

### ***TGBC Consulting: Teaming and Collaboration Workshop***

In business, you often find a strategic “big picture” specialist who never seems to notice details. How does this happen? Research on the brain has led to an understanding that each of us has a preferred way and mode of thinking that affects the way we take in and process information.

Whole Brain® Thinking (developed by Herrmann Solutions) is a methodology designed to help thinkers, teams and organizations better benefit from all of the thinking available to them. It acknowledges that while different tasks require different mental processes, and different people prefer different kinds of thinking, organizations will get better results when they can strategically leverage the full spectrum of thinking available.
