

ENGINEERING, Associate in Science Degree - 4120

Engineering & Technology Department

The Engineering AS program prepares students to continue their study towards a baccalaureate degree in engineering at a four-year institution. This curriculum places emphasis on mathematics and its application in the sciences; only students of high academic potential who have demonstrated excellence in mathematics should consider this major. Since the requirements of senior institutions vary widely, it is essential to choose an intended transfer institution as soon as possible and carefully follow the program described in that college's catalog. The complete program is available at the Harrisburg and Lancaster campuses.

Transfer Opportunities

This transfer curriculum is provided as a guide for students planning to transfer to a baccalaureate degree granting institution. Engineers are employed in research and development, design, manufacturing, consulting, teaching, and administration in such areas as aerospace, agriculture, ceramics, chemicals, electrical and mechanical devices, metallurgy, and mining.

Competency Profile

This curriculum is designed to prepare students to:

- Identify personal transfer plans
- Effectively operate a solid modeling system
- Examine engineering disciplines
- Analyze static structures using calculus
- Solve engineering problems
- Analyze dynamic problems using calculus
- Identify global and ethical engineering issues
