal.) Mukluks.
   • Spell mukluks. Get ready. (Tap for each letter.) M-U-K-L-U-K-S.
   • Mukluks are very warm boots that Eskimos wear.

c. Word 2 is wrist. What word? (Signal.) Wrist.
   • Spell wrist. Get ready. (Tap for each letter.) W-R-I-S-T.
   • Your wrist is the joint between your hand and your arm. Everybody, touch your wrist.

f. Let’s read those words again, the fast way.
   • Word 1. What word? (Signal.) Mukluks.
   • (Repeat for words 2–4.)
   • (Repeat step f until firm.)

c. Word 2 is wrist. What word? (Signal.) Wrist.
   • Spell wrist. Get ready. (Tap for each letter.) W-R-I-S-T.
   • Your wrist is the joint between your hand and your arm. Everybody, touch your wrist.

f. Let’s read those words again, the fast way.
   • Word 1. What word? (Signal.) Mukluks.
   • (Repeat for words 2–4.)
   • (Repeat step f until firm.)

Column 2

h. Find column 2.
   • (Teacher reference:)

1. gulped
2. gently
3. owed
4. wavy
5. kneeled
6. dents

i. All these words have an ending.

   • When you gulp something, you swallow it quickly. Here’s another way of saying She swallowed the water quickly: She gulped the water.
   • What’s another way of saying They swallowed their food quickly? (Signal.) They gulped their food.
   • Word 2. What word? (Signal.) Gently.
   • Things that are gentle are the opposite of things that are rough. Everybody, what’s the opposite of a rough touch? (Signal.) A gentle touch.
   • What’s the opposite of someone who behaves roughly? (Signal.) Someone who behaves gently.
   • (Repeat until firm.)

   • Something that you owe is something that you must pay. If you owe five dollars, you must pay five dollars. If you owe somebody a favor, you must pay that person a favor.
• Word 4. What word? (Signal.) Wavy.
(Repeat for: 5. kneeled, 6. dents.)

k. Let’s read those words again, the fast way.
• Word 1. What word? (Signal.) Gulped.
(Repeat for: 2. gently, 3. owed, 4. wavy, 5. kneeled, 6. dents.)

l. (Repeat step k until firm.)

Column 3
m. Find column 3. ✔
• (Teacher reference:)

1. rose 3. marble
2. sight 4. dove

• Something that moves up today rises.
Something that moved up yesterday rose. Everybody, what do we say for something that moves up today?
(Signal.) Rises.
• What do we say for something that moved up yesterday? (Signal.) Rose.

• A sight is something you see. A terrible sight is something terrible that you see.
Everybody, what do we call something wonderful that you see? (Signal.) A wonderful sight.

Word 3. What word? (Signal.) Marble.
Word 4 rhymes with stove. What word?
(Signal.) Dove.

o. Let's read those words again.
• Word 1. What word? (Signal.) Rose.
• (Repeat for words 2–4.)

p. (Repeat step o until firm.)

Individual Turns
(For columns 1–3: Call on individual students, each to read one to three words per turn.)

EXERCISE 3

Story Background
a. Find part B in your textbook. ✔
• You’re going to read the next story about Oomoo and Oolak. First, you’ll read the information passage. It gives some facts about clouds.

b. Everybody, touch the title. ✔
• (Call on a student to read the title.) [Facts About Clouds.]

• Everybody, what’s the title? (Signal.) Facts About Clouds.

(c. (Call on individual students to read the passage, each student reading two or three sentences at a time. Ask the specified questions as the students read.)

Facts About Clouds
You have read about a big storm cloud. Here are facts about clouds:
Clouds are made up of tiny drops of water.

• Everybody, say that fact. Get ready.
(Signal.) Clouds are made up of tiny drops of water.

In clouds that are very high, the water drops are frozen. Here is how those clouds look.

