

# The PS-501

StreamVu Ed's  
Producer Station is a  
complete TV studio in  
a box!

## Built for Schools

You don't have to be a video expert, have a studio with expensive broadcast cameras, or even know your way around professional video production equipment to create stunning broadcasts.

## Easy to Set Up

Setting up the PS-501 is simple. All-in-one design with familiar ports and plugs. No complicated software installation or hardware configuration. Ready to go live right out the box!

## All in One Box

The most complete creative toolset available lets you create and deliver amazing presentations to all screens and any size audience. Switch cameras, build playlists, add graphics, mix audio, and dazzle with virtual sets.

## StreamVu Ed's Producer Station

If you ever wanted to create and publish video, stream live across your school's campus, or extend your reach and go off-campus, then you will love the StreamVu Ed PS-501. Designed for ease-of-use in K-12 Education, your school can achieve network television quality without breaking the bank. Best of all, with StreamVu Ed the PS-501 comes pre-configured for your school complete with branding and virtual sets. You can even select the input sources best for your need.

Whether you're new to video, adding or expanding media production activities, or searching for a practical way to produce a multi-camera video program, no other solution will get you where you want to be like the StreamVu PS-501. From the streamlined design to the familiar cable connections, getting your content online and in front of your audience so beautifully has never been faster or easier!

Don't let the price and simplicity fool you, the PS-501 delivers the performance and professional quality that you need to make your broadcast and video productions stand out.

# Features

---

## Live Streaming & Recording

You can live stream at different resolutions and record video in different formats completely integrated with StreamVu Ed.

## Graphics / Overlays / Videos / PowerPoint

Incorporate graphics such as lower thirds, graphs, charts, photos, announcements, and more using vMix or other software like Photoshop or Paintbrush Pro. Graphics can be used as overlays and easily added to a production along with videos and PowerPoint slides.

## Incorporate Video, Photos, and More from a 2nd PC

Video (live or recorded), photos, and other materials can be added to the production from a remote PC on the same network using the exclusive vMix Desktop Capture application (included).

## Supports up to 4 monitors

Supports up to 4 monitors with DVI-I (1), HDMI (1) and DisplayPort (3) connections.

## Incorporate Skype/Zoom Guests into a Production

Video and audio from Skype or Zoom live video conferencing systems can be included to bring remote guest speakers into the production from this PC or from a 2nd PC.

## Includes NDI for video/audio transport between the Producer Station and other PCs

NDI (Network Device Interface) is a protocol that allows HD video and audio to be transported over a Gigabit network to any other PC on the network. This allows cameras or microphones attached to remote PCs to be brought in as part of a live production.

## User Upgradeable

The Producer Station can be upgraded with additional capture cards for more camera inputs or different input types.

## PC Specifications

240GB SSD as main drive with 1TB HDD for storage, 16GB RAM, 750W power supply, Nvidia GeForce GTX 960 4GB video card, Windows 10 Pro, Blu-ray DVD burner.

## 3-Year Warranty

The PS-501 has a three-year parts and labor warranty, unlimited tech support for one year, and free vMix updates for one year.
