Dear Patient,

Thank you for expressing interest in having your vision restored by one of the specialized surgeons at Cornea Associates of Texas. The array of vision correction procedures performed at Cornea Associates is continuously evolving. Enclosed you will find information that introduces you to our philosophy regarding Quality of Care and our dedication to helping you achieve your "Personal Best Vision."

Today we are able to provide several unique options to enhance your ability to function without your glasses or contacts. iDesign™ IntraLASIK is the most technologically advanced form of all-laser vision correction.

Our iDesign™ procedure enables us to look beyond 20/20 and focus on achieving your "Personal Best Vision." Whether you choose iDesign™, IntraLASIK or PRK, each procedure is customized to suit your needs.

In addition to our laser vision correction procedures, we offer "intra ocular" vision correction options. The advance technology lenses and the Verisyse phakic lens are available to address advanced vision correction needs.

In order to obtain the most precise measurements possible, it is essential that you remove your soft contacts two (2) weeks prior to your consultation. Gas permeable or hard contacts should be removed four (4) weeks prior to your consultation.

If your appointment is for a preliminary consultation to determine basic candidacy only, you may wear your contact lenses. Also, by filling out the included patient information and consent forms, we can more quickly guide you through the consultation process.

If you have any questions about the information contained in this packet, please call 214-696-5900 and speak with a patient counselor. Another excellent source of information about our practice can be found on the Internet at www.corneatexas.com.

We look forward to guiding you through the process of achieving your "Personal Best Vision!"

Thank you for choosing Cornea Associates of Texas.
