

Team-Based Care of Patients Taking Opioids

Collaboration & Risk Reduction Strategies

We provide a patient case simulation to assess and plan team-based care for patients with chronic pain who are at risk for developing or have been diagnosed with opioid use disorder. This workshop covers roles and responsibilities of health team members, using non-stigmatizing language, screening and assessment tools, collaborative planning using telehealth and risk reduction strategies to improve patient care and support health professionals who care for them.

To schedule a workshop contact
