This supplement to *Language for Learning* is a resource that will help you prepare children for the Florida Comprehensive Assessment Test. The skills and formats included in this supplement reflect the Sunshine State Standards. The content is based on the lessons in the *Language for Learning* program.

The following practice tests may be used after lesson 41 in *Language for Learning*. Present the practice tests sometime during each five-lesson span, beginning with lessons 41–45.

Each test provides instruction and script for you to use in administering the test. Each test also includes a page to be duplicated for children. If an item is difficult, you may repeat it before children mark their answers.

After children have completed a test, use the Answer Key to score their work. This Answer Key is used with lessons 96–150. The results of the assessment, in combination with other formal and informal assessment information, will allow you to develop instructional strategies to help children master the Sunshine State Standards and do their best on the Florida Comprehensive Assessment Test.

Listen carefully to this story. I will ask you questions about it when I have finished.

The weather was very hot and sunny. Janine and Travis decided to walk to the city pool for a swim. First they met Chad. “Come with us to the pool,” they said. So Chad joined them. Next they met Mary. “Come with us to the pool,” they said. So Mary joined them. Last they met Mary’s dog Duke. “Go home, Duke. You cannot go to the pool,” they all cried.
