Florida
HEALTH

Presentation Objectives

- Review E-FORCSE's purpose, background and available information
- Understand how to set up and use the designee functionality
- Demonstrate steps utilized to access Patient Advisory Reports
- Review useful system tools
- Describe E-FORCSE's proactive reporting capability and its usefulness
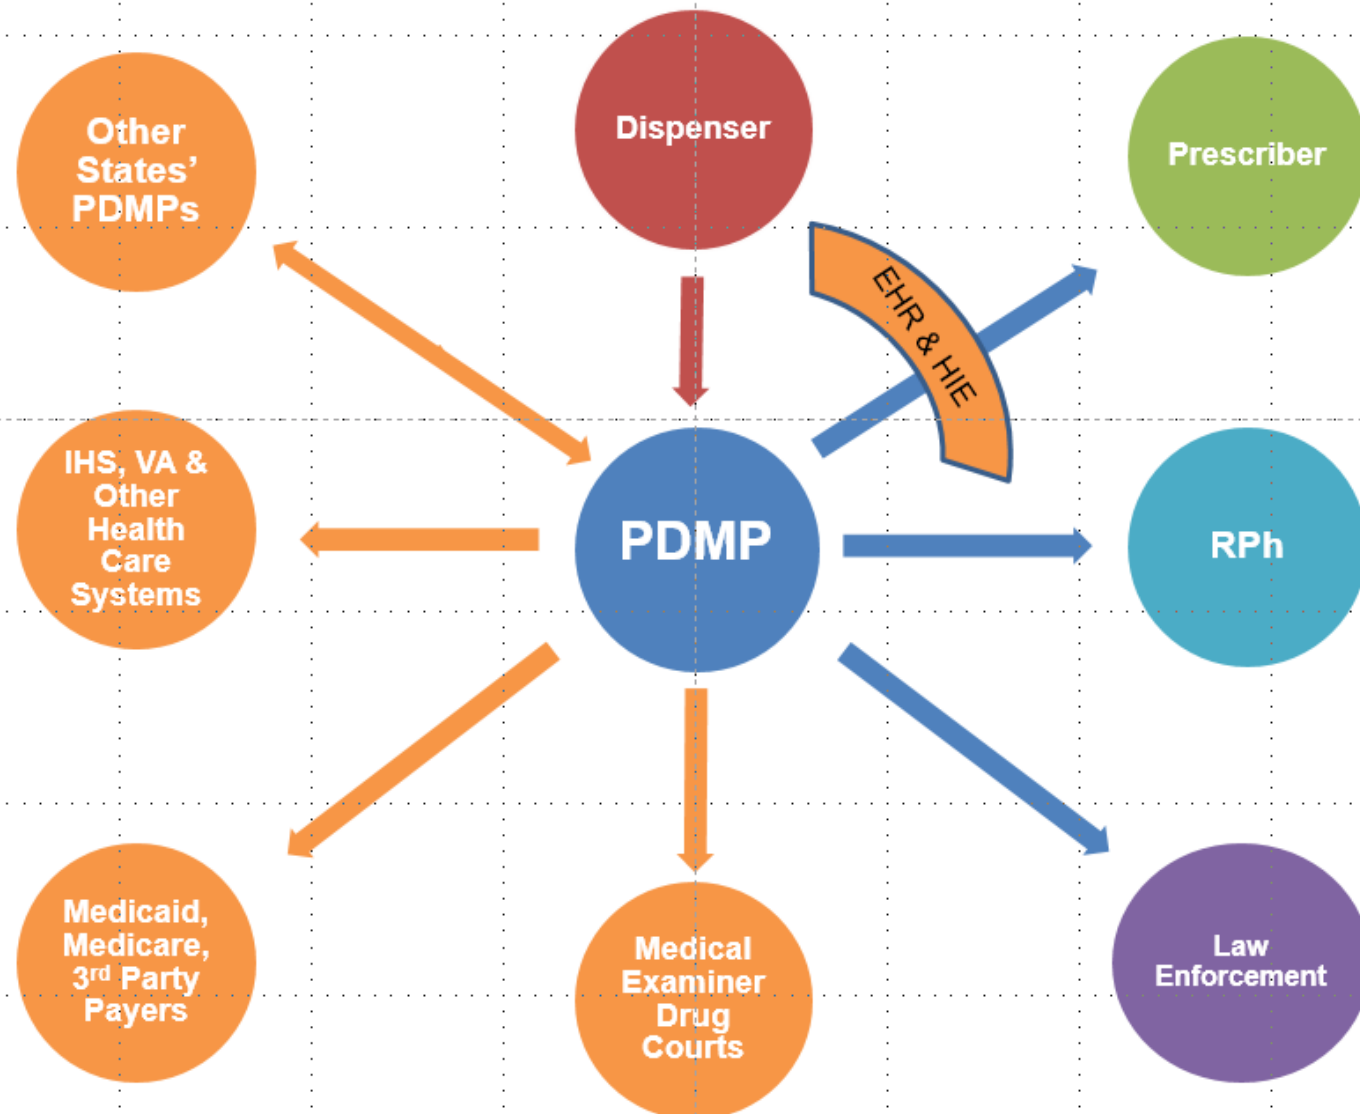

Florida
HEALTH

What are the Goals of the PDMP?

