Reinventing Professional Learning

Preparing Educators for Today’s Learners

Standards are changing. Classrooms are evolving. New technology is emerging.

Evolving standards and technologies are impacting our classrooms — and educators need to keep up with these changes. To help with this transition, Redbird Professional Learning integrates the best practices of highly effective training into on-demand courses and in-person workshops. Developed in collaboration with the Graduate School of Education at Stanford University, Redbird Professional Learning offers engaging and innovative professional development that reimagines how teachers learn.

Digital education developed by Stanford University
Harness the Power of Technology-Enhanced Professional Learning Courses

Redbird Professional Learning offers a flexible, innovative approach to professional learning. Drawing upon the best practices and research from Stanford University, Redbird Professional Learning helps school and district leaders develop and deliver highly effective learning environments for today’s educators.

Research-Proven Best Practices

Redbird Professional Learning combines training best practices with proven learning strategies, such as:

- Duration distribution that provides over 14 hours of training on your schedule.
- Simulations featuring practice exercises and activities.
- Peer and expert coaching and collaboration.
- Technology-enhanced learning available anytime, anywhere.

Optimized for Virtual Learning

Highly engaging, multi-modal experience allows educators to learn at their own pace.

- Experience hands-on, project-based learning.
- Participate in collaborative, social learning.
- Access quick, 20-30 minute course segments.
- Receive guidance from experts.
- Access to a multitude of curated content: videos, digital resources, interactive activities, text, and more.

Real Time Progress Monitoring for Administrators

Ensure your district’s educators are thriving by using the robust Administrators’ Dashboard to track:

- Time of use.
- Social engagement levels.
- Learning progress and assessments.
- Shifts in mindset.
Our Experts Building Your Experts

In addition to digital courses on blended learning and technology, Redbird Professional Learning also offers workshops and services to provide educators of all levels with additional support.

**Redbird Professional Learning Workshops**
Empower your educators and expand their expertise as you incorporate blended learning in your school or district with in-person training sessions from one of our specialists.

**Redbird Professional Learning Services**
Our experts are ready to support the implementation of blended learning in your school or district with coaching and consultation services.

Innovative Courses Focused on Blended Learning and Technology

**Experience Blended Learning**
Exposes educators to the principles, practices and instructional benefits of blended learning. Explores how to effectively integrate technology into the classroom and use data to improve instruction.

**Project-Based Learning Approach**
Gain hands-on experience by creating project-based learning activities. Learn how to implement project-based learning in the classroom while setting clear expectations for students and providing meaningful feedback.

**Google Apps for Education™ Program**
Learn the fundamentals of the Google Apps for Education™ Program and prepare for the GAFE Level 1 Certification exam.

**Microsoft Office 365**
Learn the fundamentals of Microsoft Office 365 suite of tools. The course provides an opportunity to understand how these tools can help transform the classroom into a 21st century digital learning environment.
Our Guiding Principles

Professional Learning should:

• Be driven by research and best practices.
• Engage teachers in authentic learning through hands-on practice.
• Directly connect to student achievement.
• Focus on tangible, practicable skills.
• Continually build local capacity and expertise.

Learn more about how Redbird Professional Learning can help your district develop highly effective learning environments for today’s students.
