

CALL FOR PAPERS

Artificial Intelligence and Natural Language & Information Extraction, Social Media and Web Search

FRUCT Conference

St-Petersburg, Russia, 9-14 November 2015

Overview

As modern technologies develop and improve, it becomes more important to solve problems of human-computers and human-robots interaction. This problem covers information retrieval, speech technologies, dialogue systems and other innovations result in a surge of interest for artificial intelligence, natural language processing and robotics.

The conference will gather together experts in the above listed domains from research institutes and universities, as well as core businesses developing innovative technologies and using such technologies in their products.

The goal of the conference is to create a platform for sharing experiences, extending contacts and searching for possible cooperation options. This conference continues conferences: FRUCT (2007-2015) and AINL (2012-2015).
