

 GLITCHMACHINES®

FRAGMENT

FRAGMENT // CREDITS

SOUND DESIGN AND SAMPLE CONTENT:

Ivo Ivanov : www.ivanovsound.com

PRODUCT GRAPHICS:

Valentin Rodriguez DMAS3

ABOUT US:

Glitchmachines was established in 2005 by sound designer and electronic musician Ivo Ivanov. For the first 5 years of our brand's existence, we were focused on building handcrafted circuit-bent hardware instruments. We sold a limited number of units through boutique synthesizer retailers Analogue Haven and Robotspeak in California and we custom made instruments for numerous high-profile artists and sound designers. In 2010, we shifted our focus toward creative software plugins and sound effects packs.

LEGAL:

We need your support to be able to continue to bring you new products - please do not share our plugins and packs illegally. Piracy directly affects all of the creative people whom work hard to bring you new tools to work with!

For full Terms & Conditions, please refer to the EULA (End User License Agreement) located in the DOCS folder with this product or visit the Legal page on our website.

Glitchmachines ® www.glitchmachines.com

SUPPORT:

We recommend that you store a backup of the original zip file in the event that you ever need to recover overwritten files, etc. Our download links expire after 30 days for security reasons but you can always contact us to request a new download via email: sales@glitchmachines.com

If you require tech support, you may reach us at: support@glitchmachines.com

SETUP:

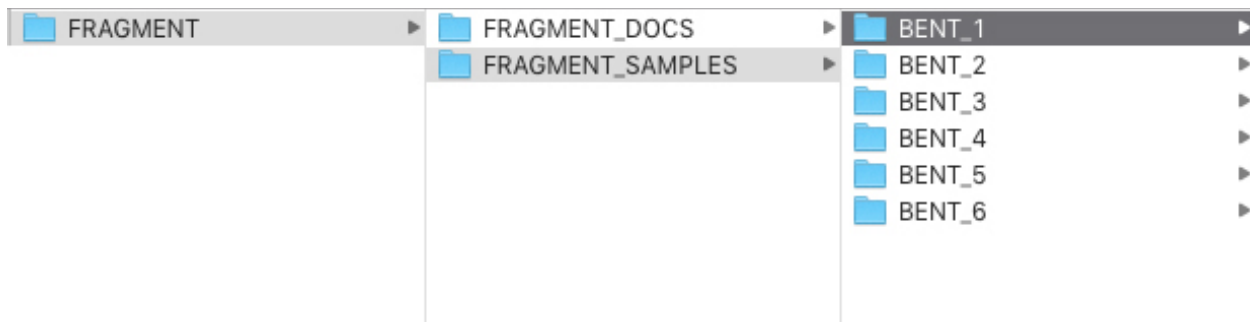

Due to this pack's significant size, it has been split up into 2 separate parts which you will need to download individually.

All you have to do is to consolidate the contents of the parts into the SAMPLES folder.

FRAGMENT_PART_1 already contains the correct folder architecture as well as the folders BENT_1-3 and their contents as shown below:

You simply need to place the remaining three folders found in part 2 into the FRAGMENT_SAMPLES folder until it is fully populated, as shown below:

Once the folders in the pack are organized in this way, your work is done!

You can then import the .wav files directly into your favorite DAW or sampler.

FRAGMENT DESCRIPTION:

Fragment features 300 designed glitch sound effects by Ivo Ivanov, featuring recordings of an collection of custom circuit bent hardware instruments hand-built by Ivo himself. Fragment comes with 850MB of 24bit 96kHz .wav audio content, which has been crafted to retain the subtle nuances and sonic characteristics of the original instruments.

The lo-fi character of this sample pack is suitable for any project in need of mind-bending and aggressive electronic effects. The samples were all skillfully layered and processed to vastly broaden the sonic range typically associated with circuit bent sounds giving you genuine glitch articulations with a truly unique sonic signature.

SAMPLE CONTENT OVERVIEW:

The Fragment sample pack is comprised of 6 groups of 50 sounds.

Due to the abstract nature of these sound effects, we chose to give them arbitrary, stylized names. While this compliments the glitchy character of the sample pack, we are aware that it could initially be somewhat daunting to recall the exact location of a particular sound of interest. We feel that this has been balanced by breaking the sounds up into groups of 50. This way, it becomes easier to maintain a mental map of the location of the sounds according to the group within which they reside. This method also invites you to take a more exploratory approach to working with the sounds.

These sounds are especially valuable in electronic music production and sound design, where they can be easily adapted to a wide variety of genres and creative situations. While all of the sounds in this pack have been designed to be production ready, we always recommend experimentation with further processing by means of a variety of other sample manipulation tools such as [Polygon](#) or [Cataract](#). Importing our sounds into one of these tools will allow you to generate a vast variety of fresh material.

If you are interested in obtaining some of the raw source recordings used for these designs, please check out our sample pack [Parallax](#).

Thanks for purchasing Fragment!