- To encourage safer prescribing and dispensing of controlled substances and to reduce drug abuse and diversion within the state of Florida.

- To provide information collected in the database to health care practitioners to guide clinical decisions in prescribing and dispensing highly-abused prescription drugs.[1]

1 Chapter 2009-197, Laws of Florida (2009)

What is E-FORCSE?

How do PDMPs work?

Dispenser Reporting Requirements

- Pharmacies and dispensing practitioners must report no later than the close of next business day

- Mandatory reporting began September 1, 2011

- >200 MILLION records in database*

* As of May 31, 2017

Florida
HEALTH

Penalty for Non-Compliance

- Failing to report the dispensing of a controlled substance is a **first degree misdemeanor**

- Compliance Audit revealed 96% of dispensers reported within 7 days

Dispensing Information Reported

- Patient
  - Name, Address, Date of Birth, Prescription Information, Payment Type, Telephone Number

- Prescriber
  - Name, Address, DEA Number

- Pharmacy
  - Name, Address, DEA Number

Controlled Substance Information Not Reported to the Database

- If *administered* directly to a patient

- If *administered* or *dispensed* to a patient less than 16 years of age;

- If *administered* or *dispensed* in the health care system of the Department of Corrections;

- If *dispensed* by a Department of Defense facility

Florida
HEALTH

Data Integrity Reduces Inadvertent Red Flags: Accuracy is important

Dispenser Reporting

- Patient's first and last names
  - Spelling/Nicknames
  - Hyphenated names
- Address completeness
- Extraneous notes in reporting fields
- Edit and void changes
  - Quantity/Prescriber edits
  - "Return to Shelf"

Why it is important?

- ✓ Decreases multiple profiles
- ✓ Determines the blending of the patient's records
- ✓ Expedites patient search results
- ✓ Reflects actual dispensing
- ✓ Enhances sound clinical decisions

Florida HEALTH

Reporting Discrepancies

- Dispenser uploading data is responsible for editing incorrect information
  - Return to Stock
  - Prescription Entry Typos/Errors
  - Change in Quantities
- Errors and omissions must be corrected within 7 business days after discovery

How is the information used?

- Prescribers, pharmacies and pharmacists use the information from E-FORCSE to improve health care outcomes.

- Reports can supplement a patient evaluation, confirm the patient's prescription history, document compliance with a therapeutic regimen, and identify potentially hazardous or fatal interactions.

Registration Information

Authority for Access to the E-FORCSE Database Information

- Section 893.0551, FS authorizes direct access by a pharmacy, prescriber, dispenser licensed by the Department of Health or their designee

- "Designee" means a person preferably a licensed or certified health care professional, appointed to act as an agent of a prescriber or dispenser for the purposes of requesting or receiving information from the PDMP.

- Enrollment and use of the database is not mandatory prior to prescribing or dispensing a controlled substance

Florida HEALTH

E-FORCSE Patient Information: Security and Privacy

- Section 893.0551, F.S., any person who willfully and knowingly violates this section of law by sharing confidential protected health information commits a felony of the third degree

- Felony convictions related to Chapter 893, F.S. can result in licensure non-renewal

- Board of Pharmacy sanctions have included $10,000 fine, laws and rules, ethics, no PDM for 1 year

Registration and Utilization by License Type

License Type	Registered Users (No.)	Users who have Queried (No.)	Users who have Queried (%)	2016 Queries (No.)	Queries per User

PDMP Statistics, Health Care Practitioner User Statistics by License Type as of December 31, 2016.

Overview of the Designee Process

- Credentialed and registered prescriber or dispenser selects a licensed or registered health care professional established under Chapter 456 or if necessary, another appropriate person in their practice to act on their behalf as a designee.

- Designee must complete the online training, register and be linked to a prescriber or dispenser Master Account holder

- Designee must be directly supervised by the linked prescriber or dispenser.

How Do I Register for E-FORCSE?

- Enter www.hidesigns.com/flpdmp in browser
- Click on Pharmacist Practitioner link
- Review Terms and Conditions
- Review Training Guide
- Click on Registration Site
- Enter *newacct* in user ID field
- Enter *welcome* in the password field
- Complete Access Request Form Information
- User name and temporary password will be emailed to user

CERTIFICATION

Rule 64K-1.003(a), Florida Administrative Code, Accessing the Database, requires the *Training Guide for Practitioners and Pharmacists, Form DH8009-PDMP, effective July 2016* to be reviewed by designees, prior to registering for access to the E-FORCSE database. It also requires Designees to complete the *Information Security and Privacy Training Course for Designees, DH8019-PDMP, effective July 2016*. This form is part of the required documentation that the Designee must complete in order to register for access to the E-FORCSE.

