

Covid - 19

Davis Dentistry will continue to employ the enhanced cleaning and infection control protocols we implemented in response to the COVID-19. We want to provide our patients and team members with the safest possible healthcare environment.

Our practice is screening all patients and visitors upon arrival, along with checking temperatures with a temporal thermometer. We are asking all patients to arrive 5 min. prior to their scheduled appointment. Patients who are at high risk for COVID-19, as determined by our office, will likely have their visit rescheduled. If you're not feeling well, please contact us to reschedule, whenever possible, in advance of your visit.

All team members will be screened daily to ensure adherence with social distancing standards and status of their health, along with their temperatures check upon arrival. All team members will be in masks (or scarves for non-clinical team members).

Additionally, to reduce the risk of transmission to our patients and team members, as well as their families, the office has installed 4 very powerful HEPA h13 air filters. These filters will remove all bacteria, viruses and VOCS down to the .3 microns keeping our working environment safe!

We appreciate your support of these infection control measures. Your oral health is vital to your overall wellness and your ability to resist the impact of COVID-19, so we encourage you, if healthy, to maintain your regularly scheduled hygiene appointments with Dr. Davis and our practice.

In good health,
Dr. Davis and Team
