

GENERAL STUDIES, Associate in Applied Science Degree - 7606

Academic Affairs & Enrollment Management

The General Studies AAS curriculum is designed for students who want to enter the workforce with a two-year degree. Students interested in interdisciplinary study, specially designed programs of study not available in regular programs, or who are undecided on their career plans, often enroll in the General Studies curriculum. The program provides a degree of flexibility that is not available in other programs, but requires a more careful planning process to ensure that career needs are met.

Students must select courses in the Humanities and Arts, Social and Behavioral Sciences, Mathematics, Natural and Physical Sciences, Computer Literacy, and Wellness, in addition to the College's requirement in written and oral communication. Students are able to select over 30-credits of coursework tailored to their needs and interests. Program electives may be selected from any College course number 100 or above. No "0" level courses are accepted for graduation.

Those who enroll in the General Studies curriculum should select their courses in consultation with a counselor to ensure that courses meet their career goals. Students who wish to graduate in this curriculum are encouraged to enter the curriculum as soon as possible and no later than prior to the scheduling of the last fifteen credits of study at the college.

The program may be pursued full-time or part-time during the day or in the evening. The complete program is available at all of HACC's campus locations, as well as through Virtual Learning.

Career or Transfer Opportunities

Graduates have acquired both the foundational knowledge and skills found within six major areas of general education (Communication; Quantitative, Information and Technology Literacy; Cultural Awareness; and Critical Thinking) as well as in the coursework selected to meet their individual career or transfer requirements.

Competency Profile

This curriculum is designed to prepare students to:

- Appropriately and correctly use numerical data appropriate to the task
- Create and express ideas in speaking and writing in a clear, organized manner appropriate for the intended audience
- Problem solve, create and evaluate through the following general education goals: information literacy, technology literacy, cultural awareness, communication and quantitative literacy
- Effectively use and apply technology appropriate to the task
- Access, evaluate and cite sources to meet information needs
- Investigate issues related to global interdependence and reflect upon their impact as global citizens
