

StreamVuEd

The market leading provider of K-12 education video services.

School Channels

Live channels for Morning Announcements, Graduation, or other special events.

IPTV Service

Live IPTV throughout the whole school to all devices, wired and wireless.

Video On Demand

Store videos in a shared Media Library or on a personal Teacher Page for later use.

Virtual Classroom

Live virtual learning platform with recording for teachers and students.

The complete solution for online video and learning in today's K-12 environment.

Better Technology

We keep up with the latest technology so you don't have to.

Easy to Use

Our intuitive platform is easy to use by both teachers and students.

Better Results

Use the best option to ensure the best results for everyone.

IPTV

StreamVu Ed understands how users get content and the devices they use, that's why we take a hybrid technology approach to live streaming leveraging multiple video formats and our proprietary software to ensure the very best viewer experience on all devices, wired or wireless, in or out of the school.

On & Off Campus

Keep live streams within the school or push off campus at any time.

Record & Store

Record live streams using the EPG to use as an asset later.

Wired & Wireless

Watch live streams on all devices, wired or wireless.

StreamVu Ed gives you the option to broadcast on and/or off campus. For example, broadcast your school board meeting or graduation to the community. In many cases IPTV starts at a district level with designated channels delivered down to schools. Let viewers know what's playing with a full Electronic Program Guide.

At the school level we add in local school channels specific to that school that becomes the channel line-up that the students, teachers, and staff experience. Local school channels on IPTV are a great way to students engaged with daily Morning Announcements. With StreamVu Ed students enjoy a TV broadcast experience.

Virtual Classroom

Built specifically for K-12, StreamVu Ed's Virtual Classroom delivers the most secure Virtual Learning experience in the industry. From protecting student images to meeting FERPA & ADA compliance, StreamVu Ed puts the teacher in control. Our technology ensures the highest quality broadcast requiring less bandwidth than traditional video conferencing services.

Live Classes

Unlimited live virtual classes between teacher and their students.

Record & Store

Record the class and store or download for later use.

Student Safety

Student images and messages are always protected.

Video On Demand

Video on Demand allows teachers to store and share learning assets. Publish to a shared Media Library or to a personal Teacher Page. Create embed links to place on a website or share directly to individuals. Full viewer analytics are available for all videos as well as the ability to restrict viewer access and all videos are automatically captioned.

Closed Captions

Videos are automatically captioned and can then be translated.

Sharing

Share to a Media Library, a personal Teacher Page, or externally.

Bookmarking

Bookmark videos to highlight key points or mark chapters.

One of the greatest uses of technology today is anytime learning or, asynchronous learning. The power of asynchronous learning is the subject matter is available when the students need, schedule and opportunity meet. StreamVu Ed allows teachers to record class sessions and upload into their media library where the recordings receive automated closed captions. Even outside video that a teacher identifies for a class can be uploaded and made available. A key feature with StreamVu Ed is student/viewer analytics, teachers have access to reporting on who viewed, when, and how long.

Digital Signage

Seamless integration with StreamVu Ed's video solutions enables live channels and video to be quickly incorporated into impactful signage screens that engage, communicate and inspire. Designed for ease of use signage points can be updated quickly and remotely.

Share Relevant Information

Display live news updates and messages such as digital menu boards in the lunchroom or promote school events and activities.

Emergency Messaging

Instantly communicate warnings and special instructions to students, staff and visitors in an emergency.

Student & Staff Engagement

Live stream video-based morning announcements directly into classrooms to make communication more impactful.
