Pharmacology Essentials for Nurse Practitioners

Presenters: **Caitlin Aberle (Kennelly), Pharm D., BCPS**

Surgical Intensive Care Pharmacotherapy Specialist, NYU Langone Medical Center, NY, NY

Marco R. Scipione, Pharm D., BCPS, (AQ-ID)

Clinical Pharmacotherapy Specialist, Infectious Diseases, NYU Langone Medical Center, NY, NY

Kenneth B. Hymes, MD

Hematologist, Oncologist NYU Langone Medical Center

Associate Professor of Medicine, NYU School of Medicine

Director, Bellevue Hospital Hematology Clinic

Objectives:

At the end of the presentation, participants will be able to:

1. Describe the basic pharmacology of antihypertensive medications.
2. Apply JNC-8 Guidelines to the patient with hypertension.
3. Evaluate appropriateness of antihypertensive regimens with different patient comorbidities.
4. Interpret culture results and identify host factors to consider when selecting appropriate antibiotics.
5. Utilize pharmacokinetics and pharmacodynamics when selecting appropriate antibiotic regimens.
6. Assess therapeutic drug levels for vancomycin and aminoglycosides.
7. Discuss pharmacology of antibiotic classes as it relates to specific clinical scenarios.
8. Discuss the clinically significant anticoagulation pathways.
9. Describe the mechanism of action and pharmacology of warfarin, heparins, and the novel anticoagulants.
10. Defend selection of different anticoagulants in standard risk and high risk thrombotic disorders.
11. Participate in Question & Answer sessions.