Picture 1
Picture 2

• Everybody, in what kind of clouds are the water drops frozen? (Signal.) In clouds that are very high. ✔

• Touch a high cloud. ✔ VA

• Those clouds are very pretty in the sunlight because the light bounces off the tiny frozen drops.

Some kinds of clouds may bring days of bad weather. These are low, flat clouds that look like bumpy blankets.

• Everybody, what kind of clouds may bring days of bad weather? (Signal.) Low, flat clouds.

• Does that kind of cloud pass over quickly? (Signal.) No. ✔

• Touch a low, flat cloud. ✔ VA

• How long may that kind of cloud be around? (Call on a student. Idea: Days.)

Some clouds are storm clouds. They are flat on the bottom, but they go up very high. Sometimes they are five miles high.
Tell me how a storm cloud looks. (Call on a student. Idea: It’s flat on the bottom and it goes up very high.)

Everybody, how high is the top of a big storm cloud sometimes? (Signal.) Five miles.

The arrows in picture 3 show how the winds move inside a storm cloud. The winds move water drops to the top of the cloud.

Everybody, touch the number 1 that is inside the cloud.

That’s where a drop of water starts. The wind blows it up to the top of the cloud. Everybody, follow the arrow to the top of the cloud and then stop.

Tell me about the temperature of the air at the top of the cloud. Get ready. (Signal.) It’s freezing cold.

So what’s going to happen to the drop? (Call on a student. Idea: It will freeze.)

The drops freeze. When a drop freezes, it becomes a tiny hailstone.

Everybody, what do we call a drop when it moves up and freezes? (Signal.) A tiny hailstone.

The tiny hailstone falls to the bottom of the cloud.

Everybody, touch the number 2 in the cloud.

That’s where the drop freezes. Now it falls down. Everybody, follow the arrow down.

What’s the temperature like at the bottom of the cloud? (Signal.) It’s warm.

At the bottom of the cloud, the tiny hailstone gets covered with more water. Then it goes up again and freezes again.

Everybody, when it gets to the top of the cloud, what’s going to happen to the water that is covering it? (Signal.) It will freeze.

Now the hailstone is a little bigger. It keeps going around and around in the cloud until it gets so heavy that it falls from the cloud. Sometimes it is as big as a baseball. Sometimes it is smaller than a marble.

Everybody, touch the number 1 in the cloud.

Pretend that your finger is a drop. Show me a drop that goes around inside the cloud four times. Each time it goes through the top of the cloud, say: “It freezes.” Go.

If you want to see how many times a hailstone has gone to the top of the cloud, break the hailstone in half. You’ll see rings.

Everybody, what will you see inside the hailstone? (Signal.) Rings.

Each ring shows one trip to the top of the cloud. Count the rings and you’ll know how many times the hailstone went through the cloud. Hailstone A went through the cloud three times.

The rings are numbered. Everybody, count the rings in hailstone A out loud, starting with the center circle. Get ready. (Signal.) One, two, three.

How many times did Hailstone B go through the cloud?

Everybody, figure out the answer. Remember to count the outside ring. (Wait.)

How many times? (Signal.) Seven.

**EXERCISE 4**

**Story Reading**

a. Find part C in your textbook.

*The error limit for group reading is 12 errors.*

b. Everybody, touch the title.

* (Call on a student to read the title.) [The Killer Whales Wait.]

Everybody, what’s the title? (Signal.) The Killer Whales Wait.
• Where were Oolak and Oomoo when we left them? (Call on a student. Idea: Floating on an ice chunk.)

  (Call on individual students to read the story, each student reading two or three sentences at a time. Ask the specified questions as the students read.)

  • (Correct errors: Tell the word. Direct the student to reread the sentence.)
  • (If the group makes more than 12 errors, direct the students to reread the story.)

  The Killer Whales Wait

  Oomoo took off one of her boots. She kneeled down and slammed the boot against the surface of the ice.

  • Why do you think she was doing that? (Call on a student. Idea: She was trying to make noise so someone would hear her.)
  • Why didn’t she yell? (Call on a student. Ideas: She was losing her voice; nobody could hear her.)

