

Subject: MCR-10058, Fix typo in bind.info

Author: Eric Swenson

Date: May 25, 2019

Problem Description

The bind.info info segment contains a typo. It incorrectly specifies “/” as the end comment delimiter. This should be “*/”. Ticket <http://multics-trac.swenson.org/ticket/108> reports this typo.

The relevant section of the info segment follows:

```
List of bindfile delimiters:
:
  keyword delimiter used to identify a keyword followed by one or
  parameters.  A keyword that is followed by no parameters is
  delimited by a statement delimiter.
;
  statement delimiter.
'
  parameter delimiter.  The last parameter is delimited by a statement
  delimiter.
/*
  begin comment.
/
  end comment.
```

The second-to-last line should reflect the “*/” delimiter.

Proposed Changes

The proposed change is to update the delimiter in the second-to-last line so that the section reads:

```
List of bindfile delimiters:
:
  keyword delimiter used to identify a keyword followed by one or
  parameters.  A keyword that is followed by no parameters is
  delimited by a statement delimiter.
;
  statement delimiter.
'
  parameter delimiter.  The last parameter is delimited by a statement
  delimiter.
/*
  begin comment.
*/
  end comment.
```

A comparison of the installed >doc>info>[bind.info](#) and the updated one follows:

```
cpa >doc>info>bind.info bind.info

A1          07/07/86  bind, bd
Changed by B to:
B1          2019-07-07  bind, bd

A246        /
Changed by B to:
B246        */

Comparison finished: 2 differences, 4 lines.
r 13:38 0.098 0
```

Documentation

This is a documentation MCR, and as such, no additional documentation is needed, except that the Software Release Bulletin accompanying the next release of Multics will include mention of updated info segment.

Testing

None required.
