

Special Non-CE Event

for Licensed Advanced Practice Clinicians

Thursday, March 29 2:00-4:00pm

Stoweflake Mountain Resort ❖ Stowe, Vermont

PROPER INSERTION & REMOVAL TECHNIQUE FOR KYLEENA®

How often do you ask, "In the past 12 months, have you ever forgotten to take your pill?" In a study of over 4,500 women around the world, including 500 American women aged 21–29 years who take a daily birth control pill, 82% of American women reported forgetting to take it at least once in the past 12 months.

Join us for a hands-on workshop that will teach you the skills needed for proper IUD insertion and removal. This skills-based clinical training is being presented by Bayer, the manufacturer of Kyleena®. It is offered for **licensed advanced practice clinicians and physicians only**.

There is no fee for this workshop, however **pre-registration is required** and attendance **limited to 40 participants**.

To register for the non-CE event, [[click here](#)]

For full prescribing information, go to kyleena-us.com

Disclaimer: This non-CE event is ineligible to receive continuing education credit and is not considered part of the VNPA's accredited educational activity: 2018 Annual Conference. Promotion of a commercial product or service outside the commercial session's meeting room or exhibit area is prohibited.

Hosted by:

Vermont Nurse Practitioners Association
