

The Captioning Solutions Company

File-Based Post-Production Captioning Solutions

CCPlay FilePro

CCPlay FilePro is a highly efficient post production software encoding tool for closed captioning in MPEG-2, MPEG-4, MXF Op1A, MXF AS-02, QuickTime MOV/MP4, and many more video file formats. Capable of processing files at 10X real-time or more, CCPlay FilePro puts EEG's industry-leading CC expertise into today's cutting edge file-based workflow environments.

Features

- ◆ No re-encoding of video essence and no quality loss
- ◆ Intuitive GUI for scheduling and queuing encoding jobs
- ◆ Supports MPEG-2, H.264/MPEG-4 AVC, MXF XDCAM, MXF IMX, MXF DVCPPro, MXF AVC-Intra, MXF OP1a (Omneon), AS-02 bundles, GXF, and QuickTime MOV/MP4/ProRes video files
- ◆ Accepts all common captioning and subtitling file types
- ◆ Extracts timed CC files from previously encoded assets

For even more power, **CCPlay FilePro Server** provides scripting, API, and file-system tools enabling batch processing, automation, and multi-core processing for high volume workflows.

Additional Server Tier Features

- ◆ Watch folders interface for automated batch processing
- ◆ SOAP API for advanced workflow scripting
- ◆ Enables multiples cores of simultaneous processing
- ◆ Legalization and re-timing of embedded captions

CCPlay FilePro and CCPlay FilePro Server run on Windows 7 and 8, or Windows Server operating systems, ranging from desktop stations to complex virtualized machines. Connection to high-speed optical or 10 Gig-E storage is supported for maximum processing efficiency.

The Captioning Solutions Company

Caption Editing and AS-02 Bundle Inspection

- ◆ Detailed bookmark and media locator system
- ◆ Visualization of closed captions, timecode, AFD, program ratings and more
- ◆ Detects mismatches between bundle metadata and wrapped contents
- ◆ EDL integration with CCPlay FilePro and other bundle editing and re-wrapping tools

FilePro Inspector's automated testing and visual inspection tools enable studios and broadcasters to reach a new standard of quality and efficiency in cutting-edge AS-02 workflows!

FilePro Inspector

FilePro Inspector expands the EEG file-based Quality Control product line into the popular MXF AS-02 bundled delivery format.

FilePro Inspector helps you leverage the flexibility of AS-02 for automated creation of worldwide and multi-screen deliverables from a single master asset. Each bundle can support a full range of regionalized or platform-specific audio tracks, subtitles and metadata, video cut points and extra features, and detailed compression specifications.

EEG FilePro Inspector enables full browsing of these features through decoded media, metadata, and bundle file-system browsing. Inspector provides an in-depth view into the most complex asset structures, as well a flexible suite of built-in compliance and house-standardization tests with detailed report generation.

Features

- ◆ Frame-by-frame video decode in i-frame formats including JPEG-2000
- ◆ Audio track visualization

CaptionTrack for Final Cut Pro

CaptionTrack provides broadcasters and media production companies with an intuitive in-house caption editing tool working within the familiar Apple Final Cut Pro environment. A simple and cost-effective way to start generating or modifying existing captioning!

- ◆ Add caption text with a simple plug-in editor
- ◆ Shift caption timing on the Final Cut timeline
- ◆ Maintain caption synchronization when editing clips
