

# WEST TEXAS SONO

## Mobile Ultrasound

---

Expand your services by offering ultrasound to your patients in the convenience of your office.

West Texas Sono provides registered sonographers to perform various diagnostic ultrasound studies with a turn around time of 24-48 hours. The studies performed are sent directly to a radiology group to be read. We set up the portal at your office on a computer for the convenience of viewing the images and report.

If you are currently sending your patients to an imaging center for their ultrasound, then you're giving away revenue for your practice!

### *Benefits for physician and patient*

- \*Generate more revenue for your practice*
