

Encircle for **Restoration Contractors**

Fast and easy tools  
to help you win more  
business.

With tools that make information in the field easy to capture, see and share and a powerful engine that delivers smart reports, Encircle is the essential solution for helping restoration contractors to grow your business.

The key to improving your accuracy, productivity and winning more business.

Through easy to use and therefore easy to adopt automation tools. Encircle offers an alternative to the complicated software systems you may have used in the past. Our technology is simple to use but delivers powerful results. Tools that allow you to easily capture, share and report with accuracy so that you can respond quickly and effectively to drive real business impact.

---

*With our old process we would go out to the site, take photos, go back to the office and build the file, fire up the laptop and then send it. It was a long process and we couldn't share or see the information easily. Now we document and share things right away, like sharing the cause of loss with the adjuster while still on site.*

# Encircle benefits

Avoid being intimidated by technology with tools that are easy to learn and simple to use. Rapidly capture information in real time—video, photos or voice to text—with tools built for the way you work.

Generate customized professional reports that send the message that you are efficient and professional.

Reduce your liabilities by ensuring the highest level of accuracy and transparency with no errors or hidden costs through visual evidence and location based documentation. Share a library of information so you can collaborate with teams and other stakeholders anytime, anywhere.

Win more business by delivering accurate information quickly and efficiently.
