Chapter 18 Worksheet 3 2 1 Code It

True/False

Indicate whether the statement is true or false.

1. Add-on codes are reported for procedures performed in addition to a primary procedure during the same operative session.

2. CPT code 90461 is assigned for a primary procedure.

3. The administration of Ig is considered an immunization.

4. Hydration codes are reported for the intravenous infusion of electrolytes.

5. Hydration codes are reported for the intravenous infusion of drugs.

6. An intravenous push is a method for infusing medications for 30 minutes or more.

7. Psychologists report E/M services with CPT Medicine section codes or E/M section codes.

8. Electroconvulsive therapy is a form of treatment provided when a patient is under the influence of a drug.

9. Manometry is a diagnostic test that measures muscle function.

10. Renal dialysis removes toxic waste from the body.

11. Patient underwent a duplex scan of lower extremity arteries, bilaterally, report code 93925.

12. A duplex scan is a type of noninvasive diagnostic study.

13. Insertion of a Swan-Ganz catheter is not included in the cardiac catheterization codes.

14. Percutaneous coronary artery interventions include stent placement, atherectomy, and balloon angioplasty.

15. Cardiac catheterization is a noninvasive diagnostic procedure.

16. Echocardiography is a diagnostic procedure that uses fluoroscopy to obtain three-dimensional images.

17. Cardiography is a diagnostic procedure that records the heart’s electronic activity.

18. Vestibular function testing is performed to determine refractive state.

19. Determination of refractive state indicates whether a prescription is required for vision correction.

20. During hemodialysis, a catheter is inserted into the abdominal cavity.

21. Medical nutrition therapy is reported with codes 97802-97804.

22. To report chiropractic manipulative treatment in four body regions, the coder would use code 98940.

23. Codes for telephone service are not reported when they result in a patient encounter within 24 hours or at the next available urgent visit appointment. Such telephone service is considered part of the preservice work for subsequent face-to-face encounters.

24. Patient received a home visit from a registered nurse for mechanical ventilation care. Report code 99504.
Completion
Complete each statement.

25. Rabies immune globulin (RIG), human, for intramuscular and/or subcutaneous use. Assign code(s).

26. Individual psychotherapy, insight oriented, behavior modifying and/or supportive, in an office or outpatient facility, approximately 45 to 50 minutes face-to-face with the patient. Assign code(s).

27. Biofeedback training by any modality. Assign code(s).

28. End-stage renal disease (ESRD) related services monthly, for patients 20 years of age and older, with one face-to-face physician visit per month. Assign code(s).

29. Esophagus, acid perfusion (Bernstein) test for esophagitis. Assign code(s).

30. Ophthalmoscopy, extended, with retinal drawing (e.g., for retinal detachment, melanoma), with interpretation and report, subsequent. Assign code(s).

31. Staggered spondaic word test. Assign code(s).

32. Evaluation for prescription for speech-generating augmentative and alternative communication device, face-to-face with the patient, 90 minutes. Assign code(s).

33. Percutaneous transluminal coronary balloon angioplasty, three vessels. Assign code(s).

34. Microvolt T-wave alternans for assessment of ventricular arrhythmias. Assign code(s).

35. Transthoracic echocardiography for congenital cardiac anomalies, follow-up or limited study. Assign code(s).

36. Ergonovine provocation test. Assign code(s).

37. Induction of arrhythmia by electrical pacing. Assign code(s).

38. Measurement of spirometric forced expiratory flows in an infant or child through 2 years of age. Assign code(s).

39. Sleep study, simultaneous recording of ventilation, respiratory effort, ECG, or heart rate and oxygen saturation, attended by a technologist. Assign code(s).

40. Comprehensive computer-based motion analysis by videotaping and 3D kinematics with dynamic plantar pressure measurements during walking. Assign code(s).

41. Chemotherapy administration, intra-arterial infusion technique, up to 1 hour. Assign code(s).

42. Actinotherapy (ultraviolet light). Assign code(s).

43. Hospital mandated on-call service, out-of-hospital, each hour. Assign code(s).

Short Answer

44. List the alternative terms for psychotherapy.

45. What is evaluated when a physician performs pharmacologic management?

46. What classifications of disease are treated with electroconvulsive therapy?
47. What are the two types of dialysis?
48. A patient complains of gastric reflux and undergoes a procedure that involves inserting a tube into the esophagus and pouring mild hydrochloric acid through the tube. What is this gastroenterology procedure called?
49. What tools are used by an ophthalmologist when determining refractive state?
50. An echocardiography procedure uses ultrasound to obtain pictures of the heart. What type of image is produced?
51. What are the three types of percutaneous coronary artery interventions?
52. When a cardiac catheterization is coded, the patient’s record is reviewed for what three components?
53. What is the most common access point for a cardiac catheterization?
54. List the modifiers that are added to CPT codes for percutaneous coronary artery interventions; they identify the artery on which the procedure is performed.
55. During a diagnostic catheterization, which procedure is performed that involves injecting a contrast medium and imaging the vessel?
56. What are the three types of allergy skin tests?
57. List alternative terms for allergy shots.
58. What is included in electroencephalography (EEG) codes?
59. Two methods for administration of chemotherapy drugs are intravenous and oral. What are two other methods?
60. Physiatrists prescribe drugs, coordinate long-term rehabilitation, and prescribe braces. What type of medical treatment is a physiatrist not licensed to perform?
61. What symbol in CPT identifies conscious sedation?
62. For the purposes of chiropractic treatment, five spinal regions are identified. What are these five regions?
63. Home infusion procedures are provided in the patient’s home. What factor determines the assignment of CPT code 99602?
64. The Dialysis subsection 90935-90999 includes what three procedures?

Multiple Choice
Identify the choice that best completes the statement or answers the question.

