

WELLNESS AND HEALTH PROMOTION, Associate in Applied Science Degree - 3610

Science Department

The Wellness and Health Promotion AAS degree program prepares students for a rewarding career helping individuals, employers, communities, healthcare systems, and government agencies realize the power and potential of promoting healthy lifestyles, preventing disease, and supporting wellness for all individuals. This program allows students to select from two tracks: **Workplace Wellness** or **Community Health**. Students in both tracks gain a foundation of the various dimensions of wellness, health promotion, and health coaching. The curriculum provides students with the skills for promoting healthy choices, facilitating behavior change, assessing individuals, groups, and programs, and for designing and evaluating wellness-based programs. Students prepare for employment in the field by participating in a field and capstone experience, completing an electronic portfolio for professional use, and submitting a post-graduation plan. The *Workplace Wellness* track prepares graduates to design and implement wellness programs for both employers and employees using effective communication and program marketing skills. The *Community Health* track prepares graduates to be health advocates within health agencies and healthcare systems, as they connect individuals to available services and resources within their respective communities. Program graduates are prepared for and are highly encouraged to complete the *Health Coach Certification* from the *American Council on Exercise (ACE)* or a similar professional certification. Although this is not specifically designed as a transfer program, opportunities do exist for students to apply for admission to certain on-campus or online Bachelor's Programs once they have completed this degree, or more, along with specific prerequisites. The complete program is available through Virtual Learning.

Career or Transfer Opportunities

The Wellness and Health Promotion Program prepares students to work in this emerging field within the healthcare system, non-profits organizations, corporations, and government agencies as: Health Educators or Advocates, Wellness or Health Coaches, Workplace Wellness Coordinators, Community Health Workers or Specialists, Behavior Modification Specialists, Community Engagement Specialists, Health Promotion Specialists or Coordinators, or Prevention Specialists.
