Grade 3

SRA Snapshots Video Science™ consists of four interdependent components. Each level has four program DVDs that provide engaging video lessons. The student edition (SE) provides student friendly text that reinforces the concepts introduced in the video. The Teacher’s Resource Book (TRB) provides support activities in a blackline master format. The Teacher’s Guide (TG) provides lesson planning, differentiated instruction activities, and answers to all student activities in the Student Edition.

By studying the Earth from both a historical and current time frame, student can make informed decisions about issues affecting the planets on which they live.
