EARN 1 FREE CME CREDITS

Center for Vein Restoration invites the CAPNI members to a CME event.
Venous Disease, Diagnosis, and Treatment for your Patients

5:45PM | THURS, OCT 10

SPEAKER SPOTLIGHT

Luis Barajas
MD, FACS, FACPh

-  Category one CME 1.0 credits
-  Registration at 5:45pm
-  Dinner at 6:00pm
-  RSVP by Oct 1 (seating is limited)
-  Monica Ducey  317-413-0409
-  Monica.ducey@centerforvein.com

4050 East 82nd Street Indianapolis, IN

THIS CME IS FOR MEDICAL PROVIDERS ONLY.

It's a problem affecting **10-20 percent** of all adults, including patients in your practice: chronic venous insufficiency, the often undiagnosed medical condition behind varicose veins and spider veins (telangiectasia). Venous insufficiency affects a broad range of people.

Common causes include **heredity, age, sex, weight, history of DVT, pregnancy, inactivity** and prolonged sitting or standing. Certain groups, such as expectant moms, have extra difficulty – studies show that varicose veins get worse with each subsequent pregnancy.

In this informative and relevant session, our physician presenters will describe causes, symptoms, diagnosis and treatment of venous insufficiency.

Participants will learn about the latest innovations in the diagnosis and treatment of varicose veins and venous ulcers. Addressing varicose and spider veins is quick and relatively painless with treatments like radiofrequency and laser ablation, foam and cosmetic sclerotherapy, and other non-invasive methods. Patients can return to normal activity with short recovery times.
