Victoria Alegria, ARNP

Course Description

This course gives treatment updates in hematologic malignancies with a focus on the needs of PAs, ARNPs, and hematology/oncology nurses. The topics covered will include leukemia, myeloma, multiple myeloma, bone marrow transplant, toxicity, lymphoma, and challenging cases in hematologic malignancies. There will be a unique opportunity for discussion with world-renowned cancer specialists.

Course Learning Objectives

Upon conclusion of this program, participants should be able to:

- Define the major indications for therapy for each hematologic malignancy
- Describe the appropriate molecular basis for therapy of hematologic malignancies
- Demonstrate awareness of the common toxicities with these novel therapies
- Select the best approach to optimize management of these toxicities

Attendance at this Mayo course does not indicate nor guarantee competence or proficiency in the performance of any procedures which may be discussed or taught in this course.

Intended Audience

This course is intended for advanced practice providers, chemotherapy nurses, fellows, and community physicians.