  The boot made a loud spanking sound. Oolak watched for a moment, then took off one of his boots and slapped it against the surface of the ice. “Maybe they’ll hear this,” Oomoo said. “I hope they do,” she added. But she knew that it was still raining a little bit and that the rain made noise. She also knew that she and Oolak were far from shore—too far. They were more than a mile from the tent. She guessed that the sounds they made with their boots were lost in the rain and the slight breeze that was still blowing from the south.

  • Everybody, did she think that the people on the shore would hear the sounds? (Signal.) No.
  • About how far away were these people? (Signal.) Over a mile.
  • Why didn’t she think they would hear the signal? (Call on a student. Idea: Because the wind and rain were louder than the signal.)

  From time to time, Oomoo glanced to the ocean. She hoped that she would see the killer whales moving far away. She hoped that the sound of the boots would scare them away. But each time she looked in their direction, she saw them moving back and forth, just past the top of the C-shaped ice floe.

  • How do you think that made her feel? (Call on a student. Idea: Afraid.)

  Suddenly, Oolak tugged on Oomoo’s shoulder and pointed toward the whales. His eyes were wide. He looked as if he was ready to cry. “I know,” Oomoo said.

  • What does she mean when she says, “I know?” (Call on a student. Idea: She knew the whales were there.)

  Her voice was almost a whisper. “Just keep trying to signal,” she said. “Maybe the people on the shore will hear us.”

  • Everybody, had Oolak noticed the whales before? (Signal.) No.
  • Why did he look as if he was ready to cry? (Call on a student. Idea: Because he was afraid of the killer whales.)

  As she pounded her boot against the surface of the ice, she stared toward the shore. She wanted to see a kayak moving silently through the rain. She wanted to hear the signal of a bell ringing. She wanted to...

  • She stopped thinking about those things. I wonder why.

  Suddenly, she saw something white moving through the water.

  • What do you think it is? (Call on individual students. Ideas: Another ice chunk; a boat; an animal; etc.)

  At first, she thought that it was a chunk of ice. But no, it couldn’t be. It was not moving the way ice moves. It was very hard to tell what it was through the light rain. It wasn’t a kayak. It wasn’t a long boat. It was... Usk.
Usk was swimming directly toward the ice chunk. And he was moving very fast.

“Usk!” Oomoo yelled as loudly as she could. “Usk!” She stood up and waved her arms.

The huge polar bear caught up to the ice chunk when it was not more than a hundred meters away from the killer whales. “Will they go after Usk?” Oolak asked.

Everybody, who does he think might go after Usk? (Signal.) The killer whales.

How close are they to the whales now? (Call on a student. Idea: About 100 meters.)

“They’ll go after Usk if they’re hungry,” Oomoo replied. “We’ve got to get out of here fast.”

The huge bear swam up to the ice chunk, put his huge paws on the surface, and started to climb onto it. When he tried that, he almost tipped it over.

Why? (Call on a student. Idea: Because he was so heavy.)

“No,” Oomoo said. “Stay down.” She tried to push him back. He rolled into the water and made a playful circle. “Give me your laces,” Oomoo said to Oolak. Oomoo and Oolak untied the laces from their boots. These laces were long, thick strips of animal skin. Oomoo tied all the laces together. Quickly, she glanced back. The ice chunk was less than a hundred meters from the killer whales.

She called Usk. He playfully swam around the ice chunk, rolling over on his back and slapping the water with his front paws.

What does Usk want to do? (Call on a student. Idea: Play.)

Oomoo waited until Usk got close to the shore side of the ice chunk.

Everybody, which side did he move to? (Signal.) The shore side.

What do you think Oomoo’s going to do? (Call on a student. Idea: Get Usk to help them get back to shore.)

Then she slipped the laces around his neck. “Hang on tight,” she told Oolak, and handed him one end of the laces. She and Oolak sat down on the ice chunk and tried to dig their heels into dents in the surface of the ice.

