

Subject: MCR-10076 Fix misspelling in check_mst output

Author: Eric Swenson

Date: Jan 22, 2020

Problem Description

The `check_mst` command has a typo in its output. The word `ENVIRONMENT` is spelled wrong. This MCR proposes to correct the misspelling.

Ticket <http://multics-trac.swenson.org/ticket/181> describes this issue.

Proposed Changes

The proposed changes are as above and exemplified by the following `compare_ascii` output:

```
cpa [lpn checker_load_MST_.pl1] ==
```

```
...
```

```
Inserted in B:
```

```
B15      2) change(2020-01-22,Swenson), approve(2020-01-22,MCR10076):
```

```
B16      Fix typo in output.
```

```
Preceding:
```

```
A15                                           END HISTORY COMMENTS */
```

```
A199                                           call checker_print_ ("Begin collection ^d.^d: ^[WIRED  
ENVIRONMENT^]",
```

```
Changed by B to:
```

```
B201                                           call checker_print_ ("Begin collection ^d.^d: ^[WIRED  
ENVIRONMENT^]",
```

```
Comparison finished: 3 differences, 8 lines.
```

```
r 15:00 0.976 13
```

Documentation

No changes are needed.

Testing

A hardcore tape will be generated and check_mst used to check its integrity. The output will be scrutinized to make sure that the misspelling is corrected and no other issues result.