65. Fitting of single vision eyeglasses. Report code ______.
   a. 92340   b. 92341
   c. 92352   d. 92353

66. A patient, Clarissa Edwards, had a cochlear implant inserted 8 months ago. Today Clarissa, who is 8 years old, requires reprogramming of this device. Report code ______.
   a. 92601   b. 92602
   c. 92603   d. 92604
67. Ventilator management performed on May 6 and May 7. Report code(s) ______.
   a. 94002          c. 94002, 94003
   b. 94002, 94002     d. 94004

68. A 12-year-old patient received interactive psychiatric diagnostic interview and examination services after he reported that he was being teased and “picked on” at school. Report code ______.
   a. 90801          c. 90804
   b. 90802          d. 90805

69. A 17-year-old patient received an IM injection of HPV vaccine type 11. Report code(s) ______.
   a. 90649          c. 90647
   b. 90471, 90649     d. 90471, 90649-51

70. A 75-year-old patient diagnosed with acute renal failure underwent hemodialysis, which was provided on October 14. Three evaluations were performed on the patient while she was on the dialyzer machine. Report code ______.
   a. 90935          c. 90951
   b. 90937          d. 90952

71. Patient underwent active wound care management that involved the removal of devitalized tissue from burn wounds with nonselective debridement and application of wet-to-moist dressings. Wound assessment and instructions for ongoing care were also provided during the session. Report code ______.
   a. 97597          c. 97605
   b. 97602          d. 97606

72. CMT of cervical, thoracic, and lumbar regions. Report code ______.
   a. 98940          c. 98925
   b. 98941          d. 98926

73. A patient diagnosed with asthma was provided with respiratory care about the correct usage of a bronchodilator. This service is provided in the patient’s home. Report code ______.
   a. 99503          c. 99509
   b. 99504          d. 99600

74. Interrogation of ventricular assist device (VAD), in person, with physician analysis of device parameters (eg, drivelines, alarms, power surges), review of device function (eg, flow and volume status, septum status, recovery), with programming, if performed, and report
   a. 93724,93285
   b. 93291, 93298
   c. 93750
   d. 93705

75. On September 8 and September 17, Wendy James received outpatient cardiac rehabilitation services provided by Dr. Scott. The services were performed with continuous ECG monitoring. Report code(s) ______.
   a. 93797          c. 93798
   b. 93797, 93797     d. 93798, 93798

76. A 23-minute telephone assessment and management service was performed on a patient who had not been in the office for any services within 24 hours. How would the coder code this service. Report code ______.
   a. 98966          c. 98968
   b. 98967          d. 98969

77. Air and bone tone audiometry testing. Report code ______.
   a. 92552          c. 92555
   b. 92553          d. 92565
78. Fluorescein angiography with imaging, interpretation of results, and written report. Report code _____.
   a. 92230       c. 92240
   b. 92235       d. 92260

79. A 5-year-old was bitten by a stray dog and was administered an injection to provide immediate temporary protection against rabies. This type of injection is called _____.
   a. immune globulin       c. toxoid infusion
   b. immunization           d. toxoid injection

80. A 10-year-old child with a history of hairy nevus is being evaluated to rule out melanoma of his eye. This service included examination using the ophthalmoscope, retinal drawing, analysis, and a formal report sent to his pediatrician. Report code _____.
   a. 92083       c. 92250
   b. 92225       d. 92260

81. Which diagnostic test measures muscle function?
   a. Biofeedback       c. Electroencephalogram
   b. Electromyogram      d. Manometry

82. Which treatment of mental illness involves resolution of unconscious psychological conflicts?
   a. Insight-oriented psychotherapy       c. desensitization psychotherapy
   b. behavior-modifying psychotherapy      d. supportive psychotherapy

83. Which process removes toxic waste products from the body using a machine?
   a. Catheterization       c. Hydration
   b. Dialysis               d. Necrosis

84. Which of the following statements is true regarding an immune globulin (Ig)?
   a. Immune globulin is a substance found in lymph tissue that fights against infection.
   b. Antibodies are toxins that are injected as part of an immune globulin.
   c. Antibodies create a weakened form of an infection once they are injected into the patient.
   d. Ig is a sterilized solution obtained from human blood plasma that contains antibodies.
Match each CPT code to the correct subsection.

a. Immune Globulin
b. Vaccines/Toxoids
c. Hydration
d. Psychiatry
e. Dialysis
f. Ophthalmology
g. Special Otorhinolaryngologic Services
h. Cardiography
i. Cerebrovascular Arterial Studies
j. Pulmonary
k. Allergy and Clinical Immunology
l. Physical Medicine and Rehabilitation
m. Acupuncture
n. Education and Training for Patient Self-Management
o. Telephone Service
p. Moderate (Conscious) Sedation

85. 90857 interactive group psychotherapy
86. 96360 intravenous infusion hydration, initial 31 minutes to 1 hour
87. 92511 nasopharyngoscopy with endoscope
88. 94004 vent management nursing facility, per day
89. 97810 acupuncture using one or more needles
90. 99144 moderate (conscious) sedation, age 5 years or older, first 30 minutes intraservice time
91. 95130 allergen immunotherapy, single stinging insect venom
92. 90660 influenza virus vaccine, live
93. 98967 telephone service 11-20 minutes
94. 92015 determination of refractive state
95. 98962 education and training for patient self-management, 5-8 patients
96. 93000 ECG 12 leads with interpretation and report
97. 97010 application of a modality to one or more areas, hot or cold packs
98. 90296 diphtheria antitoxin
99. 93880 duplex scan of extracranial arteries, complete bilateral study
100. 90970 end-stage renal disease-related service (less than a full month) per day for patient 20 years of age or older