“Play sled,” she told Usk. “Play sled. Go home.”

Read the rest of the story to yourself. Find out two things. Find out what Usk did at first. Find out something he may have seen that made him stop being playful. Raise your hand when you’re done.

At first, Usk just rolled over and almost got the laces tangled in his front paws. “Home,” Oomoo repeated. “Play sled and go home.”

Usk stayed next to the ice chunk, making a playful sound. “Home,” Oomoo shouted again.

Then Usk seemed to figure out what he was supposed to do. Perhaps he saw the fins of the killer whales. He got low in the water and started to swim toward shore.

(After all students have raised their hands:)

What did Oomoo keep telling Usk to do? (Call on a student. Ideas: Go home; play sled.)

Everybody, did Usk do that at first? (Signal.) No.

What did he do? (Call on a student. Idea: Rolled over.)

What may Usk have seen that made him stop being playful? (Call on a student. Idea: The fins of the killer whales.)

What did Usk do then? (Call on a student. Idea: Swim toward shore.)

Everybody, look at the picture. What are Oomoo and Oolak hanging on to? (Signal.) The laces.

Point on the picture to show the direction Usk is moving.
EXERCISE 5

Paired Practice
You’re going to read aloud to your partner. Today the B members will read first. Then the A members will read from the star to the end of the story. (Observe students and give feedback.)

End-of-Lesson Activities

INDEPENDENT WORK
Now finish your independent work for lesson 21. Raise your hand when you’re finished. (Observe students and give feedback.)

WORKCHECK
a. (Direct students to take out their marking pencils.)
• We’re going to check your independent work. Remember, if you got an item wrong, make an X next to the item. Don’t change any answers.

b. (For each item: Read the item. Call on a student to answer it. If the answer is wrong, say the correct answer. Refer to the Answer Key for the correct answers.)

c. Now use your marking pencil to fix up any items you got wrong. Remember, all mistakes must be fixed up before you hand in your independent work.

SPELLING
(Present Spelling lesson 21 after completing Reading lesson 21. See Spelling Presentation Book.)

ACTIVITIES
(Present Activity 2 after completing Reading lesson 21. See Activities across the Curriculum.)

Note: A special project occurs after lesson 22. See page 128 for the materials you’ll need.
EXERCISE 1

Consonant Patterns
a. (Write on the board:)

-ack  -eck  -ick  -ock  -uck

b. These are word endings that you need to pronounce correctly.
   • I’ll say each ending: -ack, -eck, -ick, -ock, -uck.
   • Listen again: -ack, -eck, -ick, -ock, -uck.

c. Now read the endings one at a time.
   • First ending? (Signal.) -ack.
   • Next ending? (Signal.) -eck.
   • Next ending? (Signal.) -ick.
   • Next ending? (Signal.) -ock.
   • Next ending? (Signal.) -uck.

d. (Call on individual students to read the endings.)

EXERCISE 2

Homonyms
a. Everybody, spell the word meet that refers to getting together with someone. Get ready. (Signal.) M-E-E-T.
b. Spell the word meat that refers to something you can eat. Get ready. (Signal.) M-E-A-T.
c. Spell the word weak that means not strong. Get ready. (Signal.) W-E-A-K.
d. Spell the word week that means seven days. Get ready. (Signal.) W-E-E-K.

EXERCISE 3

Spelling Review
*(Use context sentence for meat.)*
a. You’re going to write words on lined paper. Number your paper from 1 through 5.
   ✔
b. Word 1 is thought.
   • Write the word thought. ✔
c. Word 2 is meat.
   • Write the word meat. ✔
d. Word 3 is lightest.
   • Write the word lightest. ✔
e. Word 4 is schools.
   • Write the word schools. ✔
f. Word 5 is tough.
   • Write the word tough. ✔
g. Check your work. ✔ Make an X next to any word that is wrong.
   • (Repeat for: 2. meat, 3. lightest, 4. schools, 5. tough.)
