# edoome.

Edoome is a learning management platform that turns your classroom into an online community, allowing teachers, students and parents to communicate and collaborate in a safe and secure way.

Improve communication with your school community

We maximize communication between directors, teachers, students and parents. We improve the communication towards families, increasing their commitment with their children and help to coordinate the labour of the teacher´s corps.

Easy to use

We know a lot of teachers are not used to educational technologies. Edoome is specially designed to ease its application thanks to a simple and familiar interface that looks a lot like the most popular social networks.

Reduce the teacher's workload

We help 85% of our teachers by saving precious time on a weekly base. One third of those teachers claims they save 2 hours or more. One of our prime objectives is to improve our teacher´s quality of life by supporting them in processes like grading, collecting papers and planning.

You became a teacher to change lives, Edoome is here to change yours.

Who is using Edoome?

Ministry of Education of Chile

Through Edoome they distribute educational content, manage online assignments and improve communication in 300 public schools. Due to the program´s success, in 2015, the Ministry added an additional 1700 schools, meaning Edoome is active in approximately 15% of all the schools in Chile.

Educational Consultancy Firm: Juega+

In a joint-task force between Juega+, 3M and Edoome a Massive Open Online Course (MOOC) about creativity and innovation was created for the very first time in Edoome´s history. Throughout Chile 50 schools and 5800 students took the course. This was a very special and unique project.
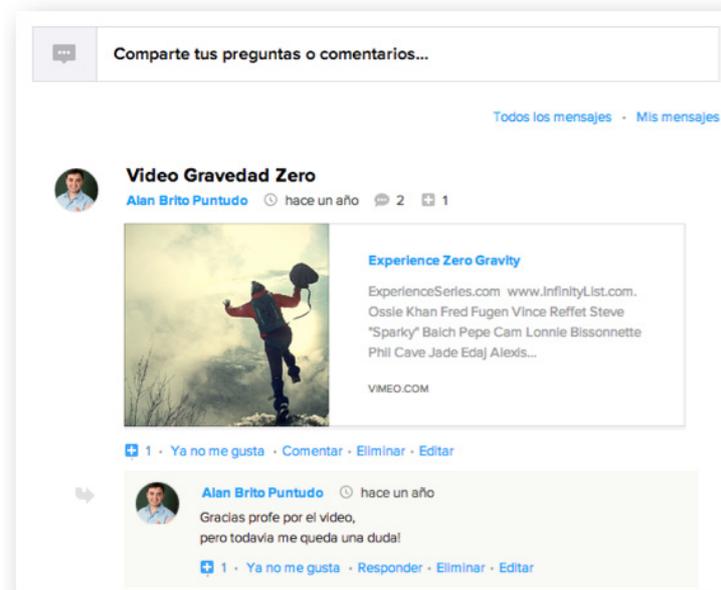

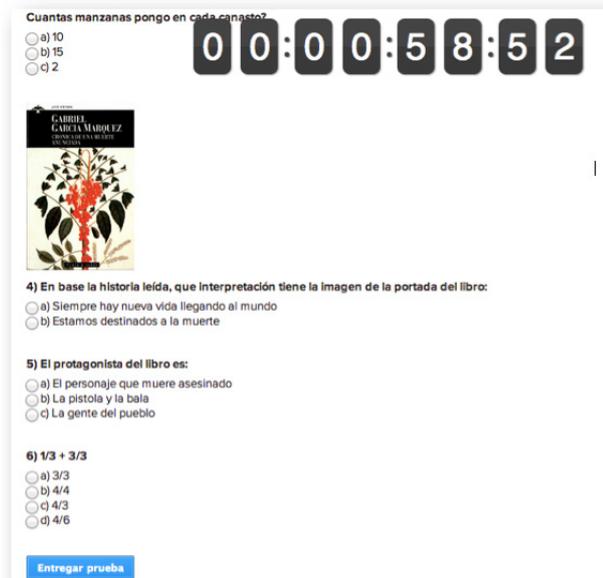

Teachers from all over the world

More than 170.000 users already prefer using Edoome to make their jobs simpler.

