Breaking News!

CMS has put out a survey asking advanced practice providers to participate in giving feedback on their state restrictions! Please participate today!

"These changes include a redefinition of physician supervision for PA services, allowing therapist assistants to perform maintenance therapy under the Medicare home health benefit, and reducing the minimum level of physician supervision required for hospital outpatient therapeutic services."

"We are proud of the work accomplished," CMS said. "Now we need your help in identifying additional Medicare regulations which contain more restrictive supervision requirements than existing state scope of practice laws, or which limit health professionals from practicing at the top of their license."

Additional recommendations and comments should be sent to PatientsOverPaperwork@cms.hhs.gov with the phrase "Scope of Practice" in the subject line by Jan. 17, 2020.
