COURSE HIGHLIGHTS

- New conference highlighting the three central components of acute care surgery practice: trauma, critical care and emergency surgery.
- Course is designed to ensure that advanced practitioners enhance both knowledge and skill sets in acute care surgery.
- Multiple educational formats including didactic presentations, hands-on skills workshops, and case presentations.
- Live and livestream attendance options.
- Access to presentation recordings for one year.

TARGET AUDIENCE

This course is designed for advanced practitioners including physician assistants and nurse practitioners. In addition, physicians, clinical nurse specialist, nurse educators and nursing staff in trauma, acute care surgery, emergency medicine, and hospital medicine may benefit from this course.

LEARNING OBJECTIVES

Upon conclusion of this program, participants should be able to:

- Describe a systematic approach to assessment and management of the trauma and acute care patients.
- Formulate an action plan based on scientific rationale, evidence-based standards of care, and practice management guidelines for trauma and acute care patients.
- Choose appropriate and timely consultation and/or referral when necessary in the trauma acute care surgery populations.
- Describe whole blood management in the trauma patients.
- Define common organ failure syndromes in the critically ill, such as respiratory failure, shock, and sepsis.
- Discuss management of the pre and post-acute care surgical patients.