You became a teacher to change lives, Edoome is here to change yours.

Main Features

Create quizzes and performance reports

Allows you to create online quizzes and get the results immediately. Each student receives a unique randomized quiz, mixing the order of the questions and their answers. You will also receive a report about your students' academic performance and see if they meet the learning objetives.*

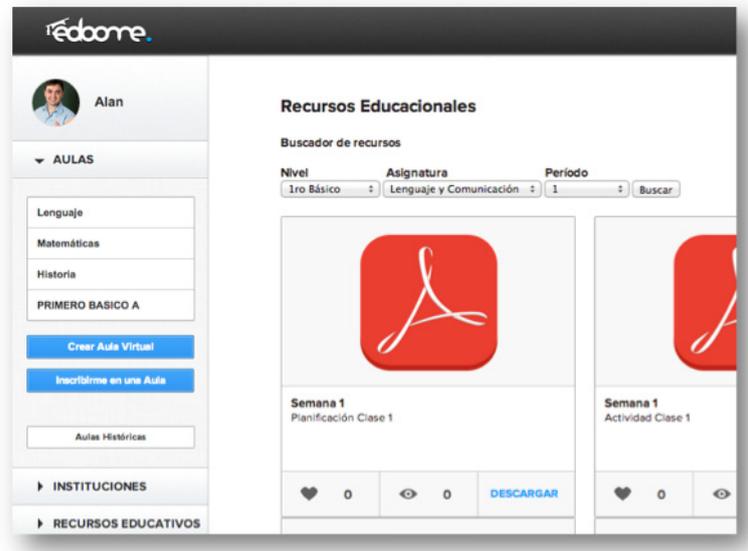

Messaging between teachers, students and parents

Send messages to your entire institution, to students or parents from a particular course or create groups according to the communicational necessities of your school

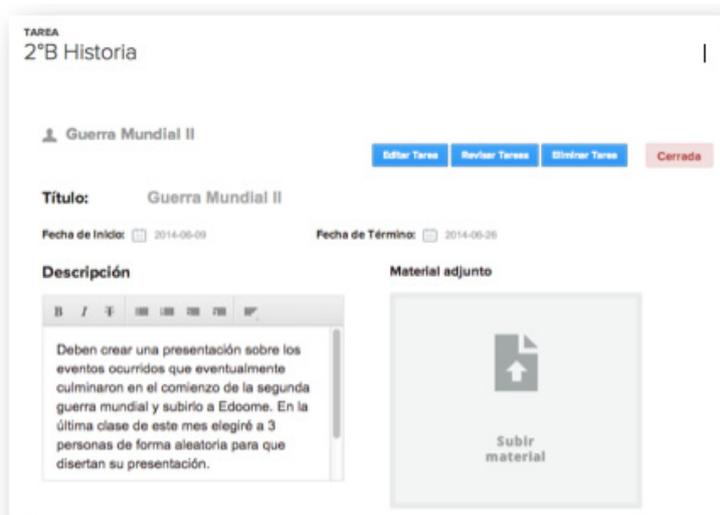

You became a teacher to change lives, Edoome is here to change yours.

Educational resourses

Organize all your educational material (schedules, activities and evaluations) in a personal library. You will be allowed to share resources with other teachers belonging to the same institution or with the others belonging to the Edoome network.

Organize assignment delivery

Centralize the delivery of all your class assignments in a single place. Teachers no longer need to carry a lot of paperwork and worry if they might lose something. Everything is neatly ordered and backed up on the platform.

Cutting-Edge Technology

We work with the latest technologies available on the market. The whole system is cloud based. This means that it doesn't require installing software or updates, nor investing in infrastructure such as local servers. We are taking care of daily backups of all the information in Edoome and our infrastructure is ISO-27001 certified..

Trainings

We offer one of the best online experiences thanks to our friendly and intuitive interface. This allows teachers and students to quickly adapt to Edoome. Each institution can decide if they want to receive official training in the use of our platform.

Constant support

Ours users can solve their doubts and questions through our support channels: telephone, Skype and e-mail. On a daily basis we meet the support needs of 170.000 users of Edoome.