Please sign and return the completed form to the designating prescriber or dispenser. It is the responsibility of the designating prescriber or dispenser to maintain printed copies of the certification of these reviews and make them available to the PDMP program manager upon request.

Designee Name	
Telephone Number	Email Address
I certify that I have read and understand the information contained in the Training Guide for Practitioners and Pharmacists and have completed the Information Security and Privacy Training Course for Designees.

Have you accessed the PDMP?

- Physicians, Pharmacists, PA's, ARNP's or their designees may access the PDMP to guide clinical decisions, reduce drug abuse and diversion

- 3.5 million prescription records are uploaded on a monthly basis

- 66% of the dispensers upload information on a daily basis

- 7.85 million unique individuals are in the database

Welcome Practitioners, Pharmacists, Enforcement and Investigative Agencies to E-FORCSE, the Florida Prescription Drug Monitoring Program.

The Florida Prescription Drug Monitoring Program, known as E-FORCSE® (Electronic-Florida Online Reporting of Controlled Substance Evaluation Program), was created by the 2009 Florida Legislature in an initiative to encourage safer prescribing of controlled substances and to reduce drug abuse and diversion within the state of Florida. E-FORCSE® has selected Health Information Designs, LLC, to develop a database that collects and stores prescribing and dispensing data for controlled substances in Schedules II, III, and IV. Section 893.055, Florida Statutes, requires health care practitioners to report to the PDMP each time a controlled substance is dispensed to an individual. The information is reported through the electronic system as soon as possible but not more than 7 days after dispensing. This reporting timeframe ensures that health care practitioners have the most up-to-date information available.

In addition to practitioners and pharmacists, a law enforcement agency may request confidential controlled substance dispensing information in the database during active investigations regarding potential criminal activity, fraud, or theft regarding prescribed controlled substances and that has entered into a user agreement with the Department. Also the Department of Health Investigative Services Unit and Medicaid Fraud Unit investigators may request information in the database to aide in the investigation of cases involving controlled substances.

Florida Practitioners' Query Site

Query Creation Tip

Make your query as general as possible and then drill down to more specific information once you have identified the person for whom you are looking. For example, you could enter the last name of the individual, the first letter of the first name, and a birth date, and then click Next. When the preliminary results are displayed on the screen, you can highlight the person that you want to query and then click Submit to submit the query for processing.

If you enter a specific birth date for an individual and the query results are blank, click the Within field just below the Date of Birth field and resubmit the query with a wider date range, for example, within two years of birth date, to create a query with broader search criteria.

Once you have submitted the query for processing, you will be redirected to the Report Queue. In the Report Queue, click the Job Sequence ID number to view the report you requested. If the Job Sequence ID is not a hyperlink, click your browser's refresh button. The Job Sequence ID will appear as a hyperlink when the report is ready for viewing.

Florida Liability Statement for Practitioner/Pharmacist Access

I certify that I have been approved by the State of Florida to access the information in the Prescription Drug Monitoring Program (PDMP) FL RxSentry Database.

I certify that the person for whom I am requesting a Patient Advisory Report for is under my care or my designating prescriber's or dispenser's care.

I understand that inappropriate access or disclosure of PDMP data is a violation of section 893.0551, Florida Statutes, and a third degree felony, punishable as provided in sections 775.082. 775,083, 775,084, Florida Statutes.

☐ **I accept the above conditions and certify that I have met the requirements to be eligible to access the PDMP RxSentry database.**

You MUST accept the above conditions before you can continue.

Disclaimer: The Department of Health makes no claims, promises, or guarantees the accuracy, completeness, or adequacy of the contents of the Patient Advisory Report, and expressly disclaims liability for errors and omissions in the contents. The records herein are based on information submitted by pharmacies and dispensing health care practitioners. Records on this report should be verified before any clinical decisions are made or actions are taken.

Other State Queries are limited to exact match on last name, first name, and date of birth. Florida data is not included in the search results.

Proactive Reporting Authorization

- Florida Administrative Code Rule 64K-1.007 *Indicators of Controlled Substance Abuse* authorizes the PDMP to provide relevant information to the health care practitioner if the patient, within a 90-day period, has:
  - Visited more than 1 prescriber
  - Obtained medication from more than 5 pharmacies

Purpose of Proactive Reporting

- Provides a comprehensive approach to address diversion, misuse and abuse

- Supports coordinated care and potential noncompliance allowing the physician to focus on concerns

Proactive Reporting Notification

- Reviewed quarterly by staff
- Reports will identify individuals obtaining controlled substance prescriptions from multiple prescribers and multiple dispensers
- Only relevant information will be provided to health care practitioners

Florida HEALTH

Summary

- E-FORCSE is an effective tool
- Information identifies prescription fraud, forgeries, and improper prescribing
- Reports and features are available to support sound clinical prescribing

Quiz Time!!! True or False

- It is okay to post a patient's E-FORCSE report on Facebook as long as you "Friend" them.

- Utilizing E-FORCSE can help support good clinical decision making.

- Controlled Substance misuse and diversion is a patient safety issue and a safety issue for others.

Thank You
