

SAFE AND EFFECTIVE PAIN CARE

A Comprehensive Guide for Opioid Prescribing in Primary Care

Healthcare professionals – this course will provide you with clarity and confidence in patient pain assessment, treatment planning and ongoing pain support.

Free, self-paced virtual 4-hour course provided by Pri-Med Institute.

While ideal for prescribing providers, the course content is relevant and useful to ALL members of a healthcare team.

4.0 CME

Pain Assessment

Deepen understanding of pain assessment and identification of risk factors for opioid misuse.

Patient Safety and OUD Management

Techniques to counsel patients on safe use, storage and disposal of opioid analgesics.

Evidence-Based Pain Management

Explore strategies for non-opioid and nonpharmacologic pain treatments and learn how to develop effective individualized multimodal pain management plans.

Accredited Program

- ✓ 4 AMA PRA Credits
- ✓ 4 AANP Contact Hours
- ✓ 3 AANP Pharmacology Hours
